[Tracking Giants](#) Amanda Lewis, 2023-05-30 I learned I laughed I sighed I swooned What an absolutely delightful romp through the forest Kate Harris author of *Lands of Lost Borders* Intimate open hearted A personal introduction to one of the most profoundly alive places on earth John Vaillant author of *The Golden Spruce* A funny deeply relatable book about one woman's quest to track some of the world's biggest trees Amanda Lewis was an overachieving burned out book editor most familiar with trees as dead blocks of paper A dedicated indoorswoman she could barely tell a birch from a beech But that didn't stop her from pledging to visit all of the biggest trees in British Columbia a Canadian province known for its rugged terrain and gigantic trees The Champion trees on Lewis's ambitious list ranged from mighty Western red cedars to towering arbutus They lived on remote islands and at the center of dense forests The only problem Well there were many Climate change and a pandemic aside Lewis's lack of wilderness experience the upsetting reality of old growth logging the ever changing nature of trees and the pressures of her one year timeframe complicated her quest Burned out again and realizing that her checklist approach to life might be the

problem she reframed her search for trees to something humbler and more meaningful getting to know forests in an interconnected way Weaving in insights from writers and artists Lewis uncovers what we really after when we pursue the big things revealing that sometimes it's the smaller joys the mindsets we have and the companions we're with that make us feel more connected to the natural world

The Man Who Planted Trees Jim Robbins, 2012-04-17 The Man Who Planted Trees is the inspiring story of David Milarch's quest to clone the biggest trees on the planet in order to save our forests and ecosystem as well as a hopeful lesson about how each of us has the ability to make a difference When is the best time to plant a tree Twenty years ago The second best time Today Chinese proverb Twenty years ago David Milarch a northern Michigan nurseryman with a penchant for hard living had a vision angels came to tell him that the earth was in trouble Its trees were dying and without them human life was in jeopardy The solution they told him was to clone the champion trees of the world the largest the hardiest the ones that had survived millennia and were most resilient to climate change and create a kind of Noah's ark of tree genetics Without knowing if the message had any basis in science or why he'd been chosen for this task Milarch began his mission of cloning the world's great trees Many scientists and tree experts told him it couldn't be done but twenty years later his team has successfully cloned some of the world's oldest trees among them giant redwoods and sequoias They have also grown seedlings from the oldest tree in the world the bristlecone pine Methuselah When New York Times journalist Jim Robbins came upon Milarch's story he was fascinated but had his doubts Yet over several years listening to Milarch and talking to scientists he came to realize that there is so much we do not yet know about trees how they die how they communicate the myriad crucial ways they filter water and air and otherwise support life on Earth It became clear that as the planet changes trees and forest are essential to assuring its survival Praise for The Man Who Planted Trees This is a

story of miracles and obsession and love and survival Told with Jim Robbins's signature clarity and eye for telling detail *The Man Who Planted Trees* is also the most hopeful book I've read in years I kept thinking of the end of Saint Francis's wonderful prayer And may God bless you with enough foolishness to believe that you can make a difference in the world so that you can do what others claim cannot be done Alexandra Fuller author of *Don't Let's Go to the Dogs Tonight* Absorbing eloquent and loving While Robbins's tone is urgent it doesn't compromise his crystal clear science Even the smallest details here are fascinating Dominique Browning *The New York Times Book Review* The great poet W S Merwin once wrote On the last day of the world I would want to plant a tree It's good to see in this lovely volume that some folks are getting a head start Bill McKibben author of *Eaarth Making a Life on a Tough New Planet* Inspiring Robbins lucidly summarizes the importance and value of trees to planet Earth and all humanity The Ecologist Imagine a world without trees writes journalist Jim Robbins It's nearly impossible after reading *The Man Who Planted Trees* in which Robbins weaves science and spirituality as he explores the bounty these plants offer the planet Audubon [The Protected Landscape Approach](#) Jessica Brown, Nora J. Our Future in Nature: Edmund Barrow, 2019-05-21 Who has not felt a sense of awe silence stillness and presence in an ancient woodland or forest or in front of a sacred tree Humankind has held trees and woodlands in awe and reverence since the dawn of time We depend on nature for the air we breathe the water we drink and the services nature provides This book is about the importance of sacred trees and groves in our stress filled and increasingly urban world Note that over 50 percent of the world is urban Sacred trees and sacred groves transcend race color and creed They are found all over our fragile planet Where there is a tree there is a sacred tree This book will appeal to religious and spiritual traditions as well as to conservation and environmental movements It will offer its reader means to take better care of our only home planet Earth Often undervalued unrecognized or disrespected sacred trees and groves are conserved against mind boggling pressures For example there is a sacred fig tree between two shops in one of the main streets in Hanoi Vietnam There is also a one hectare sacred grove in the center of Kumasi a city of 2.5 million people in Ghana the over 150 000 sacred groves in India and the sacred hill forests of every village in Yunnan South China Sacred trees and groves often conserve unique biodiversity which can help create or recreate connectivity in the landscape As such sacred trees and groves may be relic survivors of bygone ages and are an important resource for restoring degraded natural landscapes This book offers ways for those involved with religion and spirituality and for those working with conservation and land use to jointly engage in repairing the damage we have done to Earth

All Y'all Heidi Siegrist, 2024-11-11 The South is often perceived as a haunted place in its region's literature one that is strange deviant or queer The peculiar often sexually charged literary worlds of contemporary writers like Fannie Flagg Monique Truong and Randall Kenan speak to this connection between queerness and the South Heidi Siegrist explores the boundaries of negotiating place and sexuality by using the concept of Southernness a purposefully fluid idea of the South that extends beyond simple geography eschewing familiar ideas of the Southern canon When the connection between queerness and Southernness becomes apparent Siegrist shows a Southern branded queer deviance can not only change the way we think about literature but can also change Southern queer people's lived experiences Siegrist gathers a bevy of undertheorized writers from Kenan and Truong to Dorothy Allison and even George R R Martin showing that there are many queer Souths Siegrist offers these multiverses as a way to appreciate a place that is often unfriendly even deadly to queer people But as Siegrist argues none of these Souths from the terrestrial to the imaginary would be what they are without the influence and power of queer literature

The Mammoth Book of Superstition Roy Bainton, 2016-11-10 Rather than providing a dictionary of superstitions of which there are already numerous excellent exhaustive and in many cases academic works which list superstitions from A to Z Bainton

gives us an entertaining flight over the terrain landing from time to time in more thought provoking areas He offers an overview of humanity's often illogical and irrational persistence in seeking good luck and avoiding misfortune While Steve Roud's two excellent books *The Penguin Dictionary of Superstitions* and his *Pocket Guide* and Philippa Waring's 1970 *Dictionary* concentrate on the British Isles Bainton casts his net much wider There are many origins which warrant the full back story such as Friday the thirteenth and the Knights Templar or the demonisation of the domestic cat resulting in cat holocausts throughout Europe led by the Popes and the Inquisition The whole is presented as a comprehensive entertaining narrative flow though it is of course a book that could be dipped into and includes a thorough bibliography Schoenberg who developed the twelve tone technique in music was a notorious triskaidekaphobe When the title of his opera *Moses und Aaron* resulted in a title with thirteen letters he renamed it *Moses und Aron* He believed he would die in his seventy sixth year 76 13 and he was correct he also died on Friday the thirteenth at thirteen minutes before midnight As Sigmund Freud wrote Superstition is in large part the expectation of trouble and a person who has harboured frequent evil wishes against others but has been brought up to be good and has therefore repressed such wishes into the unconscious will be especially ready to expect punishment for his unconscious wickedness in the form of trouble threatening him from without
