Science for Humans Robert Hanna, 2024-06-24 This book presents and defends an original and paradigm shifting conception of formal science natural science and the natural universe alike that's fully pro science but at the same time neither theological or God centered nor solipsistic or self centered nor communitarian or social institution centered nor scientistic or science valorizing nor materialist physicalist or reductive nor above all mechanistic It does this by presenting and defending what Robert Hanna calls the neo organicist turn including manifest realism and the three sub parts of metaphysical organicism liberal naturalism mind life continuity and explanatory inversion whereby mechanical systems are explained by grounding them in organic systems and not the other way around Or more briefly and simply put the purpose of this book is to present and defend science for humans As such it will be highly interesting and profoundly relevant to graduate students and specialist researchers in philosophy and the formal natural sciences
