Screening For Down's Syndrome:

Screening for Down's Syndrome J. G. Grudzinskas, 1994-11-17 This important new publication summarises the recent exciting advances in screening for Down's syndrome. It addresses important clinical questions such as risk assessment, who to screen, when to screen, which techniques to use, and the organisation of screening programmes nationally and internationally. An international and authoritative team of authors has been invited to assess the latest developments in this rapidly advancing area. The volume provides a critical and much needed evaluation of the potential and limitations of new and established techniques for screening for Down's syndrome. It will serve as an essential source of information for all those involved in pre-natal diagnosis and the provision of obstetric care. Prenatal Diagnosis and Screening for Down Syndrome

Subrata Dey, 2011-08-17 This book provides a concise yet comprehensive source of current information on Down syndrome. Research workers, scientists, medical graduates, and paediatricians will find it an excellent source for reference and review. This book focuses on exciting areas of research on prenatal diagnosis, Down syndrome screening after assisted reproduction techniques, noninvasive techniques, genetic counselling, and ethical issues. Whilst aimed primarily at research workers on Down syndrome, we hope that the appeal of this book will extend beyond the narrow confines of academic interest and be of interest to a wider audience, especially parents and relatives of Down syndrome patients. **Screening for Down**

Screening in Disease Prevention is important reading for public health professionals, particularly those involved in screening programs. Policy makers and shapers, medical researchers, pressure groups, and support organizations for people with screenable conditions will also find it a valuable reference.
