**Works** Shin Takamatsu,1984 Shin Takamatsu Shin Takamatsu,Patrice Goulet,Doriana O. Mandrelli,Mario Pisani,1989 Responding to Chaos David N Buck,2014-04-04 A celebration of a unique culture and its experience of design this sensitive text is a timely examination of Japanese design at the start of a new century The country s economic boom in the 1980s produced a surge of interest in land and building and consequently in design in all its forms From restaurant interiors to products from private housing to recreational spaces design received an unprecedented degree of attention However the bursting in the early 1990s of this so called bubble economy has prompted a re examination of design and its role in urban society **Shin Takamatsu** Maurizio Vitta,1996-08 日本 建築,1990 *Felix Guattari* Gary Genosko,2002-08-01 This is the first detailed assessment of the life and work of Felix Guattari Mr Anti as the French press labelled him the friend of and collaborator with Gilles Deleuze Jacques Lacan and Antonio Negri and one of the 20th Century s last great activist intellectuals Guattari is widely known for his celebrated writings with Deleuze but these writings do not represent the true breadth and impact of his thinking writing and activism Guattari s major work as a clinical and theoretical innovator in psychoanalysis was closely linked to his participation in struggles against European right wing politics Felix Guattari introduces the reader to the diversity and sheer range of Guattari s interests from anti psychiatry to Japanese culture political activism and his theorizing of subjectification Highlighting why Guattari s work is of increasing relevance to contemporary political psychoanalytical and philosophical thought Felix Guattari An Aberrant Introduction presents the reader with an adventurous and provocative introduction to this radical thinker 日本 建築,1993 **Shin Takamatsu** Paolo Polledri,1993 *Building Sci-fi Moviescapes* Matt Hanson,2005 Building Sci fi Moviescapes provides a rare behind the scenes examination of how the digital city and space scapes in science fiction movies are created through the eyes of directors producers production designers and visualization artists This is a stunning showcase of some of the most impressive digital city and space scapes to come out of the movies from Hollywood as well as the Japanese and European film industries From seminal movies of the 1980s such as Tron and Bladerunner to classic series such as The Matrix and Star Wars to recent films such as Sky Captain and the World of Tomorrow this book is the definitive guide to the imagined aesthetics of the future Through authoritative commentary and interviews with key directors producers production designers and 3D visual artists Building Sci fi Moviescapes explores trends and digital visualization methods in science fiction films from the last three decades A celebration in design and creativity in Sci Fi filmmaking for the CG artist Access to revealing interviews with key 3D industry professionals Rich creative inspiration for Sci Fi filmmakers **Architecture for a Free Subjectivity** Dr Simone Brott,2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze s model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Felix Guattari subjectivity does not refer to a person but to the potential for and event

of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self-actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the banlieues indeed a walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century *Envisioning Architecture* Iain Fraser, Rod Henmi, 1993-12-16 Examples of world renowned masters of architecture are used in this enlightening book that explores the why of architectural drawing rather than the how By emphasizing the value of drawing over technique the authors demonstrate how the drawing itself influences the designer's processes of thought and exerts its own pull on the evolution of the concept

*Wood Architecture* Ruth Slavid, 2005 Timber is having a renaissance as an architectural material as more architects come to understand its properties and enjoy adding it to their repertoire of materials With a growing crop of good new timber buildings architects are coming to realise that this is no longer the sole preserve of the traditionalist but a material that has an important role to play in the contemporary world The book's introduction examines the ways in which a raw material of diminishing quality but abundant quantity can be stretched to perform as it has never done before using new technology and careful detailing The 40 case studies are devoted to some of the most interesting new wood projects from around the world The projects are grouped in seven themed chapters Featured architects from around the world include Steven Holl Foster and Partners Rural Studio Renzo Piano and Shigeru Ban **Faith and Power in Japanese Buddhist Art, 1600-2005** Patricia J. Graham, 2007-09-30 Faith and Power in Japanese Buddhist Art explores the transformation of Buddhism from the premodern to the contemporary era in Japan and the central role its visual culture has played in this transformation Although Buddhism is generally regarded as peripheral to modern Japanese society this book demonstrates otherwise Its chapters elucidate the thread of change over time in the practice of Buddhism as revealed in temple worship halls and other sites of devotion and in imagery representing the religion's most popular deities and religious practices It also introduces the work of modern and contemporary artists who are not generally associated with institutional Buddhism and its canonical visual requirements but whose faith inspires their art The author makes a persuasive argument that the neglect of these materials by scholars results from erroneous presumptions about the aesthetic superiority of early Japanese Buddhist artifacts and an asserted decline in the institutional power of the religion after the sixteenth century She demonstrates that recent works constitute a significant contribution to the history of Japanese art and architecture providing evidence of Buddhism's

compelling presence at all levels of Japanese society and its evolution in response to the needs of new generations of supporters

**Waro Kishi** Warō Kishi, Hiroshi Watanabe, 2000-10-31 Born 1950 Waro Kishi belongs to the generation of Japanese architects that emerged from Tadao Ando

**The Oxford Handbook of the Archaeology of the Contemporary World** Paul Graves-Brown, Rodney Harrison, Angela Piccini, 2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively

**Guattari Reframed** Paul Elliott, 2012-05-22 Guattari Reframed presents a timely and urgent rehabilitation of one of the twentieth century s most engaged and engaging cultural philosophers Best known as an activist and practising psychiatrist Guattari s work is increasingly understood as both eerily prescient and vital in the context of contemporary culture Employing the language of visual culture and concrete examples drawn from it this book introduces and reassesses the major concepts developed throughout Guattari s writings and his call to transform the deadening homogeneity of contemporary existence into the universe of creative enchantments Paul Elliott asserts the significance of Guattari as a revolutionary philosopher and cultural theorist and invites the reader to transform both their understanding of his work and their lives through his ideas

**Japan** Masaaki Takahashi, 2007 Insightful look at the many young interior designers and architects creating an impression in Japan today

**Architectures of Excess** Jim Collins, 2020-10-28 First Published in 1995 Much of recent theory has characterized life in media sophisticated societies in terms of a semiotic overload which allegedly has had only devastating effects on communication and subjectivity In Architectures of Excess Jim Collins argues that while the rate of technological change has indeed accelerated so has the rate of absorption The seemingly endless array of information has generated not chaos but different structures and strategies which harness that excess by turning it into forms of art and entertainment Digital sampling in rap music and cyber punk science fiction are well known examples of techno pop textuality

but Collins concentrates on other contemporaneous phenomena that are also envisioning new cultural landscapes by accessing that array hyper self reflexivity in mall movies best sellers and prime time television the deconstructive vs new classical debate in architecture the emergence of the New Black Aesthetic the development of retro modernism in interior design and the fashion industries The analyses of these disparate discontinuous attempts to develop a meaningful sense of location in an historical as well as a spatial sense address a cluster of interconnected questions How is the array of information being domesticated How has appropriationism evolved from the Pop Art of the sixties to the sampling of the nineties How has the relationship between tradition innovation and evaluation been altered Architectures of Excess investigates how these phenomena reflect change in taste and subjectivity considering how we must account for both pedagogically *Ardeth #01 (I - 2017)* AA.VV.,2017-08-30 Unlike the many magazines that revolve around the architectural world Ardeth concerns neither with outcomes architecture nor with the authors architects Ardeth concerns instead with their operational work i e projects The shift from subjects their good intentions as taught in Universities and reclaimed in the profession to objects the products of design at work within the social system that contains them engenders an analytical and falsifiable elaboration of the complex mechanisms that an open practice such as design involves Through a process of disciplinary redefinition Ardeth explores the falsifiability of design hypotheses as the object that allows the project to scientifically confront errors and approximations Machinic Eros Félix Guattari,2015-11-01 The French philosopher Félix Guattari frequently visited Japan during the 1980s and organized exchanges between French and Japanese artists and intellectuals His immersion into the machinic eros of Japanese culture put him into contact with media theorists such as Tetsuo Kogawa and activists within the mini FM community Radio Home Run documentary filmmakers Mitsuo Sato photographers Keiichi Tahara novelists Kobo Abe internationally recognized architects Shin Takamatsu and dancers Min Tanaka From pachinko parlors to high rise highways alongside corporate suits and among alt culture comrades Guattari put himself into the thick of Japanese becomings during a period in which the bubble economy continued to mutate This collection of essays interviews and longer meditations shows a radical thinker exploring the architectural environment of Japan s machinic eros
