Writing North America in the Seventeenth Century Catherine Armstrong, 2016-12-05 Since the first permanent English colony was established at Jamestown Virginia in 1607 and accounts of the new world started to arrive back on the English shores English men and women have had a fascination with their transatlantic neighbours and the landscape they inhabit In this excellent study Catherine Armstrong looks at the wealth of literature written by settlers of the new colonies adventurers and commentators back in England that presented this new world to early modern Englishers A vast amount of original literature is examined including travel narratives promotional literature sermons broadsides ballads plays and journals to investigate the intellectual links between mother country and colony Representations of the climate landscape flora and fauna of North America in the printed and manuscript sources are considered in detail as is the changing understanding of contemporaries in England of the colonial settlements being established in both Virginia and New England and how these interpretations affected colonial policy and life on the ground in America The book also recreates the context of the London book trade of the seventeenth century and the networks through which this literature would have been produced and transmitted to readers This book will be valuable to those with interests in colonial history the Atlantic world travel literature and historians of early modern England and North America in general

Works: The Jesuits in North America in the seventeenth century Francis Parkman, 1901 **Seventeenth Century North America** Carl Ortwin Sauer, 1980 This book is a review of the

impact of European colonialization on the cultural and natural landscapes of native North America In this text the author has focused on rare neglected first hand French and Spanish source materials to provide us with ecologically and ethnographically rich stunningly detailed and articulate portraits of the American Landscape and the culturally sophisticated Native land management systems which were already in place at the dawn of Euro American history Far from a vast and open wilderness s America was at its dawn already a human environment as Sauer so clearly demonstrates and our history as a people would swing on the ability of our early Founding fathers often no more than glorified European real estate agents to perceive the intricacies of these eco systems as they lay before them like an open book Back cover
