

MINING IN RUSSIA

This infographic explores the current situation of the Russian mining industry and identifies key trends and players that will shape it in the next decade.

Although Russia accounts for about 14% of global mining, most professionals in the industry know very little about Russian mining. Apart from a few large steel companies, most large Russian mining firms are unknown in the market, and few people could name the most important Russian mines or mining districts. However, driven by the huge potential of its reserves and the modernization of its industry the country is slowly gaining a more prominent position on the international mining stage.

In conjunction with **IOPC's Mining Output Optimisation Russia & CIS Summit**, taking place on **25-29 November, 2012** in **St. Petersburg, Russia**, Mining IQ examines key trends of the Russian mining industry.

This three-day summit will bring together Russian & CIS mining industry leaders and cutting-edge technology providers to discuss winning strategies in optimisation of production output in mining.
