Hoerr,2000-02-15 In this invaluable book Tom Hoerr relates a decade s worth of MI experiences at St Louis New City School We learn about the staff s initial exposure to MI theory the many activities some more successful than others that were undertaken by faculty and staff in teaching curriculum adult development and assessment the challenges that the leader faces in attempting to bring about significant and lasting change Especially compelling are the continuing efforts to develop the personal intelligences during a period when issues of diversity multiculturalism and standards loom so large Hoerr underscores the centrality of collegiality the problems posed by transient students and faculty the complementary role played by public exhibitions and standardized test scores the role of friends in determining the activities and intelligences favored by children the delicate line between support and challenge that the leader must walk the tension between excellence and perfection I value the concrete examples as well as the ties to important conceptual work such as that undertaken by Roland Barth on collegiality Peter Salovey on emotional intelligence and Peter Senge on the learning organization Achieving excellence has always been a process Hoerr makes it abundantly clear that the effort to use MI ideas effectively must remain on the agenda Still I can testify that over a 10 year period clear palpable impressive progress can be made We can improve schools significantly but only if we take the long view and do not settle for patchwork fixes Note This product listing is for the Adobe Acrobat PDF version of the book   **Understanding Dyslexia: A Guide For Teachers And Parents** Lawrence, Denis,2009-03-01 Dyslexia affects at least ten per cent of children and is the most common special educational need that teachers encounter However the characteristics of dyslexia can mean that it is often   **Intelligence Reframed** Howard E Gardner,2000-09-18 Harvard psychologist Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey His ideas about intelligence and creativity explicated in such bestselling books as Frames of Mind and Multiple Intelligences over 200 000 copies in print combined have revolutionized our thinking In his groundbreaking 1983 book Frames of Mind Howard Gardner first introduced the theory of multiple intelligences which posits that intelligence is more than a single property of the human mind That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world Now in Intelligence Reframed Gardner provides a much needed report on the theory its evolution and revisions He offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him He also introduces two new intelligences existential intelligence and naturalist intelligence and argues that the concept of intelligence should be broadened but not so absurdly that it includes every human virtue and value Ultimately argues Gardner possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species but also perhaps even a working definition of the species Gardner also offers provocative ideas about creativity leadership and moral

excellence and speculates about the relationship between multiple intelligences and the world of work in the future

The Myth of the A.D.D. Child Thomas Armstrong,1997-09-01 In this controversial and provocative book Dr Thomas Armstrong confronts America s obsession with Attention Deficit Disorder With more than one million children diagnosed with ADD the condition has gained national attention on talk shows magazine covers and The New York Times bestseller list Dr Armstrong well known for his writings on parenting and education presents the very real argument that ADD may in fact not exist He believes that many behaviors labeled as ADD are simply a child s active response to complex social emotional and educational influences and that by tackling the root causes of a child s attention and behavior problems rather than masking the symptoms with medication and behavior modification programs parents can help their children begin to experience fundamentally positive changes in their lives This groundbreaking book provides parents and professionals with 50 innovative and proven strategies they can use to help children overcome their attention and behavior problems His checklist helps parents decide which strategies are most appropriate and hundreds of resources including books and organizations are included The Myth of the A D D Child offers much needed practical help to both parents and professionals **Parents First** Garry Burnett,Kay Jarvis,2003-04-24 Parents First is designed to improve your understanding of how children learn in order for you to help your child face the challenges of our modern educational system It clearly explains some of the key current research about how the human brain works and provides practical advice on how to apply that research to studying and learning at school Garry Burnett and Kay Jarvis explore practical ways for you to help your child learn effectively which include Developing confidence and self esteem Effective listening and questioning Creating an effective learning environment Building a healthier brain for learning Improving memory recall and spelling *ADD/ADHD Alternatives in the Classroom* Thomas Armstrong,1999 What does it mean to a kid to be labeled attention deficit disordered ADD Or to have hyperactive added to the label ADHD What can teachers do to boost the success of students with attention and behavioral difficulties Are we relying too much on medication for these kids and not enough on new perspectives on learning child development the child s socioeconomic and cultural background biological and psychological research and the learner s emotional and social needs Armstrong urges educators and parents to look for the positive characteristics in learners who may carry the ADD ADHD label Are they bursting with energy Are they intensely creative Do they enjoy hands on learning Are they natural leaders Are they unusually introspective and reflective We need to look beyond a deficit approach and

embrace a more holistic view of learners that includes teaching to their multiple intelligences learning styles and other brain friendly approaches For example here are some classroom activities for kids who can t sit still Learning spelling words by having kids jump up out of their seats on the vowels and sit down on the consonants Mastering the multiplication tables by forming a conga line moving around the classroom counting from 1 to 30 out loud and on every multiple of 3 shaking their hips and legs Showing patterns of molecular bonding in chemistry class through a swing your atom square dance
