Mindset Mathematics Jo Boaler,Jen Munson,Cathy Williams,2018-02-28 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the fifth grade level through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they

want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual mathematics tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum Stability and Seaworthiness of Ships Thomas Bertrand Abell,1926

Archaeology of a riverine barge of Late Roman period and of other recent finds of sewn boats Carlo Beltrame,Elisa Costa,2023-02-28 The 5th century AD barge of Santa Maria in Padovetere was discovered and investigated inside an ancient river West of Comacchio The place which later hosted the parish of Santa Maria in Padovetere is considered a strategic crossroads of Late Roman waterways The anoxic conditions have well preserved the bottom and the entire right side This extraordinary conservation coupled with in situ digital documentation has allowed the reconstruction in 3D of the entire shape of the shipwreck It was a riverine flat bottom barge with a very high stern and a central long rudder according to a shipshape well documented by Central European Roman sculptures Scientific analysis allowed to reconstruct the environment where it moved and to make hypotheses on the types of goods transported This is a very rare example of an ancient riverine barge and an important evidence of the technique of construction by sewing The book also presents other
