Scientists Starred 1903 1943 In American Men Of Science:

Scientists Starred, 1903-1943, in "American Men of Science" Stephen Sargent Visser, 1947 The American Ideology of National Science, 1919-1930 Ronald C. Tobey, 1971-10-15 Ronald C Tobey provides a provocative analysis of the movement to establish a national science program in the early twentieth century Led by several influential scientists who had participated in centralized scientific enterprises during World War I the new effort to conjoin science and society was an attempt to return to earlier progressive values with the hope of producing science for society's benefit The movement was initially undermined by the new physics and Einstein's theories of relativity which shattered traditional views and alienated the American public Nationalized research programs were tempered by the conservatism of corporate donors Later with the disintegration of progressivism the gap between science and society made it impossible for the two cultures to unite

Graduate Student Enrollment and Support in American Universities and Colleges, 1954 National Science Foundation (U.S.), 1957 *Women Scientists in America* Margaret W. Rossiter, 1982 Winner of the Berkshire Conference of Women Historians Prize In volume one of this landmark study focusing on developments up to 1940 Margaret Rossiter describes the activities and personalities of the numerous women scientists astronomers chemists biologists and psychologists who overcame extraordinary obstacles to contribute to the growth of American science This remarkable history recounts women's efforts to establish themselves as members of the scientific community and examines the forces that inhibited their active and visible participation in the sciences *The New Era in American Mathematics, 1920-1950* Karen Hunger Parshall, 2022-02-22 The 1920s witnessed the birth of a serious mathematical research community in America Prior to this mathematical research was dominated by scholars based in Europe but World War I had made the importance of scientific and technological development clear to the American research community resulting in the establishment of new scientific initiatives and infrastructure Physics and chemistry were the beneficiaries of this renewed scientific focus but the mathematical community also benefitted and over time began to flourish Over the course of the next two decades despite significant obstacles this constellation of mathematical researchers programs and government infrastructure would become one of the strongest in the world In this meticulously researched book Karen Parshall documents the uncertain but ultimately successful rise of American mathematics during this time Drawing on research carried out in archives around the country and around the world as well as on the secondary literature she reveals how geopolitical circumstances shifted the course of international mathematics She provides surveys of the mathematical research landscape in the 1920s 30s and 40s introduces the key players and institutions in mathematics at that time and documents the effect of the Great Depression and the second world war on the international mathematical community The result is a comprehensive account of the shift of mathematics center of gravity to the American stage The Creativity Question Albert Rothenberg, Carl R. Hausman, 1976 Albert Rothenberg a psychiatrist and Carl R Hausman a philosopher have prepared a truly comprehensive interdisciplinary book of

readings on creativity This group of selections from the works of writers in psychiatry philosophy psychology psychoanalysis and education brings together for the first time major theoretical works outstanding empirical findings and discussions of the definition and nature of creativity The organization of The Creativity Question is unique it illustrates the various approaches and basic assumptions underlying studies of creativity throughout the course of history up to the present time The main body of selections appears under the categories of descriptions attempts at explanation and alternate approaches As specific orientations to creativity can be traced to particular initiating thinkers and investigators there is a special chapter on seminal accounts containing selections from the works of Plato Aristotle Kant Galton and Freud Another chapter includes recent illustrations of special types of exploratory trends creativity of women brain research synectics extrasensory perception behaviorism and creativity computer programming This organization highlights the tension between strictly scientific accounts and alternative approaches offering new ways of understanding The editors have provided for the books as a whole and for each chapter explanation and discussion of the basic issues raised by the various approaches to creativity

Women in the National Inventors Hall of Fame Ilene Busch-Vishniac, Lauren Busch, Jill S. Tietjen, 2024-12-13 This book features all the women inducted in the first fifty years of the US National Inventors Hall of Fame Each entry first provides a biography of the inductee and then goes on to describe one or more of their major inventions with descriptions that are accessible to those with little or no formal training in science The evolution of the opportunities available to women in education and the professions becomes evident as the reader moves chronologically through biographies and inventions of the woman Later inductees have received Nobel Prizes for their work and have become members of academies such as the National Academy of Engineering the National Academy of Sciences and the National Academy of Medicine Others have received the National Medal of Science or the National Medal of Technology and Innovation As an important part of the Women in Science and Engineering book series the work highlights the contributions of women inventors inspiring women and men and girls and boys in a variety of scientific fields **Cecilia Payne-Gaposchkin** Cecilia
