*Copyright in the Renaissance: Prints and the Privilegio in Sixteenth-Century Venice and Rome* Christopher Witcombe, 2004-06-01 This study examines the emergence and early history of copyright in Venice and Rome focusing in particular on the privilegio and the use made of it by printers publishers engravers painters architects mapmakers and others in the sixteenth century to protect their commercial interests in various types of printed images These include separately sold engravings woodcuts and etchings as well as illustrations in books The first part of the book surveys printmaking and the privilegio in sixteenth century Venice and Rome together with the related issues of licensing and censorship The second part documents many of the recipients who were granted the privilegio The book introduces the reader to the richly competitive world of printmaking and print publishing in Renaissance Italy [Latin American Women and the Literature of Madness](#) Elvira Sánchez-Blake, Laura Kanost, 2015-05-11 At the turn of the millennium narrative works by Latin American women writers have represented madness within contexts of sociopolitical strife and gender inequality This book explores contemporary Latin American realities through madness narratives by prominent women authors including Cristina Peri Rossi Uruguay Lya Luft Brazil Diamela Eltit Chile Cristina Rivera Garza Mexico Laura Restrepo Colombia and Irene Vilar Puerto Rico Close reading of these works reveals a pattern of literary techniques a poetics of madness employed by the writers to represent conditions that defy language make sociopolitical crises tangible and register cultural perceptions of mental illness through literature **The Fools' Journey** Yona Pinson, 2008 Tracing the evolution of the newly emerging iconographical patterns of fools and folly this book sheds light on the original and innovative invention that was an exclusive creation of northern Renaissance art and culture The novel theme of the fools journey as expressed mainly through prints in Germany and later in the Netherlands in the sixteenth century is revealed as an ironical paraphrase parodying the well established Christian topos the Pilgrimage of Life or the Pilgrimage of the Human Soul which offered the believer the opportunity to travel on the road toward redemption The new mythical image of the fools journey however confronts the contemporary reader viewer with the image of the fool on his voyage that leads him instead to his doomed fate thereby reflecting a pessimistic world view The newly emerging visual vocabulary is considered in relation to analogical contemporary didactic and satirical theatrical performances such as the rederijkers plays the sottes and also carnival processions Proposing a new reading of Sebastian Brant's *The Ship of Fools* *Das Narrenschiff* Basel 1494 a landmark in the new iconography of the allegorical journey this study recognizes as well the power of the visual image employed in the woodcuts illustrations accompanying the treatise as a tool of moral teaching used as a means of influencing the larger urban audience for whom word and image were sometimes interchangeable Concomitantly the divergence between verbal expression and visual language may be seen to define the inherent codes of the visual expressions It is precisely the gap between literary sources and visualization the very moment when visual vocabulary crystallizes and image departs from word

creating its own autonomous expression and language that attracts our attention The range and diversity of visual material related to the fools journey topos addresses a wide spectrum of audiences This study also takes into consideration the strategies of communicating meanings and values to various publics Addressing the wider urban public that was not necessarily lettered notably women illustrated books and images were envisaged first of all as didactic tools In accordance the painters engravers attended their public with rather simple visual elaborations that could be easily deciphered Paintings drawings and prints intended for highly cultivated elite circles of urban society among them works by Albrecht Durer and Hieronymus Bosch demanded greater intellectual involvement on the part of the beholder challenging the sophisticated viewer to re create a meaningful ensemble out of the various scenes and motifs presented within complex compositions

This book explores the ways in which the body is sacred in Western medicine as well as how this idea is played out in questions of life and death of the autopsy and of the meanings attributed to illnesses and disease Ritual and religious modifications to and limitations on what may be done to the body raise cross cultural issues of great complexity philosophically and theologically as well as sociologically within medicine and for health care practitioners but also as a matter of primary concern for the patient The book explores the ways in which medicine organises the moral and the immoral the sacred and the profane how it mediates cultural concepts of the sacred of the body of blood and of life and death

Stage and Picture in the English Renaissance John H. Astington,2017-05-18 This book presents a new approach to the relationship between traditional pictorial arts and the theatre in Renaissance England Demonstrating the range of visual culture in evidence from the mid sixteenth to mid seventeenth century from the grandeur of court murals to the cheap amusement of woodcut prints John H Astington shows how English drama drew heavily on this imagery to stimulate the imagination of the audience He analyses the intersection of the theatrical and the visual through such topics as Shakespeare's Roman plays and the contemporary interest in Roman architecture and sculpture the central myth of Troy and its widely recognised iconography scriptural drama and biblical illustration and the emblem of the theatre itself The book demonstrates how the art that surrounded Shakespeare and his contemporaries had a profound influence on the ways in which theatre was produced and received

**The Renaissance of Etching** Catherine Jenkins,Nadine M. Orenstein,Freyda Spira,Peter Fuhring,Donald J. La Rocca,Anne Varick Lauder,Christof Metzger,Femke Speelberg,Ad Stijnman,Pierre Terjanian,Julia Zaunbauer,2019-10-21 The Renaissance of Etching is a groundbreaking study of the origins of the etched print Initially used as a method for decorating armor etching was reimagined as a printmaking technique at the end of the fifteenth century in Germany and spread rapidly across Europe Unlike engraving and woodcut which required great skill and years of training the comparative ease of etching allowed a wide variety of artists to exploit the expanding market for prints The early pioneers of the medium include some of the greatest artists of the Renaissance such as Albrecht Dürer Parmigianino and Pieter Bruegel the Elder who paved the way for future printmakers like Rembrandt Goya and many others in their wake Remarkably contemporary artists still use etching in much the same way as their predecessors did five hundred years ago Richly illustrated and including a wealth of new information The Renaissance of Etching explores how artists in Germany the Netherlands Italy and France developed the new medium of etching and how it became one of the most versatile and enduring forms of printmaking
