## **Ships Against The Sea:**

**A Treatise on the Law of Collisions at Sea** Reginald Godfrey Marsden, 1919      *A Treatise on the Law of Collisions at Sea* Reginald G. Marsden, 2004      Fighting the Great War at Sea Norman Friedman, 2014-10-22 The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war \_ even the inevitability of British participation \_ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control rn This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control rn The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second

*Piracy and Armed Robbery at Sea* Robin Geiss, Anna Petrig, 2011-02-24 Piracy is no longer an archaic problem This analysis of the legal issues surrounding the repression of piracy and armed robbery at sea assesses whether the existing legal regime can effectively counter piracy in the modern age      *Implementation of the United Nations Convention on the Law of the Sea* Dai Tamada, Keyuan Zou, 2021-04-02 This book analyses the implementation of the United Nations Convention on the Law of the Sea UNCLOS in the light of state practices of China and Japan The special character of the book can be found in its structure of comparative analysis of the practices of China and Japan in each part The focus is on historical aspects Part I implementation of the UNCLOS Part II navigation Part III mid ocean archipelagos Part IV the marine environment Part V and dispute settlement Part VI By taking this approach the book elucidates a variety of aspects of history difficulties problems and controversies arising from the implementation of the UNCLOS by the two nations Furthermore contributors from China and Japan tend to show different perspectives on the UNCLOS which by clarifying the need for further debate are expected to contribute to the continuing cooperation between the academics of the two states      **The Law of the Sea** Laura Pineschi, Tullio Treves, 2021-09-27 The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994 Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea New concepts such as the exclusive economic zone archipelagic waters transit passage through straits and the International Seabed Area are now fully recognized The fifteen member States of the European Union are a significant sample for analyzing the practice of States or at least that of the Western industrialized States as regards the law

of the sea They include major and small maritime powers coastal and land locked States States with coasts on the Atlantic Ocean and States with coasts on semi enclosed seas such as the Baltic and the Mediterranean States with and without involvement in deep seabed mining and States with different interests as regards fisheries The fact that they all belong to the European Union is a very important common feature which amply justifies the choice made to study them together The book's aim is to give through essays prepared by well known specialists a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such The common positions of the member States and the results of their coordinated action also emerge from these essays The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument or at least as an instrument widely ratified by States of all continents and economic and political interests
