The Myth of Ancient Egypt Charlotte Booth, 2011-06-15 Unravelling the myths of ancient Egypt World Toby Wilkinson, 2007-09-18 The Egyptian World provides an authoritative exploration of Ancient Egyptian civilization The volume covers seven broad themes with each section allowing specialists to focus on a particular topic **Development of Royal Funerary Cult at Abydos** Laurel Bestock, 2009 Two of the most characteristic aspects of ancient Egyptian culture kingship and a great attention to death were present from a very early age The first kings to rule all of Egypt came to power in approximately 3000 B C and the same kings were the first to have monumental tombs and funerary temples built These early royal mortuary temples in particular are guite enigmatic but the recent discovery of two previously unknown monuments at the site of Abydos is shedding new light on their development and use Most surprisingly these temples are from the same reign suggesting that members of the royal family in addition to the king might have received funerary cult in the early First Dynasty This study documents the excavation of these two temples their provision for the dedication of offerings and the sacrificial burials that surrounded them It sets these monuments within the framework of the rise of Egyptian kingship and cult examining both continuities and innovations in royal mortuary practice during this formative period of Egyptian civilization Meet Your Spiritual Mind Mark Abraham, 2010-12-28 Placing this missing link in its rightful place reveals that the contrasting natures of the progressing intellect and stagnant instincts have resulted in a growing imbalance in the mind Your stagnant instincts impair your intelligence hinder your happiness and are responsible for all manmade disasters However because of its subtle nature it continues to escape attention This work shows how to disengage your instincts and intellect boost your intelligence and happiness while it also resolves some major human enigmas For the first time we see why humans are so spiritual what makes man so incurably political what makes us worship arts and also sports Why of all beings humans alone are at the same time polygamous and monogamous that renders humans alone sexually confused Meet Your Political Mind Mark Abraham, 2010-12-15 The Interactions Between Instinct and Intellect and its Impact on Human Behavior Length 208 pages Mark Abraham was displeased by the phenomenon of politicking although he studied it for a deeper and more accurate understanding of this fatigued term politics as a major aspect of human affair For reasons he could not identify as a student he was never satisfied with the prevailing definitions

Thus he asked his professors in both undergraduate and graduate school in the political science department to share their understanding of the term with him Each of them seemed to have an understanding uniquely different from all the rest Then he realized that this was a vaguely understood phenomenon even by the professors in the field and he relented his efforts and concluded that politics was one of the most used but the least understood phenomena As he developed his own theories he formulated that unlike the commonly perceived concept politics is not just a profession for the few in each society but it is a brand of behavior unique to humans that starts in early childhood Thus he formulated to be instinctive is to be selfish To be selfish and intelligent is to be political Because instincts and intellect are permanent human fixtures politicking that results for their cofunction also becomes a permanent human fixture This perception justifies Aristotle's claim that man is a political animal The ultimate objective of politicking is to impose and thus he tries to redefine it He perceives politicking as a range of complex and manipulative deeds afforded by people to impose their will and interest on others against their will and interest As such it erodes innocence and is one of the least desirable of all human attributes Yet the selfish nature of all instincts as the driving force behind politics is the sole force that governs the world of animals thus politicking becomes the refined reflection of animals in man Where animals use fangs claws venom speed and brute force to subdue and devour their pray humans apply politics that includes the use of brute force Misconceiving this term greatly contributes to human conflicts at all levels which is why most people unconsciously dislike politicking and politics worldwide The God Secret Greg Rigby, 2011-09-01 An attempt to find the origin of the Judeo Christian concept of God is made by using astronomy and ancient history Meet Your Sexual Mind Mark Abraham, 2011-06-14 The Interactions Between Instinct and Intellect and its Impact on Human Behavior Length 200 Pages The paradoxes of human sexuality although self evident have been difficult to explain through the conventional understanding of the human mind A legitimate question to ask would be if polygamy is natural for humans then why are there so many rules against it worldwide And if humans by nature are monogamous then why is there so much infidelity in the all of the cultures of the world All beings instinctively are either polygamous or monogamous and they behave accordingly However humans demonstrably are both at the same time This too can only be understood through understanding the differences between the make up of human mind as compared to that of all the rest of the beings In that except for humans every aspect of all beings including their sexual conduct is driven by their instincts and instincts alone This renders their mind a single polar entity however the human mind alone being equipped to both instincts and intellect is bipolar As such each of these two mental forces of instincts and intellect issues its own command pertaining to human sexuality It just so happens that humans are instinctively polygamous however through the application of human intellect and reasoning and for practical reasons for millennia they have devised harsh rules against free sex to regulate peoples sexual activities through marriage These sever punishments are still enforced in many parts of the world even today And that was mostly designed to impose monogamy although some societies also allowed polygamy Thus instincts and intellect issue two

opposite commands and that renders humans as the only species that is sexually confused This inner contradiction often leads to infidelity that severely affects the committed relationships among many couples The same phenomenon also creates a fascinating psychology of its own what is commonly known sexual fantasy Through this people in the privacy of their mind and in their imagination practice polygamy without committing adultery that partially satisfies both realms of the mind

Mark Abraham, 2010-11-15 The Interactions Between Instinct and Intellect and its Impact on Human Behavior Length 420 Pages Mark Abraham came to America as a student in 1973 bent on finding the hidden causes of perpetual human conflicts He devoted 25 years of his postgraduate studies to understand the mind and has discovered that a growing imbalance in every human mind dominates all aspects of human conduct that also includes human conflicts This discovery took him far beyond his original quest and unveiled a few major human mysteries For example we learn that the inner contradictions between instincts and intellect create the psychology of spirituality that finds reflection in different religions It also shows what renders humans incurably political and why Aristotle called man political animal We learn what in the mind longs for art and also sport As this stance also shows why of all beings humans alone are at the same time polygamous and monogamous that renders our species alone sexually confused and much more Three human instincts are universally accepted and Mark has identified 14 more each of which drives its own brand of behavior more forcefully than does our intellect Ignoring this mental force had created a missing link in studying humans that is responsible for the persisting human enigma Placing this missing link in its rightful place in the equation of studying human reveals that the contrasting natures of the progressing intellect and stagnant instincts have resulted in a growing imbalance in the mind Our stagnant instincts impair our intelligence hinder our success and happiness and also are responsible for all manmade disasters However because of its subtle nature it continues to escape attention This work shows how to disengage your instincts and intellect boost your intelligence and happiness This is a unifying theory of the mind that deals with all these subjects and a great deal more covered in six books Moses In Ancient Egypt & The Hidden Story Of The Bible Richard Darlow, 2010-02-09 A non fictional account explaining why the author believes Moses was a prince of Thebes called Ramose Born c 1500 BC Prince Ramose was heir to Pharaoh Thutmose III being his Great Army Commander both roles ascribed to Moses by Hebrew tradition Moreover Ramose Moses both led victorious military campaigns against Ethiopia Cush then married the king's daughter becoming Egypt's Viceroy there A short time later Prince Ramose was mysteriously struck out of Egyptian records while the Bible hints Moses was cast into exile Exploring some of the more esoteric aspects of the prophet s life this book finds threads firmly connecting him to Egypt s 18th Dynasty 3500 years ago The book uncovers the Hermetic star knowledge Astrology which Moses gleaned from the White Brotherhood a secretive Egyptian mystery school who met in the halls of Karnak This knowledge was cryptically infused into the early Biblical scriptures revealing the Israelite ancestors were once devoted Astrologers
