A short history of breast cancer D. de

Moulin,2012-12-06 The Third Breast Cancer Working Conference of the Breast Cancer Cooperative Group of the European Organization for Research on Treatment of Cancer to be held in Amsterdam on April 27 29 1983 was the principle motive for writing this book It was felt that a short review of the main pathogenetic conceptions and therapeutic principles which have presented themselves with regard to mammary cancer in the course of Western history might help to draw a more complete picture of where we stand today It is not easy to decide which ideas although discarded deserve yet to be remembered and which authors from the past may be considered to be truly representative of the scientific climate of their age Twenty

centuries have produced quite a lot of ideas and the number of medical authors who advanced or rejected or modified or revived them is really uncountable So the historian has to make a selection and choices are perforce subjective and open to criticism In writing this book I tried to consult original sources in the original language as much as possible These sources were not always strictly medical since I aimed at placing the problem of malignant breast disease which might serve as a paradigm of cancer in general in a somewhat wider context For the history of medicine is not only a history of ideas but also that of people of institutions of society

A Short History of the Phoenicians Mark Woolmer, 2017-04-30 The Phoenicians present a tantalizing face to the ancient historian Latin sources suggest they once had an extensive literature of history law philosophy and religion but all now is lost Offering new insights based on recent archaeological discoveries in their heartland of modern day Lebanon Mark Woolmer presents a fresh appraisal of this fascinating yet elusive Semitic people Discussing material culture language and alphabet religion including sacred prostitution of women and boys to the goddess Astarte funerary custom and trade and expansion into the Punic west he explores Phoenicia in all its paradoxical complexity Viewed in antiquity as sage scribes and intrepid mariners who pushed back the boundaries of the known world and as skilled engineers who built monumental harbour cities like Tyre and Sidon the Phoenicians were also considered especially by their rivals the Romans to be profiteers cruelly trading in human lives The author shows them above all to have been masters of the sea this was a civilization that circumnavigated Africa two thousand years before Vasco da Gama did it in 1498
