

The background of the slide is a detailed, monochromatic illustration in a light blue-grey tone. It depicts a busy ancient maritime scene. Several large, multi-masted sailing ships with intricate rigging and decorative patterns on their hulls are shown. Interspersed among the ships are numerous smaller sea creatures, including various types of fish, squid, and octopuses. The overall style is reminiscent of ancient Greek or Roman art, with a focus on geometric patterns and detailed line work.

Of Arms and Men Robert L. O'Connell, 1990-04-19 The appearance of the crossbow on the European battle field in A D

1100 as the weapon of choice for shooting down knights threatened the status quo of medieval chivalric fighting techniques By 1139 the Church had intervened outlawing the use of the crossbow among Christians With this edict arms control was born As Robert L O Connell reveals in this vividly written history of weapons in Western culture that first attempt at an arms control measure characterizes the complex and often paradoxical relationship between men and arms throughout the centuries In a sweeping narrative that ranges from prehistoric times to the nuclear age O Connell demonstrates how social and economic conditions determine the types of weapons and the tactics used in warfare and how in turn innovations in weapons technology often undercut social values He describes for instance how the invention of the gun required a redefinition of courage from aggressive ferocity to calmness under fire and how the machine gun in World War I so overthrew traditional notions of combat that Lord Kitchener exclaimed This isn't war The technology unleashed during the Great War radically altered our perceptions of ourselves as these new weapons made human qualities almost irrelevant in combat With the invention of the atomic bomb humanity itself became subservient to the weapons it had produced *Of Arms and Men* brilliantly integrates the evolution of politics weapons strategy and tactics into a coherent narrative one spiced with striking portraits of men in combat and penetrating insights into why men go to war

Early Ships and Seafaring: Water Transport within Europe Seán McGrail, 2014-11-30 *Early Ships and Seafaring: Water Transport Within Europe* builds on Professor Sen McGrail's 2006 volume *Ancient Boats and Ships* by delving deeper into the construction and use of boats and ships between the stone age and AD1500 in order to provide up to date information Regions covered will include the Mediterranean and Atlantic Europe This interesting volume is easily accessible to those with little to no knowledge of the building and uses of boats whether ancient or modern Sen McGrail introduces the reader to this relatively new discipline through the theory and techniques used in the study of early boats as well as the many different types of evidence available to us including archaeological documentary iconographic experimental and ethnographic and the natural physical laws

Transportation through the Ages Michael Woods, Mary B. Woods, 2024-08-01 The ancient world saw many empires rise and fall But how did massive empires such as Babylon or Rome move information and resources across continents They relied on one of the oldest technologies in human history transportation Ever since humans first began migrating within and outside of Africa they have needed transportation technology to help move themselves and their possessions Beginning with shoes to support feet over rough ground and boats to traverse water humans quickly created a wide range of inventions to help them move faster and carry more over long distances From prehistoric hunting paths to the widespread highways of Rome learn about the ancient transportation methods that shaped human history and paved the way for planes trains and superhighways

[A Maritime Archaeology of Ships](#) J. R. Adams, 2013-12-11 In the last fifty years the investigation of maritime archaeological sites in the sea in the coastal zone and in their interconnecting locales has emerged as one of archaeology's most dynamic and fast developing fields No longer a niche interest maritime archaeology is recognised as having central relevance in the integrated study of the human past Within maritime archaeology the study of watercraft has been understandably prominent and yet

their potential is far from exhausted In this book Jon Adams evaluates key episodes of technical change in the ways that ships were conceived designed built used and disposed of As technological puzzles they have long confounded explanation but when viewed in the context of the societies in which they were created mysteries begin to dissolve Shipbuilding is social practice and as one of the most complex artefacts made changes in their technology provide a lens through which to view the ideologies strategies and agency of social change Adams argues that the harnessing of shipbuilding was one of the ways in which medieval society became modern and while the primary case studies are historical he also demonstrates that the relationships between ships and society have key implications for our understanding of prehistory in which seafaring and communication had similarly profound effects on the tide of human affairs
