Sacred Texts Of The World A Universal Theology:

Sacred Texts of the World Ninian Smart, Richard D. Hecht, 2007 For a contemporary world in which religious belief exercises a more potent some might say more dangerous influence on global events than many would have thought possible a generation ago the nature and interpretation of the core tenets of religious faith has become a matter of compelling and widespread interest both within and outside practising religious communities Each of the 14 chapters of Sacred Texts is devoted to one of the principal religious and other belief systems of humanity both defunct and extant The chapters follow a consistent pattern a short and accessible introduction to the faith in question followed by extracts that clearly illustrate its mythic narratives its spiritual and theological doctrines its central moral teachings its rituals and modes of worship and its mystical traditions Accompanying notes make clear the meanings of all the quoted passages Taken together the extracts provide a rounded and coherent picture of each religious tradition Sacred Texts covers not only Judaism Christianity Islam Hinduism Buddhism Jainism Taoism Confucianism Shintoism and Sikhism but also small scale traditional religions new religions and secular worldviews such as humanism It is an essential reference for those who wish to understand the nature and continuing appeal of religious belief in a globalised multi faith world A Christian Theology of Religions John Hick, 1995-01-01 Renowned theologian and philosopher of religion John Hick takes a hard look at intellectual problems facing Christians in the late twentieth century Where exactly does Christianity fit into the scheme of the world in light of other world religions and Is it possible to remain Christian while accepting the truth of other beliefs Employing the use of a dialogue between Phil philosophy and Grace theology Hick explores the validity of other religions and Christianity s place among them Offering good reasons for why the traditional stance that Christianity is the only true religion is no longer workable he puts forth a cogent defense of Christianity in the global context of other religions This book is must reading for those concerned about the uniqueness of Christianity and how it is to be interpreted theologically in today s world

to provide the global church with knowledge and understanding of the Buddhist world and how to reach it for Christ **Is There a Universal Grammar of Religion?** Henry Rosemont, Huston Smith, 2015-11-08 In this provocative volume two important scholars of religion Huston Smith and Henry Rosemont Jr put forth their viewpoints and share a probing conversation Though the two diverge considerably in their accounts of religious faith and practice they also agree on fundamental points Huston Smith author of the important work *The World's Religions* has long argued for the fundamental equality of the world's religions Describing a universal grammar of religion he argues that fourteen points of similarity exist among all of the major religious traditions and that these similarities indicate an innate psychological affinity for religion within the human spirit As Noam Chomsky has argued that humans are hardwired to use language Smith similarly argues that humans are hardwired for religious experience In response Rosemont explicates his humanistic vision of the world in which the homoversal tendency to contemplate the infinite is part of our co-humanity that endures across time space language and culture Rosemont also elaborates upon Noam Chomsky's theory of universal grammar and its relevance to Smith's ideas about the similarities among religions This insightful exploration of the most essential basis of religion provides a new direction for comparative religion scholars everywhere **The Sacred Books of China**, 1976 *Contemporary Yoga and Sacred Texts* Susanne Scholz, Caroline Vander Stichele, 2024-09-10 This book explores the textual traditions that authorize the history legitimacy and authenticity of today's physical posture practice The volume focuses on why and how yoga communities have adopted various texts that they consider sacred or spiritually meaningful Among the texts discussed are Yogananda's *Autobiography* Sri Aurobindo's *Savitri* Patanjali's *Yoga Sutra* the *Bhagavad Gita* the *Hatha Yoga Pradipika* the *Upanishads* the *Vedas* and the *Yogin Tantra* Famous thinkers included are Aurobindo Yogananda Osho Rajneesh Sogyal Rimpoche Charles Johnston and Howard Thurman Offering a starting point the ten chapters address the nature selection and function of various ancient and contemporary texts read in contemporary yoga settings The attention centers on how and why texts are read and for whom they are read As yoga is practiced in ashrams yoga studios gyms meeting rooms and even private living rooms scholarly approaches to investigate the connections between yoga and texts are necessarily diverse This volume aims to inspire further scholarship on the reading of texts in past and present yoga communities The collection demonstrates that textual traditions deserve to be an important part of contemporary yoga scholarship The volume will therefore be of great interest to scholars of religious studies yoga studies and Asian studies as well as those studying sacred texts **Theological Incorrectness** Jason Slone, 2007-12-03 Why do religious people believe what they shouldn't not what others think they shouldn't believe but things that don't accord with their own avowed religious beliefs D Jason Slone terms this phenomenon theological incorrectness He argues that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously Human minds are great at coming up with innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the

important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't

James Pratt and George Albert Coe In addition to probing the intellectual background and professional context for the emergence of this sub discipline the book examines the development of key concepts and methodologies among psychologists of religion and offers arguments both for the rise of the discipline as well as for its demise in the early decades of the 20th century Religion and Modern Thought Victoria S. Harrison, 2007 Written specifically for level 2 undergraduates this textbook introduces readers to the extremely wide range of forms of religious thought and the responses of religion to modern ideas cultural phenomenon and events of the 20th century

Swami Vivekananda's History of Universal Religion and Its Potential for Global Reconciliation Sister Gayatriprana, 2020-09-01 This book presents in the words of Swami Vivekananda 1863 1902 a history of Vedanta the deep exploration of the inner human world going back to the most ancient rishis or seers whose testimony is still revered in India He traces the tradition up to the beginning of the twentieth century showing how the dynamics of social structures within Vedanta and the appearance from within Vedanta of traditions such as Jainism Buddhism Hinduism and Sikhism influenced and molded the tradition In addition he studies the impact of the Western Abrahamic invasions of India that began around the eleventh century CE These brought to bear on Vedanta a worldview which operated on the assumption that the physical world was the primary reality and that the kind of radical exploration of the inner world embraced by Vedanta was highly suspect and not valid The Vedantic tradition adapted in many different ways producing a variety of philosophical positions that are still extant today Along with these traditions went various forms of yoga or self transformation in Vedanta the key to experiencing the inner meaning of not only philosophy but also of our human condition and of reality itself This tradition presents four contexts of experience chatushpad suggesting the right brain mode of approach as described by Iain McGilchrist 2009 Under the influence of Shri Ramakrishna 1836 1886 Vivekananda gained access to vijñana or a knowledge higher than those classically described and known in the chatushpad Vijñana permitted the acceptance of not only the traditional deeply experiential truths of Vedanta but also of the validity of Western materialism when seen as related to each other on a continuum of consciousness to be traversed by contemporary forms of yoga I see the result as a resolution of right left brain conflict la McGilchrist and thereby a model for universal human understanding conciliation and co operation In my introduction I attempt to show how the whole picture can be related both experientially and conceptually to matrices of consciousness developed in India as far back as the early medieval period A large glossary and index cum concordance indicate the various contexts and depths of thought that emerge from Vivekananda's multi contextual vijñana
