The Europeanization of British Politics I. Bache, A. Jordan, 2006-08-03 This is a unique book length accounts of the domestic impact of EU membership Drawing on expert contributions this volume provides a state of the art account of how membership has affected the institutions of central devolved and local governance the activities of organized interests and major areas of public policy

The State of the European Union Maria Green Cowles, Michael Smith, 2000-12-21 With the introduction of a single currency in 1999 and the negotiations for the fifth enlargement in 2000 the European Union is at a major crossroads in its history While the adoption of EMU and the entrance of new member states hold the promise of creating an ever close union they must take place in a rather turbulent environment Exogenous shocks such as the Asian financial crisis the Russian upheaval and new Balkan problems threaten to derail advances in monetary affairs and common foreign and security policy Endogenous resistance to further European policy reform in areas such as the budget CAP and structural funds has strengthened as suggested by the meagre advances in the Amsterdam Treaty Indeed domestic developments including changes in the political

composition of leading governments and growing unemployment pose further challenges to EU reforms. With contributions from leading scholars, the book examines the European Union in a theoretically informed, empirically grounded manner. The book begins by exploring the evolving nature of the European polity and its capacity for change. The second section on monetary union examines the conditions under which EMU will challenge integration, the viability of the European Central Bank, as well as the ability of European citizens to adjust to the single currency. The third section investigates why member states agreed to the Eastern enlargement and what internal and external challenges face the Union as a result. The fourth section highlights the institutional upheavals underway in the major European institutions, as well as Europeans' support of and identify with the European polity. The final section of the book highlights the extent to which the European Union is able to govern in key policy areas: trade, environment, common foreign and security policy, and development, given the state of the European Union today. This is the fifth volume in the biannual series *State of the European Union* produced under the auspices of the American European Community Studies Association (ECSA).

The Political Influence of Business in the European Union Andreas Dur, David Marshall, Patrick Bernhagen, 2019-02-28 Many citizens, politicians, and political activists voice concern about the political influence of business in the European Union. But do business interests really pull the strings in Brussels? Contrary to expectations, this book shows that business interests are no more influential than other interests in shaping contemporary EU policies. Andreas Dur, David Marshall, and Patrick Bernhagen present an original argument that stresses the role of public actors in facilitating or impeding interest groups' lobbying success. Novel data on a large number of legislative proposals on the EU's agenda and three case studies present strong support for this argument. *The Political Influence of Business in the European Union* offers new insights into how lobbying success depends on the demand and supply of information, as well as new ideas on how to measure lobbying success. The book advances a fresh perspective on the question of business power and shows why business interests often lose in the policy struggle.

Politics in the European Union Simon Bulmer, Owen Parker, Ian Bache, Stephen George, Charlotte Burns, 2020 This is an account of the main developments in the process of European integration. It provides coverage of theory, history, member states, institutions, and policies, drawing on academic debates including issues of legitimacy and globalisation.

How to Democratize the European Union...and Why Bother? Philippe C. Schmitter, 2000-04-12 A contradictory creation indeed, the European Union has most of the institutions of a modern democracy yet it does not function as one. Moreover, its growing scope of activity and supranational decision-making processes are undermining the legitimacy of democracy in its member states. Much has been written about this double democratic deficit, but surprisingly little thought has been given to what to do about it—short of drafting and ratifying a new federal constitution. In this provocative book, Philippe C. Schmitter explores both the possibility and the desirability of democratizing the EU. He argues that as a non-state and a non-nation, it will have to invent new forms of citizenship, representation, and decision-making if it is ever to democratize itself. The author also contends that the timing

and political context work against a full scale constitutionalization of the process He proposes a number of modest and some less modest reforms that could improve the situation in the near future and eventually lead to a genuine Euro democracy
