defended his PhD thesis at the University of Münster in 2015. He currently works as a research associate at the German Police University.

From Loose to Tight Management Elke Weyer, 2017-10-10 Elke Weyer sheds light on the question why after more than three decades of higher education reforms in some countries it is still not clear whether the reforms have achieved their stated goals, i.e. to create autonomous universities that meet political expectations. By back-casting real-life decision-making processes, the author reconstructs how different types of actors influenced the academic governance of higher education institutions in the context of these reforms. This approach highlights how numerous changes in governance and organisation affect the relationships between actors and how they promote their interests.

Efficient Linear and Nonlinear Feature Extraction and Its Application to Fingerprint Classification Cheong Hee Park, 2004

The Netherlands in a European Perspective Netherlands. Sociaal en Cultureel Planbureau, 2001 How does The Netherlands compare with the other members of the European family? This issue of the Social and Cultural Report is devoted chiefly to answering that question. From how long we can expect to live to how much television we watch, from having the most part-time jobs to the least number of detached houses, the report portrays Dutch society and policy in a great variety of aspects, including demography, economy, public administration, public participation, and public opinion, health care, social security, education, and leisure. The international comparison is largely limited to members of the EU but sometimes includes other Western countries as well. Quite a number of family resemblances come to light. The Netherlands shares most of its trends and problems with other European welfare states. Yet some contemporary issues have taken on a distinctive profile in The Netherlands, and these have been given special attention in this report.
