*A Double-Edged Sword* Brenda E. Novack, 2014-05-19 On first consideration one might not be inclined to view Adolf Hitler and Dietrich Bonhoeffer in relation to Jehanne d Arc Joan of Arc but Brenda E Novack does just that She demonstrates how these three prominent figures who influenced world history all acted in accordance with what they claimed or perceived to be divine sanction of their participation in violence Taking the reader on a unique exploration of their lives and deaths Novack identifies significant similarities and differences in notions of divine call and human response conveyed by these personalities and determines how they align or fail to align with the biblical prophetic tradition Taking Jehanne d Arc as her foundational study the author engages important theological issues such as the nature of revelation evil and morality The process culminates in the construction of a model of righteous warfare and human agency presented as a tool for evaluating claims to divinely sanctioned violence and as a potentially effective

alternative to an outmoded and currently inadequate just war model Case studies of Hitler and Bonhoeffer tentatively establish the model's ability to steer humanity away from unnecessary destruction toward justice compassion and peace

Computing Our Way to Paradise? Robert Rattle, 2010 Rattle's new book challenges key assumptions concerning the role of Internet and communication technologies ICTs in globalization processes The author argues that while globalization is predicated upon a strong extensive and interconnected global ICT network of products processes and services the real environmental and health benefits remain far from certain ICTs have been promoted as the next economic wave with the potential to generate jobs wealth and prosperity to surpass that of the industrial era It is assumed the environmental impacts will be negligible or even beneficial in this shift towards a service economy Rattle investigates these current and expected trends in ICTs and their potential contribution to sustainable development His book is an indispensable overview for researchers and instructors in globalization Internet communication technologies and environmental anthropology or sociology as well as a resource for policy makers in environmental protection sustainable development sustainable consumption and the social role of science and technology sustainable consumption and the social role of science and technology sustainable consumption and the social role of science and technology *University of Toronto*, *Global Education in Bioethics* Henk ten Have, 2018-06-14 This book presents and elaborates on how the teaching of global ethics in healthcare contributes to furthering ideals of cosmopolitanism solidarity equality respect for differences and concern with what human beings and specifically patients have in common regardless of where they live and who they are Global problems such as pandemic diseases disasters lack of care and medication homelessness and displacement call for global responses The new area of global bioethics is providing answers by arguing that ethical discourse should first of all criticize the structures of violence and injustice that underlie many threats to global health Education of health professionals should articulate that they are citizens of the world like their patients This book first demonstrates that a moral vision of global education is necessary to gain a global dimension It is argued that a global framework of ethical principles is available the challenge is to elaborate and specify that framework into specific educational approaches and models The book subsequently analyzes goals and challenges of global education in biomedicine and healthcare It is shown how such challenges e.g. inequities and cultural differences can be overcome Finally the book presents concrete examples cases methods and practices of global education in bioethics The unique feature of the book is that it addresses global education challenges specifically in the area of healthcare medicine and medical science It combines two areas of research and experience that are usually not connected global bioethics and global education This book is written for all those involved in global ethics teaching in medicine nursing ethics philosophy law and theology courses
