

What role do scientists play in science journalism?

The ability of journalists to report science news is directly reliant on the scientific community to publish it. The press can be manipulated by scientists who wish to trumpet their particular subject of study, but the press can also manipulate scientists to support media objectives. Both parties are responsible for ensuring the accuracy and neutrality of science news.

Dunwoody, Carol L. Rogers**

Scientists And Journalists Reporting Science As News:

Scientists and Journalists Sharon M. Friedman, Sharon Dunwoody, Carol L. Rogers, 1986 **Communicating Uncertainty** Sharon M. Friedman, Sharon Dunwoody, Carol L. Rogers, 2012-10-12 Exploring the interactions that swirl around scientific uncertainty and its coverage by the mass media this volume breaks new ground by looking at these issues from three different perspectives that of communication scholars who have studied uncertainty in a number of ways that of science journalists who have covered these issues and that of scientists who have been actively involved in researching uncertain science and talking to reporters about it In particular *Communicating Uncertainty* examines how well the mass media convey to the public the complexities ambiguities and controversies that are part of scientific uncertainty In addition to its new approach to scientific uncertainty and mass media interactions this book distinguishes itself in the quality of work it assembles by some of the best known science communication scholars in the world This volume continues the exploration of interactions between scientists and journalists that the three coeditors first documented in their highly successful volume *Scientists and Journalists Reporting Science as News* which was used for many years as a text in science journalism courses around the world *A Scientist's Guide to Talking with the Media* Richard Hayes, Daniel Grossman, 2006 In *A Scientist's Guide to Talking with the Media* Richard Hayes and Daniel Grossman draw on their expertise in public relations and journalism to empower researchers in a variety of fields to spread their message on their own terms The authors provide tips on how to translate abstract concepts into concrete metaphors craft soundbites and prepare for interviews For those looking for a higher profile the authors explain how to become a reporter's trusted source the first card in the Rolodex on controversial issues *Communicating Science* Eileen Scanlon, 1999 *Communicating Science* is an ideal introduction for anyone who wants to learn about the relationship between science the media and the public *Encyclopedia of Literature and Science* Pamela Gossin, 2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they're different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A-Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries

to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading

Routledge Handbook of Public Communication of Science and Technology Massimiano Bucchi, Brian Trench, 2014-06-20 Communicating science and technology is a high priority of many research and policy institutions a concern of many other private and public bodies and an established subject of training and education Over the past few decades the field has developed and expanded significantly both in terms of professional practice and in terms of research and reflection The Routledge Handbook of Public Communication of Science and Technology provides a state of the art review of this fast growing and increasingly important area through an examination of the research on the main actors issues and arenas involved In this brand new revised edition the book brings the reviews up to date and deepens the analysis As well as substantial reworking of many chapters it gives more attention to digital media and the global aspects of science communication with the inclusion of four new chapters Several new contributors are added to leading mass communication scholars sociologists public relations practitioners science writers and others featured herein With key questions for further discussion highlighted in each chapter the handbook is a student friendly resource and its scope and expert contributors mean it is also ideal for both practitioners and professionals working in the field Combining the perspectives of different disciplines and of different geographical and cultural contexts this original text provides an interdisciplinary and global approach to the public communication of science and technology It is a valuable resource for students researchers educators and professionals in media and journalism sociology the history of science and science and technology

Journalism, Science and Society Martin W. Bauer, Massimiano Bucchi, 2008-07-25 Analyzing the role of journalists in science communication this book presents a perspective on how this is going to evolve in the twenty first century The book takes three distinct perspectives on this interesting subject Firstly science journalists reflect on their operating rules science news values and news making routines Secondly a brief history of science journalism puts things into context characterising the changing output of science writing in newspapers over time Finally the book invites several international journalists or communication scholars to comment on these observations thereby opening the global perspective This unique project will interest a range of readers including science communication students media studies scholars professionals working in science communication and journalists

Encyclopedia of journalism. 6. Appendices Christopher H. Sterling, 2009-09-25 The six volume Encyclopedia of Journalism covers all significant dimensions of journalism including print broadcast and Internet journalism US and international perspectives history technology legal issues and court cases ownership and economics

Handbook of Public Communication of Science and Technology Massimiano Bucchi, Brian Trench, 2008-06-03 Comprehensive yet accessible this key Handbook provides an up to date overview of the fast growing and increasingly important area of public communication of science and technology from both research and practical perspectives As well as introducing the main issues arenas and professional perspectives involved it presents the findings of

earlier research and the conclusions previously drawn Unlike most existing books on this topic this unique volume couples an overview of the practical problems faced by practitioners with a thorough review of relevant literature and research The practical Handbook format ensures it is a student friendly resource but its breadth of scope and impressive contributors means that it is also ideal for practitioners and professionals working in the field Combining the contributions of different disciplines media and journalism studies sociology and history of science the perspectives of different geographical and cultural contexts and by selecting key contributions from appropriate and well respected authors this original text provides an interdisciplinary as well as a global approach to public communication of science and technology Science

Communication for Scientists Laura Lindenfeld, John C. Besley, Xia Zheng, Anthony Dudo, Todd P. Newman, 2025-10-09

Grounded in strategic thinking and social science research this textbook empowers students to confidently navigate skillful and effective science communication Developed by leading science health and risk communication scholars the book provides a clear research informed approach to communicating with audiences across the scientific community and broader society Readers explore how to put theory into practice through classroom tested activities international real world examples and thoughtful practice oriented assignments These tools help students to create audience centered communication strategies build habits of ethical and intentional engagement and engage with a wide range of audiences ultimately developing greater alignment between science and society It prepares students to be more effective communicators and works to define science communication education by integrating practice with evidence and reflection This text is ideal for graduate and upper level undergraduate courses especially in Science Technology Engineering and Math fields and is an essential resource for the next generation of science communicators Online resources such as training activities further reading videos and a test bank are available at www.routledge.com/9781032797335 The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
