Bibliografía Sobre Recursos Naturales Renovables , 1983 **La Huella Del Arado** Carlos Enrique Castro Méndez, 2025-02-26 El libro aborda la degradación de tierras cambio de uso del suelo y conflictos territoriales en las sabanas de Brasil Argentina y Colombia impulsados por la globalización y la expansión agrícola A través de un análisis comparativo se exploran los impactos de la agricultura intensiva que ha generado oportunidades económicas pero también crisis ambientales y sociales En Colombia el acuerdo de paz de 2016 ofreció esperanzas para el desarrollo rural pero la expansión agrícola ha aumentado la presión sobre los ecosistemas frágiles El estudio destaca cómo actores clave como los nuevos llaneros han transformado la sabana replicando patrones de degradación observados en Brasil y Argentina El libro profundiza en las tensiones entre desarrollo económico y sostenibilidad ambiental aportando una herramienta técnica para anticipar los efectos de la agricultura **El mínimo vital y la vivienda digna** Álvaro José Henao Mera, 2018-02-01 El presente estudio tiene como objetivo central determinar hasta qué punto la protección ambiental establecida para las áreas del sistema de Parques Nacionales Naturales de Colombia limita los derechos al mínimo vital y el derecho a la vivienda digna especialmente cuando en dichas áreas que abarcan en la actualidad más del 12% del territorio rural de nuestro país habitan en su mayoría comunidades étnicas comunidades campesinas y habitantes rurales que dependen su sustento de los productos otorgados de la tierra y del uso que puedan hacer de ella En consecuencia se presenta un estudio que podrá determinar nuevos alcances en torno a las actividades permitidas al interior de las áreas del Sistema de Parques Nacionales Naturales de Colombia y que fija lineamientos y directrices para la ocupación uso y tenencia de nuestras áreas protegidas del Sistema de Parques Nacionales Naturales de Colombia *Territorios de la agricultura colombiana* Darío Fajardo, 2009-10-01 Territorios de la agricultura colombiana analiza la evolución de la producción agrícola comercial del país en el marco de una exploración teórica sobre los procesos de formación de regiones y territorios Estudia la implantación de los cultivos comerciales en las distintas regiones del país en el marco de las condiciones sociales de cada una de ellas y dentro de las diferentes políticas públicas dirigidas hacia la agricultura y la tierra en particular Las páginas iniciales recorren el marco temporal de referencia comprendido

entre la promulgación de la Ley 135 de 1961 primera propuesta de reforma agraria surgida en el Frente Nacional y la convergencia de la apertura económica con la inserción de Colombia en la economía del narcotráfico. Propuesto este período de estudio el autor plantea sus referentes conceptuales centrados en la comprensión de los procesos de construcción social del espacio. La secuencia nos conduce a una caracterización del panorama actual de la agricultura colombiana sus tendencias y las condiciones del reparto agrario temas que tienen luego desarrollo en la búsqueda de sus relaciones con los distintos alcances de las políticas planteadas por los sucesivos gobiernos. El análisis se alinea como el afianzamiento del sector empresarial en el marco de las políticas generadas por su acentuada representación en el Estado genera cambios profundos en las condiciones de acceso a la tierra de las distintas comunidades campesinas. Estos procesos asociados de manera persistente al ejercicio de la violencia profundizan los desequilibrios sociales y políticos que afectan a las poblaciones rurales y el marginamiento al que estas son sometidas no encuentra compensación en los sucesos del reparto agrario. A su vez los desequilibrios generados se transformaron en la cuna de un nuevo factor de conflicto representado en la incorporación de Colombia en la economía del narcotráfico. La expansión de la agricultura comercial en los marcos de la apropiación monopólica de la tierra y la exclusión de los campesinos y demás trabajadores agrarios se convierte en motor del destierro masivo de las poblaciones rurales. El destino de los desposeídos es sumarse a una oferta de mano de obra que no encuentra posibilidades en los mercados de trabajo urbano y engrosar el creciente mundo de la pobreza y la indigencia. Este recorrido por el avasallador modelo agrario en marcha concluye con un conjunto de propuestas encaminadas a buscarle un rumbo diferente al país orientado a construir el bienestar de la población colombiana su seguridad y soberanía alimentarias la generación de empleos e ingresos la estabilidad de las comunidades y la protección del patrimonio ambiental en condiciones democráticas y de respeto a los derechos humanos.

Diario Oficial Colombia, 1982, **Ecología** Guillermo Briceño, 2023-02-17

HACE mucho que los problemas ecológicos han alcanzado una dimensión global la contaminación de la atmósfera y de las entidades físicas la destrucción de la capa de ozono el efecto invernadero el cambio climático la sobrepesca en los océanos la superpoblación humana y un largo etcétera. Entonces por qué centrarse ahora en el neotrópico. Sencillamente porque es uno de los últimos bastiones de ecosistemas y de biodiversidad que queda en pie tras la codicia del extractivismo mundial.

Un pasado vivo Varios Autores, 2017-07-01

Ecotones Between Forest and Grassland Randall W. Myser, 2012-07-10

Ecotones are dynamic overlapping boundary areas where major terrestrial biomes meet. As past studies have shown and as the chapters in this book will illustrate their structure size and scope have changed considerably over the millennia expanding and shrinking as climate and/or other driving conditions also changed. Today however many of them are changing at a rate not seen for a long time perhaps largely due to climate change and other human induced factors. Indeed ecotones are more sensitive to climate change than the biomes on either side and thus may serve as critical early indicators of future climate change. As ecotones change they also redefine the limits of the biomes on either side by altering their distributions of species because in addition to their own endemic species any ecotone will also have species from both adjoining biomes. Consequently they may also be places of high levels of species interaction serving as active evolutionary laboratories which generate new species that then migrate back into adjacent biomes.

Ecotones Between Forest and Grassland explores how these ecotones have changed in the past how they are changing today and how they are likely to change in the future. The book includes chapters from around the world with a special focus on South American and Neotropical ecotones.
