Scientists Who Made History Galile:

Galileo Galilei Mike Goldsmith,2014 This title describes the life and career of the early seventeenth century Italian scientist Galileo Galilei who caused a revolution in the study of physics and astronomy with his pioneering discoveries changing forever our view of the Universe and leading him into confrontation with the powerful Catholic Church **The Standard American Encyclopedia of Arts, Sciences, History, Biography, Geography, Statistics, and General Knowledge** John Clark Ridpath,1897 **First Century Galilee** Bradley W. Root,2014-10-17 This dissertation argues against the widespread belief among current scholars that Galilee experienced extensive Hellenization rapid urbanization and a socio economic crisis in the first century C E as a result of major socio economic changes initiated by Herod the Great and his successors My research indicates that earlier studies allowed the textual evidence to have an undue influence on the way that scholars interpret the archaeological evidence and vice versa Unlike previous studies on Early Roman Galilee the dissertation begins by attempting to interpret each source for the region individually and without recourse to other sources After establishing what each source says on its own about Galilee the dissertation analyzes the data as a whole and offers a reconstruction of Galilean society in the first century C E that better reflects the available evidence The major findings are that the region was politically stable until the Great Revolt of 66 C E that the region was much less Hellenized than some prominent scholars claim that the urbanization process initiated by Herod Antipas had less of a negative immediate impact on Galilean society than modern scholars usually assume and that Galilee was not experiencing any unusual or severe socio economic problems prior to the revolt **Christian Beginnings** Jürgen Becker,1993-01-01 This work brings together the insights of a range of distinguished scholars on a fresh and important task The work is sound imaginative and original Howard Clark Kee Contributors include Christopher Burchard Carsten Colpe Karl Loening John K Riches and others Translation by Annemarie S Kidder and Reinhard Krauss *The Literary and Scientific Class-Book, Etc* John PLATTS (Unitarian Minister.),1821 **Essays on Galileo and the History and Philosophy of Science** Stillman Drake,1999-01-01 This 3 volume collection includes 80 of the 130 papers published by Drake most on Galileo but some on medieval and early modern science in general principally mechanics An essential supplement to Drake s translations and other books

Holistic Science Mustafa Özcan,2023-09-12 INTRODUCTION Mustafa ZCAN s book on HOLISM With the beginning of the Renaissance in the 17th century a new way of thinking was initiated in the world of philosophy and science Although the holistic approach was a popular way of thinking among philosophers in ancient Greece it cannot be said that there was an important theoretical recovery in these periods This movement in Europe is primarily Rene Descartes who wrote books on scientific methods and brought important rules This groundbreaking philosopher was followed by the great physicist Isaac NEWTON On the other hand in Germany Leibniz has taken important steps on theoreticality and holism with an approach similar to Descartes In the 20th century with the great journey Charles Darwin made with his holistic point of view

holisticization also took an important step At the beginning of the 20th century Albert EINSTEIN fundamentally established the Darwin s like important point of view in physics and astrophysics in his perspective on the universe and atoms This book in my opinion was an important step calling for holistic thought which became increasingly impoverished at the beginning of the 20th century I believe that this book which tries to make a synthesis by reflecting in the views of many thinkers on both the history of philosophy the history of science and holism will try to fill an important deficiency in the literature Prof Dr Erol Ba ar Beyond the blissful integration of classical analytical familiar science and philosophy Mustafa zcan thinking about the design and use of holistic science went beyond the holistic science which is still in the embryo stage in Western science and what he describes as meta theory It aims to make HAK Understanding Everything or Explainer Theory understandable You will try to grasp an extraordinary effort and an intellectual challenge with pleasure in this work Ate an Aybars Mustafa zcan s Holistic Science book opens new horizons for those who think on these issues with a wide inclusive and integrative approach in the world intellectual environment where the debates about the end of science philosophy and even history continue Prof Dr Fuat nce Holistic Science It takes great courage to prepare a book on such a subject Dear researcher and author Mustafa zcan has made a great contribution to our society and our scientific world as he has made such a subject into a book as a result of his research over the years Prof Dr Murat Din men **Church History, Life of Constantine the Great, and Oration in Praise of Constantine** Eusebius (of Caesarea, Bishop of Caesarea),1890 Johnson's New Universal Cyclopædia : a Scientific and Popular Treasury of Useful Knowledge ,1876 **Galilee** Richard A. Horsley,1995 Who were the Galileans What was their background Were they descendants of ancient northern Israelites When had they come under Jerusalem rule What precipitated resistance movements in the area
