Shetland Bus:

The Shetland Bus David Armine Howarth,1951 Om en illegal skibsrute fra Shetlands ørne til Norge under den tyske besættelse *Shetland Bus* David Howarth,2008-06-17 From the author of *We Die Alone* The Shetland Bus recounts the hundreds of crossings of small boats from the Shetland Islands to German occupied Norway to supply arms to the Resistors and to rescue refugees all under constant threat by German U boats and winter storms **The Shetland Bus** David Howarth,1955 *The Shetland Dialect* Peter Sundkvist,2020-11-29 The traditional dialect spoken in the Shetland Isles the northernmost part of Scotland and Britain is highly distinct It displays distinct characteristic features on all linguistic levels and particularly in its sound system or its phonology The dialect is one of the lesser known varieties of English within the Inner Circle Increasing interest in the lesser known varieties of English in recent years has brought a realization that there are still blanks on the map even within the very core of the Inner Circle Sundkvist's comprehensive treatise draws upon results from a three year research project funded by the Bank of Sweden Tercentenary Foundation for which a phonological survey of the Shetland dialect was carried out between 2010 and 2012 This book is a useful resource for those working on historical linguistics and is intended to serve as a comprehensive description and accessible reference source on one of the most distinct lesser known varieties of English within Britain It documents and offers a systematic account of the rich regional variation as well as being a reference source for those studying the historical formation and emergence of the Shetland dialect and language variation and change in Shetland as well as those within the broader field of Germanic linguistics *The Shetland 'Bus'* Stephen Wynn,2021-06-09 A history of the World War II clandestine special operations group that linked German occupied Norway with Scotland's Shetland Islands The Shetland Bus was not a bus but the nickname of a special operations group that set up a route across the North Sea between Norway and the Shetland Islands north east of mainland Scotland The first voyage was made by Norwegian sailors to help their compatriots in occupied Norway but soon the Secret Intelligence Service and the Special Operations Executive asked if they would be prepared to carry cargoes of British agents and equipment as well Fourteen boats of different sizes were originally used and Flemington House in Shetland was commandeered as the operation's HQ The first official journey was carried out by the Norwegian fishing vessel the Aksel which left Luna Ness on 30 August 1941 on route to Bremen in Norway This book examines that first journey as well later ones and discusses the agents and operations which members of the Shetland Bus were involved in throughout the war It also looks at the donation of three submarine chasers to the operation made in October 1943 by the United States Navy These torpedo type boats were 110 ft long and very fast allowing journey times between Shetland and Norway to be greatly reduced and carried out in greater safety The story of the Shetland Bus would be nothing without the individuals involved both the sailors of the boats and the agents who were carried between the two countries These were very brave individuals who helped maintain an important lifeline to the beleaguered Norwegians It also allowed British and

Norwegian agents a way into Norway so that they could liaise with the Norwegian Underground movement and carry out important missions against the German occupiers Praise for The Shetland Bus Wynn who has written or co written several books on the Second World War is to be commended for his detailed account of a captivating and understudied moment in the history of special operations Wynn's readable and engaging account of his subject explores the intersections of transnational Second World War and special operations history As a result it should be of interest to a wide readership The Northern Mariner Very highly recommended Firetrench A great book about individual spies and sailors from both sides of the water putting their lives at great risk I really enjoyed this book and it was written in a bit of diary style plenty of information and photographs I certainly recommend this book to all UK Historians

The Global Infrastructure of the Special Operations Executive Derwin Gregory, 2021-12-23 During the Second World War the British government established the Special Operations Executive SOE for the purpose of coordinating all action by way of subversion and sabotage against the enemy overseas Although the overseas operations of this branch of the British Secret Services are relatively well known few studies have explored the backroom sections of this organisation This book draws together the infrastructure developed to support an agent's journey from recruitment to despatch to the field At the start of the Second World War there were few existing facilities established within the UK to support clandestine operations As the conflict progressed in parallel to learning the operational procedures of their trade SOE also had to rapidly expand their support infrastructure around the world The organisation could effectively support their agents only by establishing facilities dedicated to training research and development supply transportation communication and command and control By predominately focusing on the organisation's agent facing infrastructure this book provides a backdrop to the brave men and women who conducted operations abroad In addition it gives an overview of the facilities in which SOE's backroom staff lived and worked The book will be of interest to students and scholars of archaeology history and war studies

Vikings Neil Oliver, 2012-10-04 The Vikings famously took no prisoners relished cruel retribution and prided themselves on their blood thirsty skills as warriors But their prowess in battle is only a small part of their story which stretches from their Scandinavian origins to America in the west and as far as Baghdad in the east As the Vikings did not write their history we have to discover it for ourselves and that discovery as Neil Oliver reveals tells an extraordinary story of a people who from the brink of destruction reached a quarter of the way around the globe and built an empire that lasted nearly 200 years Drawing on the latest discoveries that have only recently come to light Neil Oliver goes on the trail of the real Vikings Where did they emerge from How did they really live And just what drove them to embark on such extraordinary voyages of discovery over 1000 years ago VIKINGS will explore many of these questions for the first time in an epic story of one of the world's great empires of conquest

Sutherland,2011-05-12 Gary Sutherland was a lapsed golfer until he acquired his late dad's putter After studying a crumpled golf map of Scotland Gary decided to embark on a voyage His target was to play 18 rounds of golf on 18 Scottish islands in honour of his dad a ship's captain who when he wasn't at sea was never off the golf course His journey would take him from the Northern Isles to the Outer Hebrides Playing in the Harris hail and Arran sunshine he would encounter an odd variety of golfing hazards including sheep on the tees cows on the fairways and electric fences round the greens This is golf in the raw a million miles from St Andrews It is a life affirming tale of remembrance and discovery It's about having a laugh and holding on to what's dear And it's about a putter with magical properties You can believe what you choose to but it all happened
