Biologically-Inspired Collaborative Computing Mike Hinchey, Anastasia Pagnoni, Franz J. Rammig, Hartmut Schmeck, Look deep into nature and you will understand everything better advised Albert Einstein In recent years the research communities in Computer Science Engineering and other disciplines have taken this message to heart and a relatively new field of biologically inspired computing has been born Inspiration is being drawn from nature from the behaviors of colonies of ants of swarms of bees and even the human body This new paradigm in computing takes many simple autonomous objects or agents and lets them jointly perform a complex task without having the need for centralized control In this paradigm these simple objects interact locally with their environment using simple rules Applications include optimization algorithms communications networks scheduling and decision making supply chain management and robotics to name just a few There are many disciplines involved in making such systems work from artificial intelligence to energy aware systems Often these disciplines have their own field of focus have their own conferences or only deal with specialized problems e.g. swarm intelligence biologically inspired computation sensor networks The Second IFIP Conference on Biologically Inspired Collaborative Computing aims to bridge this separation of the scientific community and bring together researchers in the fields of Organic Computing Autonomic Computing Self Organizing Systems Pervasive Computing and related areas We are very pleased to have two very important

keynote presentations Swarm Robotics The Coordination of Robots via Swarm Intelligence Principles by Marco Dorigo Universit Libre de Bruxelles Belgium of which an abstract is included in this volume **Weaving Iridescence** Bobbie Irwin, 2017-09-01 Iridescent fabric shimmers and glows changing colors depending on how the light hits it Different colors appear in the folds and pleats adding surprising layers of color to fabric To the uninformed it appears magical and difficult but the truth is that weaving iridescent fabric is accessible to any handweaver who knows the tricks Bobbie Irwin has been teaching the techniques for weaving iridescence in person and through articles for more than ten years In this book she delivers her most comprehensive course yet covering the details from how to evaluate and choose yarn to achieve your desired effect to the ways weave structure affects iridescence to the best uses for your iridescent fabric Hands on project instructions will have you exploring what you ve learned right away If you have been looking to add some shimmer to your weaving this is the only book you will ever need **Exploring Geovisualization** J. Dykes, A.M. MacEachren, M.-J.
