From Hand to Mouth Michael C. Corballis,2020-11-10 A groundbreaking theory of how language arose from primate gestures It is often said that speech is what distinguishes us from other animals But are we all talk What if language was bequeathed to us not by word of mouth but as a hand me down The notion that language evolved not from animal cries but from manual and facial gestures that for most of human history actions have spoken louder than words has been around since Condillac But never before has anyone developed a full fledged theory of how why and with what effects language evolved from a gestural system to the spoken word Marshaling far flung evidence from anthropology animal behavior neurology molecular biology anatomy linguistics and evolutionary psychology Michael Corballis makes the case that language developed with the emergence of Homo sapiens from primate gestures to a

true signed language complete with grammar and syntax and at best punctuated with grunts and other vocalizations While vocal utterance played an increasingly important complementary role autonomous speech did not appear until about 50 000 years ago much later than generally believed Bringing in significant new evidence to bolster what has been a minority view Corballis goes beyond earlier supporters of a gestural theory by suggesting why speech eventually but not completely supplanted gesture He then uses this milestone to account for the artistic explosion and demographic triumph of the particular group of Homo sapiens from whom we are descended And he asserts that speech like written language was a cultural invention and not a biological fait accompli Writing with wit and eloquence Corballis makes nimble reference to literature mythology natural history sports and contemporary politics as he explains in fascinating detail what we now know about such varied subjects as early hominid evolution modern signed languages and the causes of left handedness From Hand to Mouth will have scholars and laymen alike talking and sometimes gesturing for years to come **The Sciences**

Relativism and Reality Robert Kirk,2012-10-12 Our thoughts about the world are clearly influenced by such things as point of view temperament past experience and culture However some thinkers go much further and argue that everything that exists depends on us arguing that even reality is relative Can we accept such a claim in the face of events such as floods and other natural disasters or events seemingly beyond our control Realists argue that reality is independent of our thinking Relativists disagree arguing that what there is depends on our point of view Which is right Robert Kirk provides a crystal clear account of this debate from the Greek philosophers to Wittgenstein and Rorty Along the way he unpacks some of the more complicated issues surrounding ideas of objectivity subjectivity pragmatism and realism essential for those beginning any study of philosophy **Applied Intermediate Macroeconomics** Kevin D. Hoover,2012 A complete course in applied macroeconomics at the intermediate level that emphasizes the application of economic theory to real world data and policy

The Economics of Feasible Socialism Alec Nove, 2013-11-05 The first part of *The Economics of Feasible Socialism* demonstrates why Marx's theories provide no guide to the issues that must face economists under any realistically conceivable Socialism. The experience of communist ruled countries especially the former Soviet Union is often negative economic inefficiency bureaucracy despotism. The causes of these defects and possible remedies and reforms are discussed. The problems of transition in the context of Western industrialized countries and of developing countries is also examined with particular attention centred on the errors of economic policy in Chile and China amongst other countries. **Cognition, Content, and the a Priori** Robert Hanna, 2015 Robert Hanna works out a unified contemporary Kantian theory of rational human cognition and knowledge which develops new lines of thought in philosophy of perception. Along the way he provides original accounts of intentionality sense perception and perceptual knowledge the analytic synthetic distinction the nature of logic and the a priori. *Science for Humans* Robert Hanna, 2024-06-24 This book presents and defends an original and paradigm shifting conception of formal science natural science and the natural universe alike that's fully pro science but at the same time neither theological or God centered nor solipsistic or self centered nor communitarian or social institution centered nor scientistic or science valorizing nor materialist physicalist or reductive nor above all mechanistic. It does this by presenting and defending what Robert Hanna calls the neo organicist turn including manifest realism and the three sub parts of metaphysical organicism liberal naturalism mind life continuity and explanatory inversion whereby mechanical systems are explained by grounding them in organic systems and not the other way around. Or more briefly and simply put the purpose of this book is to present and defend science for humans. As such it will be highly interesting and profoundly relevant to graduate students and specialist researchers in philosophy and the formal natural sciences. Bad Juliet Giles Blunt, 2025-08-05 At a tuberculosis sanitarium in the Adirondacks a young tutor falls in love with a mysterious woman who survived the Lusitania disaster. *Bad Juliet* will hold you in its grip from its opening pages combining the pacing and twists of a thriller with the compelling characterizations and masterful prose of a writer at the top of his form. Nino Ricci award winning author of *The Origin of Species*. Recently jilted by his fiancé Paul Gascoyne takes a job as a tutor to the patients at the Trudeau Sanitarium in upstate New York. There in the icebound beauty of the Adirondack Mountains he finds himself drawn to Sarah Ballard a beautiful but enigmatic young woman traumatized by her past aboard the ill fated ship *Lusitania*. To rouse her out of her gloom Paul encourages her to write a memoir. As Paul reads her words it gradually becomes clear that Sarah's memories are a tangle of truth and fiction that he can't begin to unravel. And yet he cannot overcome his attraction to her. When a terrible relapse leaves Sarah worried that she has little time left she begs Paul to be the one person in the world who will truly know her. **The Insurance Salesman**, 1929 Ideas and Art in Asian Civilizations Kenneth R. Stunkel, 2015-05-11 This work covers topics related to the exercise of influence by individuals and groups within organizations. It includes an introductory group of articles dealing with the nature of influence processes and power. With more than two thirds fresh

material this new updated edition of *Organizational Influence Processes* provides an overview of the most important scholarly work on topics related to the exercise of influence by individuals and groups within organizations In selecting articles for inclusion the editors were guided by the conviction that the most useful and interesting way to view organizational influence is to take a directional approach that is to consider the process from the perspective of downward lateral and upward influence They have organized the readings around this framework preceded by an introductory group of articles dealing more generally with the nature of influence processes and power The book includes both classic readings and the latest cutting edge research from some of the most respected experts writing in the field It will be equally useful for any upper level undergraduate or graduate course concerned with organizational behavior group behavior leadership or power and politics

Annotating Modernism Amanda Golden, 2020-05-04 Making extensive use of archival materials by Sylvia Plath John Berryman and Anne Sexton Amanda Golden reframes the relationship between modernism and midcentury poetry While Golden situates her book among other materialist histories of modernism she moves beyond the examination of published works to address poets annotations in their personal copies of modernist texts A consideration of the dynamics of literary influence *Annotating Modernism* analyzes the teaching strategies of midcentury poets and the ways they read modernists like T S Eliot James Joyce Ezra Pound Virginia Woolf and W B Yeats Situated within a larger rethinking of modernism Golden s study illustrates the role of midcentury poets in shaping modernist discourse

Institutions of Law Neil MacCormick, 2007-01-11 *Institutions of Law* offers an original account of the nature of law and legal systems in the contemporary world It provides the definitive statement of Sir Neil MacCormick s well known institutional theory of law defining law as institutional normative order and explaining each of these three terms in depth It attempts to fulfil the need for a twenty first century introduction to legal theory marking a fresh start such as was achieved in the last century by H L A Hart s *The Concept of Law* It is written with a view to elucidating law legal concepts and legal institutions in a manner that takes account of current scholarly controversies but does not get bogged down in them It shows how law relates to the state and civil society establishing the conditions of social peace and a functioning economy In so doing it takes account of recent developments in the sociology of law particularly system theory It also seeks to clarify the nature of claims to knowledge of law and thus indicate the possibility of legal studies having a genuinely scientific character It shows that there is an essential value orientation of all work of this kind so that valid analytical jurisprudence not merely need not but cannot be positivist as that term has come to be understood Nevertheless it is explained why law and morality are genuinely distinct by virtue of the positive character of law contrasted with the autonomy that is foundational for morality

Physics and Whitehead Timothy E. Eastman, Hank Keeton, 2012-02-01 Featuring discussions and dialogue by prominent scientists and philosophers this book explores the rich interface of contemporary physics and Whitehead inspired process thought The contributors share the conviction that quantum physics not only corroborates many of Whitehead s philosophical theses but is also illuminated by

them Thus though differing in perspective or emphasis the contributions by Geoffrey Chew David Finkelstein Henry Stapp and other scientists conceptually dovetail with those of Philip Clayton Jorge Nobo Yutaka Tanaka and other process philosophers
