Taylor, 2019-08-08 A study of popular politics in pre industrial Britain *The Bakers of Paris and the Bread Question, 1700-1775* Steven L. Kaplan, 1996-06-19 Because the bakers and their bread were central to Parisian daily life Kaplan's study is also a comprehensive meditation on

an entire society its government and its capacity to endure *Urban Liberalism in Imperial Germany* Jan Palmowski, 1999-05-13 Debates about Liberalism in imperial Germany have focused almost exclusively on the national level This book investigates liberal politics in local government the only sphere in which liberals had direct access to power throughout Germany Through the study of one of Germany's most progressive cities Frankfurt am Main Jan Palmowski examines more generally the processes of politicization and policy formulation at the local level He argues that in Frankfurt as elsewhere local affairs had become politicized not around 1900 as is generally assumed but by the 1870s Once in power the liberals concern for religion social policy and education as well as their skilful use of fiscal policy shows that liberals in Germany were as sophisticated as liberals in Britain or France Even in the face of an authoritarian state structure German liberals received and made use of freedom for renewal and reform German liberalism was not inherently weak Instead the crucial problem lay in the country's complicated federal structure which made it impossible to transfer innovations from the local level to the state and national levels *Feeding the Victorian City* Roger Scola, 1992 **Urban Governance** Robert J. Morris, Richard H. Trainor, 2017-07-05 This is a coherent and integrated set of essays around the theme of governance addressing a wide range of questions on the organisation and legitimation of authority At the heart of the book is a set of topics which have long attracted the attention of urbanists and urban historians all over the world the growth and reform of urban local government local centre relationships public health and pollution local government finance the nature of local social elites and of participation in local government Approaching these topics through the concept of governance not only raises a series of new questions but also extends the scope of enquiry for the historian seeking to understand towns and cities all over the world in a period of rapid change Questions of governance must be central to a variety of enquiries into the nature of the urban place There are questions about the setting of agendas about when a localised or neighbourhood issue becomes a big city or even national political issue about what makes a problem Public health and related matters form a central part of the issues especially for the British in North America fire and the development of urban real estate have dominated in India the security of the colonial government had a prominent place The historical dynamic of these essays follows the change from the chartered governments of the seventeenth and eighteenth centuries towards the representative regimes of the nineteenth and twentieth However such historical change is not regarded as inevitable and the effects of bureaucratic growth regulatory regimes the legitimating role of rational and scientific knowledge as well as the innovative use of ritual and space are all dealt with at length **The Cambridge Urban History of Britain** Peter Clark, David Michael Palliser, Martin J. Daunton, 2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century
