

The background of the slide is a collage. On the left, there's a molecular model of a benzene ring with a dashed circle inside, and an isocyanide group (NC) attached to one of the carbons. On the right, there's a glowing lightbulb. Below the lightbulb, there's a molecular model of a complex organic structure with a blue nitrogen atom and a grey carbon atom. In the center, there's a black rectangular box with yellow text.

S-Centered Radicals Zeev B. Alfassi, 1999-03-22 S centered Radicals Edited by Ben Gurion University of the Negev Israel Sulfur containing radicals formed from sulfur emissions from natural sources e g volcanoes power plants and from car exhausts play an important role in our atmosphere In the living cell sulfur constitutes an essential part of the defence against oxidative damage and in the course of this mechanism is transformed into a variety of sulfur free radical species S centered Radicals deals with the organic radicals containing sulfur atoms RS RSO RSO₂ and R₃S and the inorganic radicals SH and SO_x This is the book to bring together all the recent developments of S centered radical chemistry This area is extremely important to organic synthetic chemists and environmentalists S centered radicals are of increasing interest in biochemistry and medicine due to S containing amino acids and S S bonds in proteins Sulfur radicals are also involved in polymer chemistry and photonic materials as well as in radiation protection and nutrition This title is the essential volume for anyone working in sulfur chemistry

Free-Radical-Induced DNA Damage and Its Repair Clemens Sonntag, 2006-03-20 The free radical chemistry of DNA had been discussed in some detail in 1987 in my book *The Chemical Basis of Radiation Biology* Obviously the more recent developments and the concomitant higher level of understanding of mechanistic details are missing Moreover in the living cell free radical DNA damage is not only induced by ionizing radiation but free radical induced DNA damage is a much more general phenomenon It was therefore felt that it is now timely to review our present knowledge of free radical induced DNA damage induced by all conceivable free radical generating sources Originally it had been thought to include also a very important aspect the repair of DNA damage by the cell's various repair enzymes Kevin Prise Cancer Campaign Gray Laboratory London was so kind to agree to write this part However an adequate description of this strongly expanding area would have exceeded the allocated space by much and this section had to be omitted The directors of the Max Planck Institut für Strahlenchemie now MPI für Bioanorganische Chemie Karl Wieghardt and Wolfgang Lubitz kindly allowed me to continue to use its facilities after my retirement in 2001 Notably our librarian Mrs Jutta Theurich and her right hand help Mrs Rosemarie Schreier were most helpful in getting hold of the literature I thank them very much Without their constant help this would have been very difficult indeed [Introduction to Dynamic Spin Chemistry](#) Hisaharu Hayashi, 2004 Readership
