Scientific American Molecular Cardiovascular Medicine Edgar Haber,1995 **Scientific American Molecular Cardiovascular Medicine** Edgar Haber,1995 **Scientific American Introduction to Molecular Medicine** Scientific American, inc,1994 *Endothelial Cells in Health and Disease* William C. Aird,2005-02-28 This reference serves as the first source to gather current data from endothelial cell biologists in various disciplines to summarize recent progress in the field providing a complete understanding of the endothelium in health and disease and demonstrating its potential as a therapeutic target **Diagnosis and Management of Hypertrophic Cardiomyopathy** Barry J. Maron,2008-04-15 Diagnosis and Management of Hypertrophic Cardiomyopathy is a unique multi authored compendium of information regarding the complexities of clinical and genetic diagnosis natural history and management of hypertrophic cardiomyopathy HCM the most common and important of the genetic cardiovascular diseases as well as related issues impacting the health of trained athletes Edited by Dr Barry J Maron a world authority on HCM and with major contributions from all of the international experts in this field this book provides a single comprehensive source of information concerning HCM Recent advances in the field are discussed including the importance of left ventricular outflow tract obstruction the use of implantable defibrillators for the prevention of sudden death in young people definition of the genetic basis for HCM and its role in clinical diagnosis and risk stratification the development of more precise strategies for assessing the level of risk for sudden death among all patients with HCM and the evolution of invasive interventions for heart failure symptoms such as surgical management and its alternatives alcohol septal ablation and dual chamber pacing Key Features Contributions from all experts in the field representing diverse viewpoints regarding this heterogeneous disease and related issues in athletes Information to dispel misunderstandings regarding issues associated with HCM and cardiovascular disease in athletes The only comprehensive source of information available on the topic **Mechanical Forces and the Endothelium** Michael A Gimbrone,1999-08-19 Areas addressed in this excellent text include the overall response of the endothelium to hemodynamic forces and molecular biology with gene regulation taking a central role **Primary Care, Second Edition** Joanne K. Singleton,Robert V. DiGregorio, PharmD, BCACP,Carol Green-Hernandez,Stephen Paul Holzemer, PhD, RN,Eve S. Faber, MD,Lucille R. Ferrara,Jason T. Slyer,2014-11-12 Print CourseSmart **Handbook of Clinical Nursing Research** Ada Sue Hinshaw,Suzanne L. Feetham,Joan Shaver,1999-06-18 This is a comprehensive but critical guide to the state of nursing research particularly in areas most relevant to current practice *Molecular Genetics of Cardiac Electrophysiology* C. Berul,Jeffrey A. Towbin,2012-12-06 The molecular basis for atrial fibrillation continues to be largely unknown and therapy remains unchanged aimed at controlling the heart rate and preventing systemic emboli with anticoagulation Familial atrial fibrillation is more common than previously suspected While atrial fibrillation is commonly associated with acquired heart disease a significant proportion of individuals have early onset without other forms of heart disease referred to as lone atrial

fibrillators It is also well recognized that atrial fibrillation occurs on a reversible or functional basis without associated structural heart disease such as with hyperthyroidism or of atrial fibrillation following surgery It remains to be determined what percentage in these individuals is familial or due to a genetic predisposition Mapping the locus for familial atrial fibrillation is the first step towards the identification of the gene Isolation of the gene and subsequent identification of the responsible molecular genetic defect should provide a point of entry into the mechanism responsible for the familial form and the common acquired forms of the disease and eventually provide more effective therapy We know that the ionic currents responsible for the action potential of the atrium is due to multiple channel proteins as is electrical conduction throughout the atria Analogous to the ongoing genetic studies in patients with familial long QT syndrome it is highly likely that defects in each of these channel proteins will be manifested in familial atrial fibrillation

Principles of Molecular Regulation P. Michael Conn, Anthony R. Means, 2000-07-28 With the dramatic growth in our knowledge of hormone action and the mechanisms of cell regulation the need for an up to date broad ranging survey of these processes has become pressing In Principles of Molecular Regulation P Michael Conn and Anthony Means have successfully assembled a panel of leading investigators to provide an integrated review of the key areas membrane receptor initiated cell signaling and nuclear receptor initiated gene regulation Chosen for the excellence of their research as well as their demonstrated writing skills these distinguished authors illuminate the molecular machinery underlying the regulatory processes of cells In addition to their comprehensive review of the signaling mechanisms involving cell surface receptors nuclear receptors and ion channels they detail the roles of calcium lipids cyclic AMP protein kinases and protein phosphatases They also discuss the molecular regulation of cell proliferation and death as well as the impact of new technologies on rational drug discovery Capturing the excitement now present at this vibrant union of molecular biology cell biology and endocrinology Principles of Molecular Regulation constitutes a major new resource for understanding the many and complex elements of biological regulation Its up to date critical synthesis is certain to prove of high value to all basic and clinical investigators working with these processes today
