

## **million+ evidence to the Science and Technology Committee Inquiry examining the impact of spending cuts on SET and scientific research**

### **1. Introduction**

The university think-tank million+ is pleased to submit evidence to the Committee's Inquiry into the impact of spending cuts on science, engineering and technology and scientific research. In particular, this submission

- assesses the overall implications of the Pre-Budget Report
- identifies issues with policies of concentration adopted by the Research Councils
- outlines the threat to postgraduate provision throughout the sector if budget reductions are used to concentrate the funding of postgraduate doctoral students
- outlines the implications of the 2008 RAE, associated QR settlement and the Secretary of State's annual grant letters to the Higher Education Funding Council for England for STEM, other science programmes and the future funding of excellent research
- comments on proposals to apply economic impact assessments in future Research Council decisions and in the Research Excellence Framework
- assesses increases in applications and enrolments for STEM students and invites the Committee to consider further the reasons why some STEM graduates do not progress to STEM focused careers
- analyses the impact of the decision to provide an additional 10,000 STEM student places in 2009 and the issues arising in respect of the hefce unit of resource
- identifies the disadvantages of the switch of £14m from other Research Councils to support the Science and Technology Facilities Council's re-prioritised budget and the consequences of the STFC's own proposals to reduce by 25% the number of funded scholarships and fellowships.

million+ would be pleased to appear before the Committee as part of its Inquiry.

### **2. Impact of Pre-Budget Report on Universities**

In the Pre-Budget Report, the Chancellor of the Exchequer announced

- a 10p rate of corporation tax on income derived from British patents as incentive for companies to exploit British scientific discoveries
- £200m for new innovative industrial projects and
- a reduction of £600m by 2012-13 "from higher education and science and research budgets from a combination of changes to student support within existing arrangements; efficiency savings and prioritisation across universities, science and research; some switching of modes of study in higher education; and reductions in budgets that do not support student participation."

Science and Technology Committee,2006-08-04 This report focuses upon the Home Office s identity cards scheme which uses  
various technologies including biometrics information and communication technology ICT and smart cards It explores the  
ways in which scientific advice risk and evidence are being managed in relation to technologies that are continually  
developing The Home Office has followed good practice by the establishment of advisory committees the use of Office of  
Government Commerce OGC Gateway Reviews and the development of risk management strategies along with a policy of  
gradual implementation But the Committee has identified weaknesses in the use of scientific advice and evidence There has  
been a lack of transparency surrounding the incorporation of scientific advice the procurement process and the ICT system  
Consultations have been limited in scope and their objectives have been unclear Only some aspects of the scheme such as the  
biometrics have been determined The Home Office s decisions demonstrate an inconsistent approach to scientific evidence  
and the Committee is concerned that choices regarding biometric technology have preceded trials With extensive trialling  
still to take place the Committee is sceptical about the validity of projected costs The Committee recommends that the Home  
Office seeks advice on ICT from senior and experienced professionals and establishes an ICT assurance committee It is  
crucial that the Home Office increases clarity and transparency across the programme not only in problem areas The  
programme should also be flexible enough to change should evidence emerge that contradicts existing assumptions

**the Film Business** Michael Franklin,2022-07-25 This book explores the complex multifaceted and contested subject of risk  
in the film business How risk is understood and managed has a substantial impact upon which films are financed produced  
and seen Founded on substantial original research accessing the highest level of industry practitioners this book examines  
the intertwined activity of independents large media companies including major studios the international marketplace and  
related audio visual sectors such as high end television The book shows how risk is generally framed or even intuited rather  
than calculated and that this process occurs across a sliding scale of formality This work goes beyond broad creative  
industries characterisations of a risky sector and concentrations on Box Office return modelling to provide a missing middle  
This means a coherent analytic coverage of business organisation and project construction to address the complex  
practicalities that mobilise strategic operations in relation to risk often in unseen business to business contexts Informed by  
economic sociology s concepts addressing market assemblage and valuation alongside applications of science and technology

studies to media and communications the book respects both the powerful roles of social and institutional actors and affordances of new technologies in dealing with the persistent known unknown the audience Examining a persistent business issue in a new way this book analyses top level industry practice through established mechanisms and innovations like data analytics The result is a book that will be essential reading for scholars with an interest in the film business as well as risk management more broadly
