A Select List of Works on Europe and Europe Overseas, 1715-1815 John Selwyn Bromley, Albert Goodwin, 1956

The Enlightenment Norman Hampson, 1990-06-28 Armed with the insights of the scientific revolution the men of the Enlightenment set out to free mankind from its age old cocoon of pessimism and superstition and establish a more reasonable world of experiment and progress Yet by the 1760s this optimism about man and society had almost evaporated In the works of Rousseau Kant and Goethe there was discernible a new inner voice and an awareness of individual uniqueness which had eluded their more self confident predecessors The stage was set for the revolutionary crisis and the rise of Romanticism In this book Norman Hampson follows through certain dominant themes in the Enlightenment and describes the contemporary social and political climate in which ideas could travel from the salons of Paris to the court of Catherine the Great but less easily from a master to his servant On such vexed issues as the role of ideas in the rise of the middle class he provides a new and realistic approach linking intellectual and social history

The French Revolution Albert Goodwin, 2016-06-10 Originally published in 1956 this masterly essay weaves together the results of research with an independence of judgement which could only come from a long established expert in the field of Revolutionary studies The book examines the causes of the French Revolution and the economics involved in the weakness of France s pre revolutionary form of government as well as the administrative complexity which was an effective stumbling block in the way of monarchy As well as charting key events in the revolution the conclusion discusses the significance of the French Revolution in the context of other revolutions in both the nineteenth and twentieth centuries

France J.M. Wallace-Hadrill, J. McManners, 2022-11-30 First published in 1957 France is a collection of essays which was originally delivered as lectures in the University of Oxford While there is an intense interest in French history it is still true to say that no satisfactory short history of France is available to the English reader A single writer or indeed a group of two or three writers could not hope to master the state of studies over the whole range of French history this could only be done by a team of experts and such a team of experts could only be found in one of our major universities The volume which is here presented consists of twelve essays by recognized experts in particular fields each essay being complete in itself while together they cover the interaction of government and society over the whole range of French history from the earliest times to the 1950s This book will be of interest to students of politics government history sociology and policy

Routledge Library Editions: The French Revolution Various Authors, 2022-07-30 The volumes in this set originally published between 1953 and 1992 discuss the causes and conditions which allowed the French Revolution to happen and its impact on wider

European politics and society As well as charting key events in the revolution the conclusion discusses the significance of the French Revolution in the context of other revolutions in both the nineteenth and twentieth centuries One of the volumes discusses whether the French Revolution is part of Germany s progressive tradition whilst others trace the growth of English radicalism and the growth of the French Press showing the importance of the emergence of provincial newspapers and examining the relationship of journalism with political power A Select List of Work on Europe and Europe Overseas J.
