Social Emotions and Their Influences Huiyan Lin, Giorgio Coricelli, Chunliang Feng, Siyang Luo, Steven Young, 2023-06-06 The common dimensional model of emotion has emphasized that emotional information is generally processed from two dimensions valence from negative to positive and arousal from low to high Recently several theories have proposed that emotions also vary along a sociality dimension ranging from non social emotions i e basic biological drives to social emotions i e complex social interactions Specifically non social emotions e g fear are derived from incentives or aversive emotions that have direct physiological relevance whereas social emotions e g guilt are elicited within the context of social information processing or social cognition Multiple empirical studies have investigated the processing of non social emotions and the influences of these emotions on other cognitive processes However questions regarding social emotion processes and their influences are still open For example little is known about psychological and neural mechanisms underlying different social emotions processes e g guilt shame love envy and pride the development and individual differences of social emotions or the influences of social emotions on social behaviors and decision making Therefore this Research Topic aims to gain a deeper understanding of how different social emotions are processed among different populations and how these social emotions influence other cognitive processes We aim to have a collection of studies which extend the theoretical technical and empirical knowledge about psychological and neural mechanisms underlying social emotions processes as well as the influences of these processes on other cognitive processes in particular on social decision making We encourage studies from different domains e g emotion behavioural economics and decision making implemented by different techniques e g behaviour electrophysiology neuroimaging and brain stimulations among different populations e g healthy adults children and elderly persons with psychological traits and personalities and psychiatric patients

Truth in Advertising? Barbara Allen, Daniel Stevens, 2018-10-18 This book represents the first systematic effort to examine 1 the factual accuracy of the claims made in an entire political advertising campaign 2 the visuals and sound cues used in that advertising and their relationship with the tone and accuracy of ads and 3 the impact of the accuracy of claims on what people know and how they vote in a real campaign The research is based on several years of labor intensive coding of the factual accuracy of every claim made in the presidential ads in the 2008 election as well as the ads for the races for the US Congress in Minnesota We show how the accuracy of political ad claims the visuals and sound of ads and ad tone particularly negativity are related to voting behavior We argue that understanding how the accuracy of political ad claims affects voters is now more important than ever This research has steered clear of the normative question of what such putative gains in knowledge represent however Does the content of negative advertising enhance voter capacities such as the ability to locate candidates issue positions accurately or state reasons to like or dislike candidates based on accurate information about the candidates traits or issue stands Does the accuracy of the information in political advertising matter to voting behavior or vote choice whether turnout goes up or down Would voting more while knowing less that is true be sufficient in a democracy In studying the effects of advertising tone such questions about advertising tone have not been asked Our book redresses this lacuna We show that negative advertising is more likely to make inaccurate claims We show that ads making inaccurate claims also use a larger number of visual and sound distortions perhaps tying up more cognitive capacities while pressing their untruthful arguments We show links between inaccurate advertising and aggregate turnout individual turnout and individual political knowledge The news is not good in an age of post factual democracies

Political Communication Ethics Robert E. Denton Jr., 2000-05-30 This essay collection examines ethical concerns related to the traditional areas of political communication including campaigns media discourse and advertising as well as new technologies including the Internet In total the collection provides one of the few volumes to examine political ethics from an academic perspective rather than from a moralistic or rule orientation Bruce Gronbeck provides an assessment of presidential campaigns arguing that ethical judgments of citizens are based on candidates actions and motives character and competence Ronald Lee explores the ethics of campaign discourse and he charts the relationship between presidential candidates projection of civic virtue and the political arrangements that dictate the course of the campaign itself Steven Goldzwig and Patricia Sullivan examine what happens to discourse when the divide between the haves and have nots translates into a local community disconnected from virtual politics The nature types and impact of the growing use of hate speech in contemporary politics is explored by Rita Whillock while Robert Denton investigates television as an instrument of governing and its impact on the nature of democracy Gary Woodward looks at the ethics of political journalism and Lynda

Lee Kaid analyzes the ethical issues raised by political advertising in all forms Clifford Jones looks at the impact of campaign finance rules on campaign communication strategy Gary Selnow explores the ethics of politics on the Internet and Robert Denton concludes by examining the relationship between constitutional authority and public morality An important text for students as well as scholars investigating contemporary American politics Gender, Heteronormativity, and the American Presidency Aidan Smith, 2017-10-03 Gender Heteronormativity and the American Presidency places notions of gender at the center of its analysis of presidential campaign communications Over the decades an investment in gendered representations of would be leaders has changed little in spite of the second and third wave feminist movements Modern candidates have worked vigorously to demonstrate compensatory heterosexuality an unquestionable normative identity that seeks to overcome challenges to their masculinity or femininity The book draws from a wide range of archived media material including televised films and advertisements public debates and speeches and candidate autobiographies From the domestic ideals promoted by Eisenhower in the 1950s right through to the explicit and divisive rhetoric associated with the Clinton Trump race in 2016 intersectional content and discourse analysis reveals how each presidential candidate used his or her campaign to position themselves as a defender of traditional gender roles and furthermore how this investment in appropriate gender behaviour was made manifest in both international and domestic policy choices This book represents a significant and timely contribution to the study of political communication While communication during presidential elections is a well established research field Aidan Smith s book is the first to apply a gendered lens over such an extended historical period and across the political spectrum The Columbia History of Post-World War II America Mark Christopher Carnes, 2007 Beginning with an analysis of cultural themes and ending with a discussion of evolving and expanding political and corporate institutions The Columbia History of Post World War II America addresses changes in America s response to the outside world the merging of psychological states and social patterns in memorial culture scandal culture and consumer culture the intersection of social practices and governmental policies the effect of technological change on society and politics and the intersection of changing belief systems and technological development among other issues Many had feared that Orwellian institutions would crush the individual in the postwar era but a major theme of this book is the persistence of individuality and diversity Trends toward institutional bigness and standardization have coexisted with and sometimes have given rise to a countervailing pattern of individualized expression and consumption Today Americans are exposed to more kinds of images and music choose from an infinite variety of products and have a wide range of options in terms of social and sexual arrangements In short they enjoy more ways to express their individuality despite the ascendancy of immense global corporations and this volume imaginatively explores every facet of this unique American experience Presidential Campaign Communication Craig Allen Smith, 2010-03-15 Major textbook introduction to the ways that the people of the US use the process of human communication to select their Presidents Looks at the function and effects of talk about American

presidential politics in everyday life With Malice Toward All? Patricia Moy, Michael Pfau, 2000-04-30 Public opinion polls point to a continuing decline in confidence in the Presidency court system Congress the news media state government public education and other key institutions Moy and Pfau analyze the reasons for this crisis of confidence with particular attention to the role of the media Moy and Pfau examine the impact of sociodemographic factors political expertise and use of communication media on people's perceptions of confidence in democratic institutions Their conclusions are based on two years of data collection In three waves between 1995 and 1997 they conducted a series of content analyses of media depictions of democratic institutions in conjunction with general survey data The result is one of the most comprehensive examinations ever conducted on the influence of the media on public confidence It will be of great value to scholars researchers students and professionals in government and the media **Presidential Campaigns, Slogans, Issues, and Platforms** Robert North Roberts, Scott John Hammond, Valerie A. Johnson** Benjamin W. Quail, 2022-01-01 This book looks broadly at how the contentious relationships between the media and US President Lyndon B Johnson affected the national consciousness during the turbulent period of his leadership Johnson had to deal with a particularly difficult and divisive period in American history and his relationship with the press undoubtedly contributed to an atmosphere of friction within the United States A more specific purpose of this research monograph is ultimately to shine a light on the trials and tribulations that Johnson faced as a president dealing with new forms of communication in the 1960s It aims to show the difficulties that he had in adapting a very personal style of leadership which had served him well in the Senate in the role he

undertook as leader of a nation Further to this it builds on this foundation to argue that Johnson developed a reactive passive stance to dealing with the media one that ultimately contributed to a loss in popularity and status as leader a blow he never recovered from during his time in office Break It Up Richard Kreitner, 2020-08-18 From journalist and historian Richard Kreitner a powerful revisionist account of the most persistent idea in American history these supposedly United States should be broken up Eric Foner The novel and fiery thesis of Break It Up is simple The United States has never lived up to its name and never will The disunionist impulse may have found its greatest expression in the Civil War but as Break It Up shows the seduction of secession wasn't limited to the South or the nineteenth century It was there at our founding and has never gone away With a scholar's command and a journalist's curiosity Richard Kreitner takes readers on a revolutionary journey through American history revealing the power and persistence of disunion movements in every era and region Each New England town after Plymouth was a secession from another the thirteen colonies viewed their Union as a means to the end of securing independence not an end in itself George Washington feared separatism west of the Alleghenies Aaron Burr schemed to set up a new empire John Quincy Adams brought a Massachusetts town's petition for dissolving the United States to the floor of Congress and abolitionist William Lloyd Garrison denounced the Constitution as a pro slavery pact with the devil From the cold civil war that pits partisans against one another to the modern secession movements in California and Texas the divisions that threaten to tear America apart today have centuries old roots in the earliest days of our Republic Richly researched and persuasively argued Break It Up will help readers make fresh sense of our fractured age
