- Russian Word-formation** Charles Edward Townsend, 1975      A Computational Phonology of Russian Peter Chew, 2003  
This dissertation provides a coherent synchronic broad coverage generative phonology of Russian I test the grammar empirically in a number of ways to determine its goodness of fit to Russian In taking this approach I aim to avoid making untested or even incoherent generalizations based on only a handful of examples In most cases the tests show that there are exceptions to the theory but at least we know what the exceptions are a baseline is set against which future theories can be measured and in most cases the percentage of exceptional cases is reduced to below 5% The principal theoretical outcomes of the work are as follows First I show that all of the phonological or morphophonological processes reviewed can be described by a grammar no more powerful than context free Secondly I exploit probabilistic constraints in the syllable structure grammar to explain why constraints on word marginal onsets and codas are weaker than on word internal onsets and codas I argue that the features initial and final and extraprosodicity are unnecessary for this purpose      Russian Root List with a Sketch of Word Formation Charles E. Gribble, 1981      **Diminutives across Languages, Theoretical Frameworks and Linguistic Domains** Stela Manova, Laura Grestenberger, Katharina Korecky-Kröll, 2023-12-18 This volume addresses a number of issues in current morphological theory from the point of view of diminutive formation such as the role of phonology in diminutives and hypocoristics and consequently its place in the overall architecture of grammar i e phonology first versus syntax morphology first theoretical analyses diminutives in the L1 acquisition of typologically diverse languages and the borrowing of non diminutive morphology for the expression of diminutive meanings among others Among the peculiarities of diminutive morphology discussed are the relation between diminutives and mass nouns the avoidance of diminutives in plural contexts in some languages and the relatively frequent semantic bleaching and reanalysis of diminutive forms cross linguistically Special attention is paid to the debate on the head versus modifier status of diminutive affixes corresponding to high versus low diminutives in alternative analyses with data from spoken and sign languages Overall the volume addresses a number of topics that will be of interest to scholars of almost all linguistic subfields and persuasions
