Supernovae Martin Mobberley,2007-07-05 Supernova explosions which mark the deaths of massive stars or of white dwarf stars in binary systems are unbelievably violent events Despite occurring in galaxies many millions of light years away amateur telescopes can reveal these colossal explosions and even discover them In the past 25 years the amateur astronomer's contribution to supernova research has been staggering Visual variable star observers with access to large aperture amateur telescopes have contributed a steady stream of magnitude estimates of the brightest and closest supernovae In addition with the increasing availability of robotic telescopes and CCD technology more and more amateurs are discovering supernovae from their backyards Worldwide there have been more than 400 supernovae discovered by amateur astronomers using amateur telescopes Supernova research has never been so important Recent professional measurements of the most distant Type Ia supernovae have revealed the staggering and unexpected discovery that the acceleration of the Universe is actually increasing This in turn has led to a new phrase dark energy entering the astronomical vocabulary a mysterious force

in opposition to gravity driving the accelerated expansion Although amateurs cannot study the farthest supernovae their discovery and measurement of the closer examples helps to refine the science that is the hottest topic in cosmology today that is pinning down the history of the Universe and how much mass and energy exists within it today As always amateur astronomers are making a valuable contribution and hopefully this book might inspire a few more to monitor and discover new supernovae Martin Mobberley Suffolk U K **Billboard** ,1998-05-09 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **Modern Advances in Applied Intelligence** Moonis Ali,Jeng-Shyang Pan,Shyi-Ming Chen,Mong-Fong Horng,2014-05-20 The two volume set LNAI 8481 and 8482 constitutes the refereed conference proceedings of the 27th International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems IEA AIE 2014 held in Kaohsiung Taiwan in June 2014 The total of 106 papers selected for the proceedings were carefully reviewed and selected from various submissions The papers deal with a wide range of topics from applications of applied intelligent systems to solve real life problems in all areas including engineering science industry automation and robotics business and finance medicine and biomedicine bioinformatics cyberspace and human machine interaction
