Courting Kids Carla J. Barrett, 2013 Despite being labeled as adults the approximately 200 000 youth under the age of 18 who are now prosecuted as adults each year in criminal court are still adolescents and the contradiction of their legal labeling creates numerous problems and challenges In Courting Kids Carla J Barrett takes us behind the scenes of a unique judicial experiment called the Manhattan Youth Part a specialized criminal court set aside for youth prosecuted as adults in New York City Focusing on the lives of those coming through and working in the courtroom Barrett s study reflects the costs challenges and consequences the tough on crime age has had especially for young men of color Through observation interviews and the construction of court narratives that trace several kids through the progression of their cases Barrett shows how members of the court worked to develop a humanizing model of justice cognizant of the often difficult realities of adolescent lives Skillfully engaging with some of the most critical issues facing our justice system today from routine judicial practices to the appropriate legal responses to serious adolescent transgression Courting Kids is a compelling study of the law in action Unedited summary for book cover

Reforming Juvenile Justice Committee on Assessing Juvenile Justice Reform, Committee on Law and Justice, Division of Behavioral and Social Sciences and Education, National Research Council, 2013-06-05 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal

developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly, adolescents lack mature capacity for self-regulations because the brain system that influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.

Youth, Crime, and Justice Clayton A. Hartjen, 2008-03-25. Close to half of the world's population is below the age of criminal jurisdiction in most countries. Many of these young people are living in poverty and under totalitarian regimes. Given their deprived and often abject circumstances, it is not surprising that many of them become involved in crime. In *Youth Crime and Justice*, Clayton A. Hartjen provides a broad overview of juvenile delinquency, how it manifests itself around the world, and how societies respond to misconduct among their children. Taking a global rather than country-specific approach, chapters focus on topics that range from juvenile laws and the correction of child offenders to the abuse, exploitation, and victimization of young people. Hartjen includes specific examples from the United States, Australia, Spain, Switzerland, New Zealand, Japan, India, Egypt, and elsewhere as he sorts through the various definitions of delinquent and explores the differences in behavior that contribute to these classifications. Most importantly, his

in depth and comparative look at judicial systems worldwide raises questions about how young offenders should be corrected and how much fault can be laid on misbehaving youths acting out against the very societies that produced them **Juvenile Justice: A Social, Historical and Legal Perspective** ,
