The Russian Economy: A Very Short Introduction Richard Connolly, 2020-07-23 Russia today is as prominent in international affairs as it was at the height of the Cold War Yet the role that the economy plays in supporting Russia's position as a great power on the international stage is poorly understood For many Russia's political influence far exceeds its weight in the global economy However Russia is one of the largest economies in the world it is not only one of the world's most important exporters of oil and gas but also of other natural resources such as diamonds and gold Its status as one of the largest wheat and grain exporters shapes commodity prices across the globe while Russia's enormous arms industry second only to the United States provides it with the means to pursue an increasingly assertive foreign policy All this means that Russia's economy is crucial in serving the country's political objectives both within Russia and across the world Russia today has a distinctly political type of economy that is neither the planned economy of the Soviet era nor a market based economy of the Euro Atlantic variety Instead its economic system is characterised by a unique blend of state and market control and freedom and natural resources alongside human ingenuity The Russian Economy A Very Short Introduction introduces readers to the dimensions of the Russian economy that are often ignored by the media and public figures or exaggerated and misunderstood In doing so it shows how Russia's economy is one of global significance and helps explain why many of Russia's enduring features such as the heavy hand of the state and the emphasis on military industrial production have persisted despite the immense changes that took place after the disintegration of the Soviet Union in 1991

Before Command Paul R. Gregory, 2014-07-14 In a work with significant implications for present day economic reform in the Soviet Union Paul Gregory examines Russian and Soviet economic history prior to the installation of the administrative command system By drawing on basic economic statistics from 1861 to the 1930s Gregory's revisionist account debunks a

number of myths promulgated by historians in both the East and the West He demonstrates that the Russian economy under the tsars performed much better than has previously been supposed the Russian economy and its financial institutions were integrated into the world economy allowing Russia to attract significant foreign capital Furthermore he shows that Stalin's justifications for the abandonment of the New Economic Policy in the late 1920s were incorrect the so called crises of NEP were either fabricated or the result of misguided economic thinking Before Command is the culmination of the author's lifelong study of the economic history of Russia and the Soviet Union In convincing detail it describes little known Russian and Soviet successes with market capitalism while it also shows the problems inherent in a mixed system such as the NEP which seeks to combine very strong elements of command with market resource allocation Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

New Russian Economic History Ekaterina V. Zhuravskaya, S. M. Guriev, Andrei Markevich, 2022 This survey discusses recent developments in the growing literature on the Russian economic history of the 19th and 20th centuries Using novel data and modern empirical methods this research generates new insights and provides important lessons for development economics and political economy We organize the discussion around four strands of this literature First we summarize and put in comparative perspective research on the long term trends in economic development and living standards which shows that throughout history Russia significantly underperformed advanced economies We also compile reliable quantifications of the human cost of Stalin's dictatorship Second we discuss new studies of imperial Russia that partially confirm Gerschenkron's classic conjecture on the institutional explanation for Russia's relatively low level of economic development and on the causes of the revolution The third strand of the literature focuses on the Soviet period and explains its slowdown over time and the eventual collapse of the system by the command economy's inability to provide incentives to individual agents The fourth strand documents the long term economic social and political consequences of large scale historical experiments that took place during both the imperial and the Soviet periods We conclude by discussing the lessons from these four strands of the literature and highlight open questions for future research
