From Community to Metropolis Richard McGee Morse,1958 **São Paulo in the Twenty-First Century** Eduardo Cesar Leão Marques,2016-05-20 This book analyzes in detail the main social economic and special transformation of the city of S o Paulo In the last 30 years S o Paulo has become a more heterogeneous and less unequal city Contrary to some expectations the recent economic transformations did not produce social polarization and the localized processes of spaces production and the plural is increasingly important are more and more key to define their respective growth patterns social conditions forms of housing production service availability and urban precariousness In other dimensions however inequalities remain present and strong and certain disadvantaged areas have changed little and are still marked by strong social inequalities The metropolis remains heavily segregated in terms of race and class in a clear hierarchical structure The book shows that it is necessary to escape from dual and polarity interpretations This did not lead to the complete disappearance of a crudely radial and concentric structure not only due to geographic path dependence but superposes other elements over it leading to more complexes and continuous patterns A general summary of these elements could perhaps be stated as pointing to greater social spatial heterogeneity accompanied by smaller but reconfigured inequalities

The São Paulo Law School and the Anti-Vargas Resistance (1938-1945) John W. F. Dulles, 2014-07-03

The São Paulo Law School the oldest institution of higher learning in Brazil has long been the chief training center for that country's leadership For the members of the school's secret Burschenschaft society the training consisted principally in leading demonstrations for liberal causes such as the abolition of slavery and the overthrow of the monarchy During the Old Republic 1889-1930 the Brazilian presidency and other high posts in Rio de Janeiro were usually occupied by alumni of the powerful society while its members in São Paulo continued to agitate for political reform But in the 1920s when they formed the Nationalist League and the Democratic Party schisms resulted Thus the Burschenschaft was weakened before the long rule of Brazil by Getúlio Vargas starting in 1930 brought an end to the society's influence The role of the school in these and other historical events is carefully reviewed by Dulles before he turns to the school's well known resistance to the dictatorship of Vargas That resistance the most persistent confronting the dictator appeared to be unified especially when it provoked the police into shooting the students But as Dulles discovered when interviewing participants and consulting documents and scrapbooks of the early 1940s the movement was characterized by heated internal strife In the end however the idealism and courage of the participants and the ultimate effectiveness of the movement contributed mightily to the fall of Vargas This book is another in Dulles's series of narrative histories in which he gives flesh and blood to the names and breathes life into the events of twentieth century Brazilian politics

This report presents an in depth study of the innovation ecosystem of São Paulo Brazil We use georeferenced patent scientific publication and economic data to characterize one of the few global innovation hotspots in Latin America and the southern hemisphere It attempts to understand what makes São Paulo different from the rest of Brazil and the Latin American region by mapping what its main potentialities and drawbacks are The report finds that São Paulo is rich in scientific activity but lags behind with respect to patent production At the same time it is a patent leader in Brazil and the region with characteristics resembling the large innovation hotspots of the world The report also shows where São Paulo is in the global knowledge space and how it can leverage scientific production and global networks to upgrade into more complex technological activities The report also reviews the main innovation policies at national and subnational level which may
