## **Shockwave The Countdown To Hiroshima:**

Shockwave Stephen Walker, 2005 At 8 15 a m on 6 August 1945 Major Tom Ferebee the ladykilling poker playing bombardier on board a B29 bomber flicks a switch In the bomb bay a single shackle drops its load into the freezing air It plummets towards a city but no commuters look up Then the bomb explodes The shockwave rips out from the epicentre flattening every object in its path Tens of thousands of people are annihilated In that instant the name Hiroshima is stamped on the consciousness of a world that will never be the same again In this tense real life narrative of events unprecedented interviews with witnesses interweave in a tapestry of voices They include the co pilot who writes a minute by minute diary on board the Enola Gay The atomic scientist who arms the bomb in mid air equipped with a screwdriver and a spanner The Japanese student desperately searching for his lover in the ruins of the city The doctor forced to treat thousands of burnt bodies with only soy bean oil and wet leaves Combining a rich array of sources with brilliant storytelling Stephen Walker grippingly charts the defining event of the 20th century on its 60th anniversary      **Shockwave** Stephen Walker, 2023-11-21 A riveting minute by minute account of the World War II bombing of Hiroshima from early testing to the cataclysmic event and its aftermath On a quiet Monday morning in August 1945 a five ton bomb dubbed Little Boy by its creators was dropped from an American plane onto the Japanese city of Hiroshima On that day a firestorm of previously unimagined power was unleashed on a vibrant metropolis of 300 000 people leaving one third of its population dead its buildings and landmarks incinerated It was the terrifying dawn of the Atomic Age spawning decades of paranoia mistrust and a widespread and very real fear of the potential annihilation of humanity Author Stephen Walker brilliantly recreates the three terrible weeks leading up to the wartime detonation of the atomic bomb from the first successful test in the New Mexico desert to the cataclysm and its aftermath presenting the story through the eyes of the pilots scientists civilian victims and world leaders who stood at the center of earth shattering drama It is a startling moving frightening and remarkable portrait of an extraordinary event a shockwave whose repercussions can be felt to this very day      The Atomic Bombings of Hiroshima and Nagasaki Sylvia Engdahl, 2011-11-03 This volume provides a brief overview of the major factors that contributed to the dropping of atomic bombs on the Japanese cities of Hiroshima and Nagasaki While this volume offers a solid background it also offers something readers will never forget compelling first hand accounts of the event Readers will hear from a Japanese peace activist who was eight years old at the time Hiroshima was bombed She tells how she and her family emerged from the rubble of their collapsed house about the hardships that followed and how she later became ill with radiation sickness Essays are compiled from a variety of sources and are carefully edited and introduced to provide context for readers unfamiliar with this event      **The Hiroshima Men** Iain MacGregor, 2025-07-08 At 8 15 a m on August 6th 1945 the Japanese port city of Hiroshima was struck by the world s first atomic bomb Built in the US by the top secret Manhattan Project and delivered by a B 29 Superfortress a revolutionary long range bomber the weapon destroyed large swaths of the city instantly killing tens of

thousands The world would never be the same again The Hiroshima Men s unique narrative recounts the decade long journey towards this first atomic attack It charts the race for nuclear technology before and during the Second World War as the allies fought the axis powers in Europe North Africa China and across the vastness of the Pacific and is seen through the experiences of several key characters General Leslie Groves leader of the Manhattan Project alongside Robert Oppenheimer pioneering Army Air Force bomber pilot Colonel Paul Tibbetts II the mayor of Hiroshima Senkichi Awaya who would die alongside over eighty thousand of his fellow citizens and Pulitzer Prize winning novelist John Hersey who travelled to post war Japan to expose the devastation the bomb had inflicted upon the city and in a historic New Yorker article described in unflinching detail the dangers posed by its deadly after effect radiation poisoning This thrilling account takes the reader from the corridors of power in the White House and the Pentagon to the test sites of New Mexico from the air war above Germany to the Potsdam Conference of Truman Churchill and Stalin to the savage reconquest of the Pacific to the deadly firebombing air raids across the Japanese islands The Hiroshima Men also includes Japanese perspectives a vital aspect often missing from Western narratives to complete MacGregor s nuanced deeply human account of the bombing s meaning and aftermath Provided by publisher *Hiroshima Nagasaki* Paul Ham,2014-08-05 A history and analysis of the WWII nuclear bombings of Japan from a master of engrossing and exciting narrative Los Angeles Review of Books In this harrowing history of the Hiroshima and Nagasaki bombings Paul Ham argues against the use of nuclear weapons drawing on extensive research and hundreds of interviews to prove that the bombings had little impact on the eventual outcome of the Pacific War More than 100 000 people were killed instantly by the atomic bombs mostly women children and the elderly Many hundreds of thousands more succumbed to their horrific injuries later or slowly perished of radiation related sickness Yet American leaders claimed the bombs were our least abhorrent choice and still today most people believe they ended the Pacific War and saved millions of American and Japanese lives In this gripping narrative Ham demonstrates convincingly that misunderstandings and nationalist fury on both sides led to the use of the bombs Ham also gives powerful witness to its destruction through the eyes of eighty survivors from twelve year olds forced to work in war factories to wives and children who faced the holocaust alone Hiroshima Nagasaki presents the grisly unadorned truth about the bombings blurred for so long by postwar propaganda and transforms our understanding of one of the defining events of the twentieth century Praise for Hiroshima Nagasaki Moral anger drives Mr Ham Ordinary Japanese Mr Ham believes were less emperor worshipping fanatics than victims of an authoritarian elite that prolonged the war with no regard for their hardships The Wall Street Journal Ham presents a forceful argument that the bombing was excessive and unjustified In this sweeping and comprehensive history Ham details the geopolitical considerations and huge egos behind evolving theories of warfare But most powerful are the eyewitness accounts of 80 survivors ordinary people caught up in the events of war Booklist starred review **The Unfinished Atomic Bomb** Cassandra Atherton,David Lowe,Alyson Miller,2017-12-26 In its diversity of

perspectives The Unfinished Atomic Bomb Shadows and Reflections is testament to the ways in which contemplations of the A bomb are endlessly shifting rarely fixed on the same point or perspective The compilation of this book is significant in this regard offering Japanese American Australian and European perspectives In doing so the essays here represent a complex series of interpretations of the bombing of Hiroshima and its implications both for history and for the present day From Kuznick s extensive biographical account of the Hiroshima bomb pilot Paul Tibbets and contentious questions about the moral and strategic efficacy of dropping the A bomb and how that has resonated through time to Jacobs reflections on the different ways in which Hiroshima and its memorialization are experienced today each chapter considers how this moment in time emerges persistently in public and cultural consciousness The discussions here are often difficult sometimes controversial and at times oppositional reflecting the characteristics of A bomb scholarship more broadly The aim is to explore the various ways in which Hiroshima is remembered but also to consider the ongoing legacy and impact of atomic warfare the reverberations of which remain powerfully felt

*Armageddon Postponed* Theodore Caplow, 2010-05-17 In the closing days of World War II scientists working for the U S government invented nuclear explosives by splitting the atoms of heavy metals Germany had already surrendered but the United States and its allies remained at war with Japan In the summer of 1945 the Japanese city of Hiroshima was flattened by a single nuclear bomb A second bombing occurred just a few days later decimating the city of Nagasaki These were the first nuclear weapons ever used in war And so far they are the last Since then tens of thousands of nuclear weapons have been manufactured and deployed by governments around the world Many of these weapons are much more powerful than the atomic bombs that destroyed the two Japanese cities None have been used so far and the absence of nuclear war among nations armed to the teeth with nuclear weapons is a great mystery While the threat of a nuclear attack on the United States has receded the possibility of a nuclear attack on an American city by terrorists has taken its place in our official nightmares So far no terrorist group has made a serious effort to buy steal or build a nuclear weapon The absence of nuclear terrorism in a world swarming with fanatical terrorists is another great mystery The slippery slope to a nuclear Armageddon has been present for more than sixty years In secure locations in Washington Moscow Beijing London and Paris there are buttons to push than could put an end to human civilization but these buttons have never been pushed Why not What has so far kept us safe from these mortal dangers Those are the questions that Caplow asks and answers in *Armageddon Postponed*

**Command and Control** Eric Schlosser, 2014-08-26 The Oscar shortlisted documentary *Command and Control* directed by Robert Kenner finds its origins in Eric Schlosser s book and continues to explore the little known history of the management and safety concerns of America s nuclear arsenal A devastatingly lucid and detailed new history of nuclear weapons in the U S Fascinating Lev Grossman TIME Magazine Perilous and gripping Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety San Francisco Chronicle A myth shattering expos of America s nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America s nuclear arsenal A groundbreaking account of accidents near misses extraordinary heroism and technological breakthroughs *Command and Control* explores the dilemma that has existed since

the dawn of the nuclear age How do you deploy weapons of mass destruction without being destroyed by them That question has never been resolved and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind While the harms of global warming increasingly dominate the news the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten Written with the vibrancy of a first rate thriller Command and Control interweaves the minute by minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years It depicts the urgent effort by American scientists policy makers and military officers to ensure that nuclear weapons can t be stolen sabotaged used without permission or detonated inadvertently Schlosser also looks at the Cold War from a new perspective offering history from the ground up telling the stories of bomber pilots missile commanders maintenance crews and other ordinary servicemen who risked their lives to avert a nuclear holocaust At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus Arkansas to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons Command and Control takes readers into a terrifying but fascinating world that until now has been largely hidden from view Through the details of a single accident Schlosser illustrates how an unlikely event can become unavoidable how small risks can have terrible consequences and how the most brilliant minds in the nation can only provide us with an illusion of control Audacious gripping and unforgettable Command and Control is a tour de force of investigative journalism an eye opening look at the dangers of America s nuclear age Atomic Bomb Island Don A. Farrell, 2021-01-15 Atomic Bomb Island tells the story of an elite top secret team of sailors airmen scientists technicians and engineers who came to Tinian in the Marianas in the middle of 1945 to prepare the island for delivery of the atomic bombs then being developed in New Mexico to finalize the designs of the bombs themselves and to launch the missions that would unleash hell on Japan Almost exactly a year before the atomic bombs were dropped strategically important Tinian was captured by Marines because it was only 1 500 miles from Japan and its terrain afforded ideal runways from which the new B 29 bombers could pound Japan In the months that followed the U S turned virtually all of Tinian into a giant airbase with streets named after those of Manhattan Island a Marianas city where the bombs could be assembled the heavily laden B 29s could be launched and the Manhattan Project scientists could do their last work Don Farrell has done this story incredible justice for the 75th anniversary The book is a thoroughly researched beautifully illustrated mosaic of the final phase of the Manhattan Project from the Battle of Tinian and the USS Indianapolis to Hiroshima and Nagasaki **The First War of Physics** Jim Baggott, 2011-08-15 An epic story of science and technology at the very limits of human understanding the monumental race to build the first atomic weapons Rich in personality action confrontation and deception The First War of Physics is the first fully realized popular account of the race to build humankind s most destructive weapon The book draws on declassified material such as MI6 s Farm Hall

transcripts coded soviet messages cracked by American cryptographers in the Venona project and interpretations by Russian scholars of documents from the soviet archives Jim Baggott weaves these threads into a dramatic narrative that spans ten historic years from the discovery of nuclear fission in 1939 to the aftermath of Joe 1 August 1949 s first Soviet atomic bomb test Why did physicists persist in developing the atomic bomb despite the devastation that it could bring Why despite having a clear head start did Hitler s physicists fail Could the soviets have developed the bomb without spies like Klaus Fuchs or Donald Maclean Did the allies really plot to assassinate a key member of the German bomb program Did the physicists knowingly inspire the arms race The First War of Physics is a grand and frightening story of scientific ambition intrigue and genius a tale barely believable as fiction which just happens to be historical fact [In a Flash](#) Donna Jo Napoli,2021-01-05 A riveting and dramatic story of two devoted sisters Italian citizens who must survive in WWII Japan In 1940 when Simona is eight and her sister Carolina is five their father becomes the cook to the Italian ambassador to Japan and the family leaves Italy for Tokyo The girls learn perfect Japanese make friends and begin to love life in their new home But soon Japan is engaged in a world war In 1943 when all Italians in Japan are confined to internment camps as enemy aliens Pap and the girls are forced to part and Simona and Carolina embark on a dramatic journey Anyone who aids them could be arrested for treason All the sisters have is each other their wits courage and resilience and the hope that they will find people who see them not as the enemy but simply as children trying to survive In this gripping deeply moving story Donna Jo Napoli gives readers an unforgettable and authentic new perspective on World War II *Weapons of Mass Destruction* Michael Kort,2010 Presents a guide to the issues of weapons of mass destruction including definitions primary sources case studies research tools organizations and notable persons [Nuclear Dawn](#) James P. Delgado,2011-12-20 The obliteration of Hiroshima and Nagasaki in August 1945 brought the world to a stand still This unimaginable shock confirmed to the world that the race to develop a working atomic weapon during World War II had been won by the American led international effort Horrific and controversial even today these first uses of the atomic bomb had intense ramifications not only on the continued development of the bomb but also on politics and popular culture As well as the technological development historian James Delgado also examines how the US Army Air Force had to develop the capacity to deliver the weapons and examines the sites where development and testing took place in order to give a comprehensive history of the dawning of the nuclear age

*Constructivism and the New Social Studies* Geoffrey Scheurman,Ronald W. Evans,2018-07-01 The New Social Studies refers to a flurry of academic and commercial activity during the 1960s and 1970s that resulted in the mass development and dissemination of revolutionary classroom materials and teacher resources In science as well as social studies a spirit of inquiry based teaching filled the air during this time resulting in the development of curricula that were both pedagogically innovative and intellectually rigorous Constructivism and the New Social Studies contains a collection of classic lessons from some of the most successful projects of the era providing a resource of exceptional ideas and materials that have stood the

test of time These revealing artifacts are presented with commentaries from some of the original directors of major projects including Edwin Fenton Barry Beyer and Suzanne Helburn In addition to American and World History groundbreaking lessons are represented in Economics Government Sociology and Geography including the Public Issues Series Fred Newann The Amherst History Project Richard Brown and Geoffrey Scheurman and Teaching American History The Quest for Relevancy Allan Kownslar Gerald Ponder and Geneva Gay and Man A Course of Study Peter Dow With a Foreword by Jerome Bruner the volume not only provides a resource of exceptional curriculum ideas and actual materials it also builds a lucid bridge between the theoretical ideas of constructivism and the pedagogical principles of inquiry learning With over 50 years of expertise from curriculum history and social studies pedagogy the editors make the case that guided inquiry as presented in these projects was constructivist by design offering a range of instructional methods that begin with questions rather than answers and considers progress in terms of the development of analytical skills and experimental habits of mind rather than the mere acquisition of knowledge Projects developed during the New Social Studies serve as both an interesting historical archive of powerful curricular innovations as well as a treasure trove of actual lessons and materials still useful in social studies classrooms striving to become more constructivist The lessons and other materials we chose should be relevant if you are an historian researcher theorist or teacher of any subject but it will be especially significant if you are interested in the nature of social civic or historical literacy in America including how to teach for authentic achievement in those areas
