**Wood Architecture** Ruth Slavid, 2005 Timber is having a renaissance as an architectural material as more architects come to understand its properties and enjoy adding it to their repertoire of materials With a growing crop of good new timber buildings architects are coming to realise that this is no longer the sole preserve of the traditionalist but a material that has an important role to play in the contemporary world The book's introduction examines the ways in which a raw material of diminishing quality but abundant quantity can be stretched to perform as it has never done before using new technology and careful detailing The 40 case studies are devoted to some of the most interesting new wood projects from around the world The projects are grouped in seven themed chapters Featured architects from around the world include Steven Holl Foster and Partners Rural Studio Renzo Piano and Shigeru Ban **Architecture for a Free Subjectivity** Dr Simone Brott, 2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Félix Guattari subjectivity does not refer to a person but to the potential for and event of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the

banlieues indeed a walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze's philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century 田口 隆雄,1993 **The Armageddon of Architecture and Design** Anthony Sully,2022-10-21 This book examines why there is a lack of humanity in current architecture that produces such ghastly environmental errors It brings together a selective study of past historical styles and works of art since primitive times in order to understand how the evolution of design was broken in the 20th century Current ideologies and philosophies of the day are examined to ascertain those elements which fuelled a modern architecture that is lacking in humanity and agreeable contextual co existence with our inherited communities It shows that the complex effervescence of evolutionary life with its joy communal celebratory nature and constructive creative urges is vulnerable from attack by these stronger alien forces of elimination and reductionism because their actions are by nature aggressive and dictatorially dominant This book will appeal to all those academics and professional stakeholders who care for the environment and wish to see more positive changes **Waro Kishi** Warō Kishi,Hiroshi Watanabe,2000-10-31 Born 1950 Waro Kisho belongs to the generation of Japanese architects that emerged from Tadao Ando
