The Ghosts of Hopewell Jim Fisher,2006-08 In this illustrated examination of the Lindbergh kidnapping case Jim Fisher seeks to set the record straight regarding Bruno Hauptmann s guilt in the crime of the century In February 1935 following a sensational six week trial a jury in Flemington New Jersey found German carpenter Hauptmann guilty of kidnapping and murdering the twenty month old son of Charles and Anne Lindbergh Although circumstantial the evidence against Hauptmann the handwriting on the ransom notes the homemade kidnapping ladder Colonel Lindbergh s money found in his garage his matching the description of the man who accepted the ransom payoff in the Bronx cemetery his inability to prove an alibi and his incredible explanation of his possession of the ransom money was overwhelming leaving few to doubt his guilt After a series of appeals and stays Hauptmann died fourteen months later in the electric chair A confession would have spared him the death sentence but Hauptmann chose to die maintaining his innocence It was not until the mid 1970s that revisionists began to challenge the conventional wisdom in the case that Hauptmann was the lone killer Revisionist books and articles appeared as did plays TV shows and a movie all portraying Hauptmann as the victim of a massive police and prosecution frame up At this point the focus shifted from the evidence to the conduct of the police By the 1980s most

people familiar with the case were convinced of Hauptmann's complete innocence. Many denied the murder, believing that the Lindbergh baby remained alive. Several men claimed to be the firstborn son of Charles and Anne Lindbergh, one of whom sued to claim his share of the Lindbergh estate after Charles Lindbergh's death in 1974. Another group held that the kidnapping was an elaborate hoax to cover up the murder of the baby by his parents. Anna Hauptmann's series of federal lawsuits against New Jersey and others in the mid 1980s fueled further interest in the case. Although Hauptmann's widow lost all of her lawsuits, she had won the hearts and minds of the American people before her death at the age of ninety-four. Former FBI agent Fisher discusses the hard evidence, such as the ransom notes and the wood of the kidnapping ladder. He analyzes and debunks the various revisionist theories and presents new evidence that, coupled with the undisputed facts, prove beyond a reasonable doubt that Hauptmann was guilty as charged: he kidnapped and murdered the infant son of Charles and Anne Lindbergh. *Debating Contemporary Approaches to the History of Science* Lukas M.

Verburgt, 2024-01-11 *Debating Contemporary Approaches to the History of Science* explores the main themes, problems, and challenges currently at the top of the discipline's methodological agenda. In its chapters, established and emerging scholars introduce and discuss new approaches to the history of science and revisit older perspectives which remain crucial. Each chapter is followed by a critical commentary from another scholar in the field and the author's response. The volume looks at such topics as the importance of the global, digital, environmental, and posthumanist turns for the history of science and the possibilities for the field of moving beyond a focus on ideas and texts towards active engagement with materials and practices. It also addresses important issues about the relationship between history of science on the one hand and philosophy of science, history of knowledge, and ignorance studies on the other. With its innovative format, this volume provides an up-to-date, authoritative overview of the field and also explores how and why the history of science is practiced. It is essential reading for students and scholars eager to keep a finger on the pulse of what is happening in the history of science today and to contribute to where it might go next.
