Shifting Lines In The Sand:

Kuwait, 1945-1996 Miriam Joyce, 2014-03-05 Based on extensive research of British documents from the Public Records Office and American documents from the National Archives and several Presidential Libraries this book surveys events in Kuwait from the beginning of the twentieth century until the Second World War and explains Britain's initial interest in the ruling al Sabah family before focusing on the post 1945 period

Stories of Democracy Mary Ann Tétreault, 2000 A sophisticated investigation of the shifting tides of democratic governance in modern Kuwait from 1921 to the present based on interviews both with political activists and members of the political elite *Stories of Democracy* sheds light on a wide array of issues concerning Middle Eastern politics and democratic institutions in general Mary Ann Tétreault explores how various political factions have sought to advance their own notions of Kuwaiti history and politics through distinctive popular appeals

- 1 pro democracy forces focusing on Kuwait's relationship to the universal values of the democratic world around them and
- 2 anti democrats proffering Arab and Muslim religious and cultural traditions

She explores how such dramatic events as the suspension of the Kuwaiti constitution in 1986 and the invasion by Iraq in 1990 occasioned major shifts in the course of the democracy movement The current running through virtually all of the nation's political drama is the monolithic Kuwait Petroleum Corporation KPC used by the government as an instrument of economic strength to safeguard sovereignty in the absence of military might

Deep Skin Peggy Anne Samuels, 2010 Elizabeth Bishop who constructed poems of crystalline visual accuracy is often regarded as the most painterly of twentieth century American poets In *Deep Skin* Peggy Samuels explores Bishop's attraction to painters who experimented with dynamic interactions between surface and depth She tells the story of the development of Bishop's poetics in relation to her engagement with mid century art particularly the work of Paul Klee Kurt Schwitters and Alexander Calder Contemporary conversations about the visual arts circulating among art historians and reviewers shaped Bishop's experience and illuminated aesthetic problems for which she needed to find solutions The book explores in particular the closest intellectual context for Bishop her friend Margaret Miller who worked as a research associate and later associate curator at the Museum of Modern Art Samuels traces a complex and rich four way metaphor in her portrait of Bishop's methods surface of verse surface of painting skin and interface between mind and world The visual arts helped Bishop to develop a new model for lyric the surface of verse becomes a threshold that opens in two directions to nature and to the interior of the poet Bishop's poetics is very much about the touch of the materials of the mind and world inside the materiality of verse Translating and revising some of the concepts from the visual arts in her own linguistic medium she begins to experiment with modulation absorption and incorporation across multiple registers of experience

Bordering the Middle East Daniel Meier, 2020-05-21 This volume focuses on the influence that borders in the Middle East can have on actors identity building as well as how local national or transnational actors re define borders and boundaries The Middle East is facing a political crisis revealed by the Arab uprisings that is affecting states borders in a paradoxical way while local communal or tribal dissent tends to contest international borders states are trying to affirm their control over national territory in building border fences Focusing on borders in their materiality as well as their symbolic dimensions their representations may help with reappraising the region s own history the local national specificities as well as regional global constraints affecting borderlands and those who cross borders be they workers migrants or jihadists In this book six case studies will provide insights on state community relationships through the lens of border issues in the Levant and the Gulf The theoretical framework provided by the border studies conceptual tools allows authors to delve into the process of bordering de bordering and re bordering which is affecting the region raising questions on sovereignty authority and the political legitimacy of the regimes This book was originally published as a special issue of *Geopolitics*

War in the Gulf, 1990-91 Majid Khadduri, Edmund Ghareeb, 2001-09-27 For most Americans the war against Iraq lingers in memory as a vast morality play a drama offering ready made heroes and villains a glowering dictator in military uniform hapless Kuwaiti refugees with tales of persecution plucky pilots with high tech wizardry and a defiant American president ringing Churchillian as he drew a line in the sand But this characterization of the war is greatly oversimplified a one dimensional portrait lacking in context and nuance In *War in the Gulf 1990 91* eminent scholars Majid Khadduri and Edmund Ghareeb paint a very different picture one that brings historical depth to the portrait and displays the actions of many of the participants in a new and revealing light Khadduri and Ghareeb offer a far more accurate and complex portrait of the Iraq Kuwait conflict providing a wealth of background information not readily available before They made a distinction between the differences between Iraq and Kuwait over frontiers territory and sovereignty and the method pursued by Iraqi leaders to resolve those differences They explore for instance the history of relations between Iraq and Kuwait revealing that Kuwait had once been a part of Basra in southern Iraq during the Ottoman rule and only became a separate country while under British control it was the British in fact who drew the much disputed boundary line between Iraq and Kuwait Khadduri and Ghareeb describe the many decades of struggle to resolve the boundary issue examining the repeated attempts by other Arab states to mediate according to Islamic traditions of consultation and peaceful resolution within the faith The authors also show how Saddam Husayn s war

with Iran exacerbated the boundary tensions Because of the decade long war Iraq badly needed oil revenue to repay wartime loans and to rebuild but Kuwait persisted in pumping far beyond its OPEC quota driving down prices and costing Iraq billions of dollars of revenue The book reveals how Kuwait spurned Arab attempts to mediate this clash over oil prices as well as the longstanding boundary dispute frustrating efforts to resolve this crisis by peaceful means In one particularly interesting section the book examines the diplomatic talks during the early summer of 1990 both among various Arab nations most notably Iraq Saudi Arabia Egypt and Kuwait and with Saddam Husayn and the United States they show how messages from Washington and a visit by a congressional delegation lead by Senator Dole convinced the Iraqi leaders that they would be allowed to settle their problems with Kuwait without outside interference Khadduri and Ghareeb carry us through to the present exploring the war and its aftermath from the uprisings against Baghdad to the continuing U N sanctions to the recent defections from Saddam s inner circle War in the Gulf is a balanced eye opening account of one of the central events of recent years It corrects the Western views of most reporting explaining the frame of mind of the participants as no one has done before and causing us to examine anew such questions as who was responsible for the conflict and what might have happened if the United States had not intervened so rapidly

The Oil Wars Myth Emily L. Meierding, 2020-05-15 Do countries fight wars for oil Given the resource s exceptional military and economic importance most people assume that states will do anything to obtain it Challenging this conventional wisdom The Oil Wars Myth reveals that countries do not launch major conflicts to acquire petroleum resources Emily Meierding argues that the costs of foreign invasion territorial occupation international retaliation and damage to oil company relations deter even the most powerful countries from initiating classic oil wars Examining a century of interstate violence

she demonstrates that at most countries have engaged in mild sparring to advance their petroleum ambitions The Oil Wars Myth elaborates on these findings by reassessing the presumed oil motives for many of the twentieth century s most prominent international conflicts World War II the two American Gulf wars the Iran Iraq War the Falklands Malvinas War and the Chaco War These case studies show that countries have consistently refrained from fighting for oil Meierding also explains why oil war assumptions are so common despite the lack of supporting evidence Since classic oil wars exist at the intersection of need and greed two popular explanations for resource grabs they are unusually easy to believe in The Oil Wars Myth will engage and inform anyone interested in oil war and the narratives that connect them *A Historical Atlas of Kuwait* Kurt Ray,2003-12-15 Maps and text chronicle the history of Kuwait from early Sumerian settlements to the Persian Gulf War

Cultural Techniques Bernhard Siegert,2015-05-01 In a crucial shift within posthumanistic media studies Bernhard Siegert dissolves the concept of media into a network of operations that reproduce displace process and

reflect the distinctions fundamental for a given culture Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics Rather Siegert seeks to relocate media and culture on a level where the distinctions between object and performance matter and form human and nonhuman sign and channel the symbolic and the real are still in the process of becoming The result is to turn ontology into a domain of all that is meant in German by the word Kultur Cultural techniques comprise not only self-referential symbolic practices like reading writing counting or image making The analysis of artifacts as cultural techniques emphasizes their ontological status as in between shifting from first-order to second-order techniques from the technical to the artistic from object to sign from the natural to the cultural from the operational to the representational Cultural Techniques ranges from seafaring drafting and eating to the production of the sign signal-distinction in old and new media to the reproduction of anthropological difference to the study of trompe l'oeils grids registers and doors Throughout Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic Grounding posthumanist theory both historically and technically this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses
