Being as Communion William A. Dembski, 2016-04-15 For a thing to be real it must be able to communicate with other things If this is so then the problem of being receives a straightforward resolution to be is to be in communion So the fundamental science indeed the science that needs to underwrite all other sciences is a theory of communication Within such a theory of communication the proper object of study becomes not isolated particles but the information that passes between entities In Being as Communion philosopher and mathematician William Dembski provides a non technical overview of his work on information Dembski attempts to make good on the promise of John Wheeler Paul Davies and others that information is poised to replace matter as the primary stuff of reality With profound implications for theology and metaphysics Being as Communion develops a relational ontology that is at once congenial to science and open to teleology in nature All those interested in the intersections of theology philosophy and science should read this book
Blinded by Starlight Frank McGillion, 2003-02-05 For centuries notions such as the transformation of base into precious metals an accord between humans and planets the existence of an elixir of life or prediction of the date of death have been on the outermost fringes of science So too have aspects of an art critical to western thought what the Greeks termed astronomia an amalgam of

astronomy and astrology In *Blinded By Starlight* Dr Frank McGillion demonstrates how by reference to modern scientific studies into the pineal gland such assertions are perilously close to being shown to be to a greater or lesser extent true

Quantum Leaps Charlotte Shelton,2012-06-25 *Quantum Leaps* is a how to book for creating fundamental change in both ourselves and our organizations Charlotte Shelton's basic premise is that organizational change happens one person at a time Our workplaces simply mirror our individual and collective beliefs Therefore we change ourselves our workplaces and the world by changing our minds As our beliefs change we not only see the world differently we begin to be in the world in a different way thus creating a new reality Shelton uses the basic principles of quantum mechanics as the foundational metaphor for a new quantum skill set that recognizes the highly complex constantly changing totally unpredictable nature of life She demonstrates the inadequacy of our time honored skills of planning organizing directing and controlling She shows how these skills are directly tied to an obsolete view of reality ignoring the now fundamental requirements of extreme imagination and radical innovation *Quantum Leaps* introduces seven new skills skills that are compatible with life and work in the twenty first century These seven Quantum Skills enable us to see think feel know act trust and be radically different ways Collectively they form a comprehensive model for change These skills integrate quantum mechanical principles state of the art psychology and universal spiritual practices They balance the traditional left brain business skills with a new skill set that more fully utilizes both hemispheres of the brain As we master these skills Shelton states We create balanced lives and whole brain organizations and we become authentic change masters changing ourselves and our organizations from the inside out The Seven Quantum Skills are Quantum Seeing Quantum Thinking Quantum Feeling Quantum Knowing Quantum Acting Quantum Trusting and Quantum Being These 7 skills introduce a new way to access underutilized brain capacities as they acknowledge the role of intention intuition and interconnectivity

Parapsychology Etzel Cardeña,John Palmer,David Marcusson-Clavertz,2015-07-25 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events thinking of a long lost friend just before he or she unexpectedly calls or the ability to feel the presence of deceased loved ones What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists including Nobel laureates Most of these researchers have concluded that some of these phenomena do occur although we are far from explaining them to everyone's satisfaction This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology explaining what we know and don't know about so called psi phenomena such as telepathy precognition or psychokinesis Contributors evaluate the evidence for these phenomena accounting for factors such as selective memory wish fulfillment and incorrect methods or analyses in some cases offering psychological physical and biological theories Instructors considering this book for use in a course may request an examination copy here

New Age Religion and Western Culture Wouter J. Hanegraaff,2018-09-24 Recent years have seen a spectacular rise of the New Age movement and an ever increasing interest

in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement

Theory U C. moments of miraculous and joyful surprise Epiphanies exposes a reality outside of everyday existence that has momentous implications for life's ultimate questions Shyly we venture out with these stories Dr Jauregui writes into a world where science itself is struggling to describe a realm out of time and space and language We are the beneficiaries of these extraordinary shifts of perspective invited into a sparkling conversation that allows us to see the potential residing in all of us
