Automotive Product Development Vivek D. Bhise, 2017-05-08 This book is about how to develop future automotive products by applying the latest methodologies based on a systems engineering approach and by taking into account many issues facing the auto industry such as meeting government safety emissions and fuel economy regulations incorporating advances in new technology applications in structural materials power trains vehicle lighting systems displays and telematics and satisfying the very demanding customer It is financially disastrous for any automotive company to create a vehicle that very few people want To design an automotive product that will be successful in the marketplace requires carefully orchestrated teamwork of experts from many disciplines substantial amount of resources and application of proven techniques at the right time during the product development process Automotive Product Development A Systems Engineering Implementation is intended for company management personnel and graduate students in engineering business management and other disciplines associated with the development of automotive and other complex products

Vehicle Propulsion Systems Lino Guzzella, Antonio Sciarretta, 2007-09-21 In this book the longitudinal behavior of road vehicles is analyzed The main emphasis is on the analysis and minimization of the fuel and energy

consumption Most approaches to this problem enhance the complexity of the vehicle system by adding components such as electrical motors or storage devices Such a complex system can only be designed by means of mathematical models This text gives an introduction to the modeling and optimization problems typically encountered when designing new propulsion systems for passenger cars It is intended for persons interested in the analysis and optimization of classical and novel vehicle propulsion systems Its focus lies on the control oriented mathematical description of the physical processes and on the model based optimization of the system structure and of the supervisory control algorithms This text has evolved from a lecture series at ETH Zurich Prerequisites are general engineering topics and a first course in optimal control theory

Automotive Control Systems A. Galip Ulsoy, Huei Peng, Melih Çakmakci, 2012-04-30 This textbook introduces advanced control systems for vehicles including advanced automotive concepts and the next generation of vehicles for ITS **Noise and Torsional Vibration Analysis of Hybrid Vehicles** Xiaolin Tang, Yanjun Huang, Hong Wang, Yechen Qin, 2022-06-01

Thanks to the potential of reducing fuel consumption and emissions hybrid electric vehicles HEVs have been attracting more and more attention from car manufacturers and researchers Due to involving two energy sources i e engine and battery the powertrain in HEVs is a complicated electromechanical coupling system that generates noise and vibration different from that of a traditional vehicle Accordingly it is very important to explore the noise and vibration characteristics of HEVs In this book a hybrid vehicle with two motors is taken as an example consisting of a compound planetary gear set CPGS as the power split device to analyze the noise and vibration characteristics It is specifically intended for graduates and anyone with an interest in the electrification of full hybrid vehicles The book begins with the research background and significance of the HEV The second chapter presents the structural description and working principal of the target hybrid vehicle Chapter 3 highlights the noise vibration and harshness NVH tests and corresponding analysis of the hybrid powertrain Chapter 4 provides transmission system parameters and meshing stiffness calculation Chapter 5 discusses the mathematical modeling and analyzes torsional vibration TV of HEVs Finally modeling of the hybrid powertrain with ADAMS is given in Chapter 6

Safety and Reliability of Complex Engineered Systems Luca Podofillini, Bruno Sudret, Bozidar Stojadinovic, Enrico Zio, Wolfgang Kröger, 2015-09-03 Safety and Reliability of Complex Engineered Systems contains the Proceedings of the 25th European Safety and Reliability Conference ESREL 2015 held 7 10 September 2015 in Zurich Switzerland Including 570 papers on theories and methods in the area of risk safety and reliability and their applications to a wide range of industrial civil and social sectors this book will be of interest to academics and professionals involved or interested in aspect of risk safety and reliability in various engineering areas **Advances in Applied Digital Human Modeling and Simulation**

Vincent G. Duffy, 2016-07-26 This book focuses on the predictive capabilities derived from digital representation of humans in simulation or virtual environments It reports on models that facilitate prediction of safety and performance and describes both innovative visualization techniques as well as the underlying mathematics and science Contributions cover a wealth of

topics including simulation tools and platforms virtual interactive design model optimization methods ontologies and knowledge based decision support human computer interaction human augmentation and many others The book gives special emphasis to cutting edge simulation applications of human system modeling and optimization including aviation manufacturing and service industries automotive design product design healthcare sustainability and emergency management Based on the AHFE 2016 International Conference on Digital Human Modeling and Simulation held on July 27 31 2016 in Walt Disney World Florida USA it is intended as timely survey for researchers engineers designers applied mathematicians and practitioners working in the field of Human Factors and Ergonomics Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee to Assess Fuel Economy Technologies for Medium- and Heavy-Duty Vehicles,2010-08-30 Technologies and Approaches to Reducing the Fuel Consumption of Medium and Heavy Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium and heavy duty vehicles such as tractor trailers transit buses and work trucks The book also recommends approaches that federal agencies could use to regulate these vehicles fuel consumption Currently there are no fuel consumption standards for such vehicles which account for about 26 percent of the transportation fuel used in the U S The miles per gallon measure used to regulate the fuel economy of passenger cars is not appropriate for medium and heavy duty vehicles which are designed above all to carry loads efficiently Instead any regulation of medium and heavy duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers such as gallons per ton mile a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile This is called load specific fuel consumption LSFC The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types For example using advanced diesel engines in tractor trailers could lower their fuel consumption by up to 20 percent by 2020 and improved aerodynamics could yield an 11 percent reduction Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently such as garbage trucks and transit buses by as much 35 percent in the same time frame **Frontiers in Electronics** H. Iwai,2006 Frontiers in Electronics reports on the most recent developments and future trends in the electronics and photonics industry The issues address CMOS SOI and wide band gap semiconductor technology terahertz technology and bioelectronics providing a unique interdisciplinary overview of the key emerging issues This volume accurately reflects the recent research and development trends from pure research to research and development and its contributors are leading experts in microelectronics nanoelectronics and nanophotonics from academia industry and government agencies *Assisted Eco-Driving* Craig K.
