Lewin, 1997-03-28

Practical advice from Marsha D Lewin On success as a consultant Over these decades of consulting the most successful consultants I've known were self starters whose enthusiasm individualism and drive did not blend with big business norms They saw a problem identified what needed to be done and went on to solve it They didn't wait for committees to pass on the idea and to run it up the corporate ladder for serial approval On surviving in a cyclical economy Plan ahead for the inevitable downturn in the economy That's clearly the way to be in the best position to be able to endure the hard times The down cycle may not be accommodating enough however to hit us after we've put away all the money we had planned on and will need for the future That's why advance planning strategies must be supplemented by strategies to cope with an existing economic peril And once you've made it through the dangerous times you'll want to evaluate your situation to ensure that you adjust your strategies from survival mode to those that enable you to plan ahead until the next threat On strategy Strategies are fundamental mental and emotional underclothes visible only to you and yours Our strategic plan is the mooring the underpinning that we use as our target for the tactics with which we deal in our daily lives On controlling expenses I

emphasize reviewing your expenses periodically because situations change and pricing of various options changes as well. If you make decisions on a never again basis you might find you are paying way too much for the basic services and you are merely causing yourself to work harder to stay in the same place from *The Consultant's Survival Guide*. When businesses, government agencies and other organizations are faced with problems they can't solve on their own, they turn to you, the management consultant, for expertise, perspective and rational solutions. But what happens when your business is threatened by forces you can't control? Who helps you put your problems in perspective, analyze your situation and find a remedy? Is there a consultant's consultant? There is now. In her thirty years as a management consultant, Marsha D. Lewin has seen it all: the booms, the busts, the endless uncertainties. She knows that some consultants ride out the tough times with relative ease while others, equally talented, are quickly overwhelmed. In *The Consultant's Survival Guide*, she reveals 14 strategies that will keep your consulting practice going through good times and bad, and she offers specific tactics you can use to make sure your strategies succeed. You'll learn how to cut expenses in hard times without undercutting the quality of your services. Keep your fees up and your clients smiling. Avoid giving away the store when writing a proposal. Ensure that your work produces a tangible result for clients. Use downtime to build up your business. Expand the geographical perimeters of your client base. Market your services without spending a dime. Develop and maintain a reputation as a competent, conscientious, reliable consultant. Many of the strategies and tactics you'll discover in this book will help boost your profits in any business climate. Others are rules to live by that should influence every action of your professional life. All are practical steps that you can implement easily to make your practice stronger, more profitable and more fit for survival starting today. Harvard Business School Core Collection Baker Library, 1993. *Management Consulting* Stephen J. Porth, Michael Saltis, 1999-04-30. This book is written and designed with two distinct but in many ways related audiences in mind. First and foremost, it is written for the practicing consultant. Research and specialized knowledge of small business consulting are scarce at a time when both the size and economic impact of the small business sector is growing and the demand for consulting services flourishes. This book is designed to help consultants understand the needs of small businesses and to succeed in their small business interventions. Practical, experience-based strategies and tools are described for use in the field. In addition, we have written the book for those who want to learn more about management consulting, especially students. This book may be used as a resource in management consulting, project management and other experiential business courses. These types of courses, where students manage a project and interact with a live organization client, are part of a growth market on college campuses as more business schools respond to the call to make their curricula real and practical. Million Dollar Consulting Alan Weiss, 1992. The acclaimed *Million Dollar Consulting* gives consultants the tools and advice they need to grow a firm that rakes in at least 1 million per year. Alan Weiss, the consultant's consultant, shows step by step how to raise capital, reel in new clients, set fees, accelerate growth and more. This updated and expanded edition will appeal to both Weiss's many

current fans and a whole new generation of readers looking for the best advice available for anyone who wants to build a million dollar consulting speaking career Homemade Money Barbara Brabec,1997 This must have survival guide for today s economy shows aspiring and veteran entrepreneurs how to select start manage market and multiply the profits of business at home The latest edition has been expanded and updated to reflect the changing face of home based businesses and features hundreds of new tips sidebars and examples from more than 200 readers and business professionals of charts illustrations *Small Business Sourcebook* ,2010 A guide to the information services and sources provided to 100 types of small business by associations consultants educational programs franchisers government agencies reference works statisticians suppliers trade shows and venture capital firms **Small Business Sourcebook** Yolanda A.
