S He Brain Science Sexual Politics And The Myths Of Feminism:

S/He Brain Robert Nadeau, 1996-10-07 During the 1960s Margaret Mead's argument that gender identity is a product of learning in particular cultural contexts was incorporated into the sex gender system in feminist theory In this system sex refers to physiological differences in the body and gender refers to learned sex specific bodies to be viewed as separate and distinct from gender neutral minds In *S He Brain* Nadeau demonstrates that the sex gender system is not some arcane bit of academic jargon that has no impact on our daily lives It is the greatest source of division and conflict in the politics of our sexual lives for a now obvious reason the brains of men and women are not the same and the differences have behavioral consequences Further he argues that an improved understanding of the relationship between sex and gender could enlarge the bases for meaningful dialogue between men and women and lead to new standards for sexual equality that is more realistic and humane than the current standard The individual most responsible for legitimating the modern distinction between sex and gender was the anthropologist Margaret Mead According to the Mead doctrine gender identity is almost entirely a product of learning in different cultural contexts and sex or biological reality is not a determinant of this identity The assumption that gender identity is learned in sexless or gender neutral minds separate and distinct from sex specific bodies legitimated the sex gender system that has been foundational to feminist theory since the mid 1970s In this system sex refers to physiological differences in the domain of the body and gender to learned behavior in the domain of mind Since this two domain distinction obviated the connection between biological reality and gender identity it allowed gender identity to be viewed as scripted or socially constructed by cultural narratives stories myths legends and the like invented by men to control and oppress women In *IS He Brain* R Nadeau demonstrates that the sex gender system is not in accord with biological reality for now obvious reasons the brains of men and women are not the same and the differences have behavioral consequences Yet the intent of the book is to serve the cause of full sexual equality and not to escalate the gender war Nadeau attempts to accomplish this by demonstrating that an improved understanding of the relationship between sex and gender can not only enlarge the bases for meaningful communication between men and women It could also serve as the basis for a new and improved standard of sexual equality that eliminates the grossly unfair treatment of women sanctioned by the current standard

Feminist Psychology Vera Sonja Maass, 2021-12-06 Detailing the field of feminist psychology since its origins this book assesses its early figures theory and research as well as current and emerging theory and research and its associations with general feminist beliefs Feminist psychology developed as a reaction to historical psychological thought initiated by men who controlled the theory and research of the field By holding all of society to norms based in male behavior this so called masculine psychology effectively assigned women lower societal status than men and had disturbing effects on women's health and self esteem Feminist Psychology focuses on gender differences social structure and the values and principles of women's rights within the world's individual social and political spheres Contrary to popular notion feminist psychology does not involve man hating but instead focuses on loving the concept that women have equal potential to set and achieve goals and to contribute to society In this volume psychologist Vera Maass explains the history theory research and current state of this growing field which is becoming increasingly popular as colleges offer majors or concentrations in feminist psychology and argues that women are both different from and equal to men

Women's Vision in Western Literature Laurence M. Porter, 2005-02-28 From ancient Greece through the present day women writers have confronted the male urge to make war

by imagining communities in which intuitive bonding among individuals questions and replaces masculinist values of aggression and competition *Women's Vision in Western Literature* traces the gender gap in literature from 600 B.C. to the present day through an examination of seven extraordinary women writers from Sappho to Christa Wolf. Combining close readings with a comprehensive overview of the careers of these women, Porter shows how the threat, the experience, and the aftermath of war incites them to imagine tolerant, empathic communities. This careful consideration of these seven great writers brings to light an underappreciated aspect of Western women's writing. Starting with Sappho, Porter illustrates this ancient poet's ability to rewrite the Homeric war rhetoric to reflect a non-possessive love experience. Marie de France arranges traditional animal fables to imply an open-ended situation ethics according to the author, and Madame de Staël, in a Europe torn by Napoleonic conquests, advocates cross-cultural unions among countries. In the works of Mary Shelley, we see the warnings of the dangers of vainglorious, soulless technology, and Virginia Woolf depicts intuitive bonding beyond gender stereotypes amid the ruins of war and crumbling empire. He shows how Marguerite Yourcenar dreams of a new era of world peace after Hitler's defeat and how Christa Wolf tries to cope with her country's Nazi past even as she reaffirms European identity threatened by annihilations in nuclear conflict.

Coequal and Counterbalanced John D. Garr, 2013-01-16 God created woman and man so that they would be consubstantial and coequal and that they would manifest perfectly counterbalanced complementarity. The relationship of the two halves of humanity was to be one of love, mutuality, and fulfillment. By recovering the Hebraic understanding of God's blueprint for them both, women and men can finally experience the relationship that God designed to be heaven on earth. *The God Designed Two in One: Coequal Counterbalanced Partnership Designer Fashioned Woman Gender Self Identity and Self Fulfillment Spare Ribs and Afterthoughts Marriage as Heaven on Earth*. Whatever your race, ethnicity, gender, faith, or social status, this book and the other volumes in this series will literally set you free from misconceptions that have long perverted relationships between women and men. As you reconnect with the Hebraic foundations of your faith, you will rediscover God's original design for humanity, and you will come to understand, respect, and honor the different God-designed distinctives, preferences, and roles for women and men that counterbalance and complement each other in mutuality and love.

Language, Eros, Being Elliot R. Wolfson, 2009-08-25 This long awaited magisterial study an unparalleled blend of philosophy poetry and philology draws on theories of sexuality phenomenology comparative religion philological writings on Kabbalah Russian formalism Wittgenstein Rosenzweig William Blake and the very physics of the time space continuum to establish what will surely be a highwater mark in work on Kabbalah Not only a study of texts Language Eros Being is perhaps the fullest confrontation of the body in Jewish studies if not in religious studies as a whole Elliot R Wolfson explores the complex gender symbolism that permeates Kabbalistic literature Focusing on the nexus of asceticism and eroticism he seeks to define the role of symbolic and poetically charged language in the erotically configured visionary imagination of the medieval Kabbalists He demonstrates that the traditional Kabbalistic view of gender was a monolithic and androcentric one in which the feminine was conceived as being derived from the masculine He does not shrink from the negative implications of this doctrine but seeks to make an honest acknowledgment of it as the first step toward the redemption of an ancient wisdom Comparisons with other mystical traditions including those in Christianity Buddhism and Islam are a remarkable feature throughout the book They will make it important well beyond Jewish studies indeed a must for historians of comparative religion in particular of comparative mysticism Praise for Elliot R Wolfson *Through a Speculum That Shines* is an important and provocative contribution to the study of Jewish mysticism by one of the major scholars now working in this field
