Shipbuilders Of The Thames And Medway:

Shipbuilders of the Thames and Medway Philip Banbury, 1971 *Shipbuilding in the United Kingdom in the Nineteenth Century* Simon Ville, 2017-10-18 This volume tackles the history of Shipbuilding in the United Kingdom in the Nineteenth Century by breaking it down into six regions Northeast England Southeast England Southwest England Northwest England Scotland and Ireland The intent is to determine the different economic social and geographic factors that contribute to the varied rates of rise and decline of Shipbuilding across the United Kingdom rather than view the nation's shipbuilding history as a singular narrative which risks omitting the complexity of each region Each region has been ascribed an author and each author seeks to establish the quantitative and qualitative nature of output in their region assessing individual factors of production the character of the enterprises and the nature of the market

Ships & Shipbuilders Fred M. Walker, 2010-05-05 In the past three centuries the ship has developed from the relatively unsophisticated sail driven vessel which would have been familiar to the sailors of the Tudor navy to the huge motor driven container ships nuclear submarines and vast cruise liners that ply our seas today Who were the innovators and builders who during that span of time prompted and instigated the most significant advances In the past three centuries the ship has developed from the relatively unsophisticated sail driven vessel which would have been familiar to the sailors of the Tudor navy to the huge motor driven container ships nuclear submarines and vast cruise liners that ply our seas today Who were the innovators and builders who during that span of time prompted and instigated the most significant advances In this new book the author describes the lives and deeds of more than 120 great engineers scientists philosophers businessmen shipwrights naval architects and inventors who shaped ship design and shipbuilding world wide Covering the story chronologically and going back briefly even to Archimedes such well known names as Anthony Deane Peter the Great James Watt Robert Fulton and Isambard Kingdom Brunel share space with lesser known characters like the luckless Frederic Sauvage a pioneer of screw propulsion who unable to interest the French navy in his tests in the early 1830s was bankrupted and landed in debtors prison With the inclusion of such names as Ben Lexcen the Australian yacht designer who developed the controversial winged keel for the 1983 Americas Cup the story is brought right up to date Concise linking chapters place all these innovators in context so that a clear and fascinating history of the development of ships and shipbuilding emerges from the pages An original and important new reference book

The World Shipbuilding Industry Daniel Todd, 2019-08-13 This book first published in 1985 presents a comprehensive overview of the world shipbuilding industry It contrasts the conditions which foster its development in newly industrialised countries such as Japan South Korea and Brazil with the problems leading to its decline in Western Europe and North America The book discusses the supply and demand factors peculiar to shipbuilding and notes the inherent instability of the industry due to the conditions placed upon it by the economic environment Reactions to this instability are examined from the point of view of both shipbuilding enterprises and governments The book concludes by

assessing current trends and discussing likely future developments It is shown that much will depend on shipping costs industrial organisation and the level of state support

The Rise and Fall of British Shipbuilding Anthony Burton,2013-05-01 From modest beginnings Britain rose throughout the nineteenth century to become the greatest shipbuilding nation in the world yet by the end of the following century the British merchant fleet ranked just 38 in the world The glory days of sail had given way to the introduction of the steam age Traditional shipwrights had railed against new industrial methods resulting in the infamous demarcation disputes Talented men like Brunel and Armstrong had always sought change and development but too many shipbuilders were relying on old technologies From building mighty battleships and extravagant ocean liners the nation became complacent and its yards were eventually no longer as innovative as their foreign competitors In the twenty first century British shipbuilding has shrunk to a mere fraction of its former size and has become almost totally dependent on government contracts The popularity of and fascination with this subject has prompted a new edition of Anthony Burton s successful book With fresh images and a new final chapter the story of the rise and cataclysmic fall of British shipbuilding has been brought right up to date *The Shipbuilding Industry* L. A. Ritchie,1992 This work aims to facilitate the study of the shipbuilding industry by making available information on the present location of shipbuilding archives The brief histories of about 200 businesses are offered

Kent's Industrial Heritage James Preston,2016-11-15 James Preston looks at the industrial heritage of garden of England It illustrates what remains extant in what is now essentially a post industrial era

The Crimean War Andrew Lambert,2016-03-16 In contrast to every other book about the conflict Andrew Lambert s ground breaking study *The Crimean War British Grand Strategy against Russia 1853 1856* is neither an operational history of the armies in the Crimea nor a study of the diplomacy of the conflict The core concern is with grand strategy the development and implementation of national policy and strategy The key concepts are strategic derived from the works of Carl von Clausewitz and Sir Julian Corbett and the main focus is on naval not military operations This original approach rejected the Continentalist orthodoxy that dominated contemporary writing about the history of war reflecting an era when British security policy was dominated by Inner German Frontier the British Army of the Rhine and Air Force Germany Originally published in 1990 the book appeared just as the Cold War ended the strategic landscape for Britain began shifting away from the continent and new commitments were emerging that heralded a return to maritime strategy as adumbrated in the defence policy papers of the 1990s With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War the new edition makes this essential book available to a new generation of scholars

A-Z of Chiswick Andy Bull,2024-09-15 Explore the West London town of Chiswick in this fully illustrated A Z guide to its history people and places

Town Born Barry Levy,2011-07-06 In the seventeenth and eighteenth centuries British colonists found the New World full of resources With land readily available but workers in short supply settlers developed coercive forms of labor indentured servitude and chattel slavery in order to

produce staple export crops like rice wheat and tobacco This brutal labor regime became common throughout most of the colonies An important exception was New England where settlers and their descendants did most work themselves In *Town Born* Barry Levy shows that New England's distinctive and far more egalitarian order was due neither to the colonists' peasant traditionalism nor to the region's inhospitable environment Instead New England's labor system and relative equality were every bit a consequence of its innovative system of governance which placed nearly all land under the control of several hundred self-governing town meetings As Levy shows these town meetings were not simply sites of empty democratic rituals but were used to organize force and reconcile laborers families and entrepreneurs into profitable export economies The town meetings protected the value of local labor by persistently excluding outsiders and privileging the town born The town centered political economy of New England created a large region in which labor earned respect relative equity ruled workers exercised political power despite doing the most arduous tasks and the burdens of work were absorbed by citizens themselves In a closely observed and well researched narrative *Town Born* reveals how this social order helped create the foundation for American society

Energy and Empire Crosbie Smith, M. Norton Wise, 1989-10-26 This study of Lord Kelvin the most famous mathematical physicist of 19th century Britain delivers on a speculation long entertained by historians of science that Victorian physics expressed in its very content the industrial society that produced it

The Command of the Ocean N. A. M. Rodger, 2005 N A M Rodger provides reassessments of such famous figures as Pepys Hawke Howe and St Vincent The particular and distinct qualities of Nelson and Collingwood are contrasted and the world of the officers and men who made up the originals of Jack Aubrey and Horatio Hornblower is brought to life Rodger's comparative view of other navies French Dutch Spanish and American allows him to make a fresh assessment of the qualities of the British

BOOK JACKET Maritime Kent Through the Ages Stuart Bligh, Sheila Sweetinburgh, Elizabeth Clare Edwards, 2021 A wide ranging history of the geography and communities of Kent from the earliest times to the present day Kent with its long coastline and its important geopolitical position close to London and continental Europe and on major trading routes between Britain and the wider world has had a very significant maritime history This book covers a wide range of topics relating to that history from the earliest times to the present day It sets Kent's varied coastline and waters in their geological and geographical context showing how erosion and sediment deposition have contributed to the changing nature of maritime activities and populations It examines Kent's strategic role in the defence of the country with the development and redevelopment of coastal defences including four naval dockyards It goes on to consider the supporting industries which grew up around the coastline those which supplied raw materials and agricultural products from the county's hinterland and its wider national and international trading links It also discusses the diverse coastal communities of Kent and how they have changed in response to the demands of defence trade and changing population and migration patterns In addition the book includes detailed case studies which explore particular subject areas as exemplars of the major themes covered by the book

London Chartism 1838-1848 David Goodway,2002-10-10 This book the first full length study of metropolitan Chartism provides extensive new material for the 1840s and establishes the regional and national importance of the London movement throughout this decade After an opening section which considers the economic and social structure of early Victorian London and provides an occupational breakdown of Chartists Dr Goodway turns to the three main components of the metropolitan movement its organized form the crowd and the trades The development of London Chartism is correlated to economic fluctuations and after the nationally significant failure of London to respond in 1838 9 1842 is seen as a peak in terms of conventional organization and 1848 as the high point of turbulence and revolutionary potential The section concludes with an exposition of the insurrectionary plans of 1848

London and the Georgian Navy Philip Macdougall,Philip MacDougall,2013-06-03 At a time when the Royal Navy was the biggest and best in the world Georgian London was the hub of this immense industrial military complex underpinning and securing a global trading empire that was entirely dependent on the navy for its existence Philip MacDougall explores the bureaucratic web that operated within the wider city area before giving attention to London s association with the practical aspects of supplying and manning the operational fleet and shipbuilding repair and maintenance His supremely detailed geographical exploration of these areas includes a discussion of captivating key personalities buildings and work The book examines significant locations as well as the importance of Londoners in the manning of ships and how the city memorialised the navy and its personnel during times of victory An in depth gazetteer and walking guide complete this fascinating study of Britain her capital and her Royal Navy

The Crimean War Professor Andrew Lambert,2013-07-28 In contrast to every other book about the conflict Andrew Lambert s ground breaking study The Crimean War British Grand Strategy against Russia 1853 1856 is neither an operational history of the armies in the Crimea nor a study of the diplomacy of the conflict The core concern is with grand strategy the development and implementation of national policy and strategy The key concepts are strategic derived from the works of Carl von Clausewitz and Sir Julian Corbett and the main focus is on naval not military operations This original approach rejected the Continentalist orthodoxy that dominated contemporary writing about the history of war reflecting an era when British security policy was dominated by Inner German Frontier the British Army of the Rhine and Air Force Germany Originally published in 1990 the book appeared just as the Cold War ended the strategic landscape for Britain began shifting away from the continent and new commitments were emerging that heralded a return to maritime strategy as adumbrated in the defence policy papers of the 1990s With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War the new edition makes this essential book available to a new generation of scholars

Fighting at Sea in the Eighteenth Century Sam Willis,2008 Our understanding of warfare at sea in the eighteenth century has always been divorced from the practical realities of fighting at sea under sail our

knowledge of tactics is largely based upon the ideas of contemporary theorists rather than practitioners who knew little of the realities of sailing warfare and our knowledge of command is similarly flawed In this book the author presents new evidence from contemporary sources that overturns many old assumptions and introduces a host of new ideas In a series of thematic chapters following the rough chronology of a sea fight from initial contact to damage repair the author offers a dramatic interpretation of fighting at sea in the eighteenth century and explains in greater depth than ever before how and why sea battles including Trafalgar were won and lost in the great Age of Sail He explains in detail how two ships or fleets identified each other to be enemies how and why they manoeuvred for battle how a commander communicated his ideas and how and why his subordinates acted in the way that they did SAM WILLIS has lectured at Bristol University and at the National Maritime Museum in Greenwich He is also the author of *Fighting Ships 1750 1850 Quercus* [Re-inventing the Ship](#) Don Leggett, 2016-04-08 Ships have histories that are interwoven with the human fabric of the maritime world In the long nineteenth century these histories revolved around the re invention of these once familiar objects in a period in which Britain became a major maritime power This multi disciplinary volume deploys different historical geographical cultural and literary perspectives to examine this transformation and to offer a series of interconnected considerations of maritime technology and culture in a period of significant and lasting change Its ten authors reveal the processes involved through the eyes and hands of a range of actors including naval architects dockyard workers commercial shipowners and Navy officers By locating the ship s re invention within the contexts of builders owners and users they illustrate the ways in which material elements as well as scientific artisan and seafaring ideas and practices were bound together in the construction of ships complex identities [A Management Odyssey](#) J. M. Haas, 1994 The Royal Dockyards were Britain s oldest state enterprise and biggest and most complex industrial unit This book shows how the Admiralty over two centuries struggled to master the intractable problems of organization and management which the dockyards presented Haas maintains that the dockyards portrayed an image of being inefficient high cost producers These problems were chiefly extreme centralization but paradoxically weak control inadequate coordination of departments and accounting procedures unreliable information about production costs and material an insufficiently educated and professionalized constructive corps and an underpaid and slack workforce Contents Preface Introduction The Eighteenth Century Running in Place Tinkering with the System 1793 1815 Lightning Ship 1815 1834 Winds of Change 1834 1854 Under Siege 1854 1868 Revolution and Counterrevolution 1868 1885 The Watershed 1885 1900 A New Century and New Ideas 1900 1914 Conclusion Notes Bibliography Index
