guidance on improving intervention techniques with sex offenders The contributors explore the monitoring and surveillance strategies and cognitive behavioural techniques currently in use and give clear directions for future practice The Psychology of Love and Hate in Intimate Relationships Katherine Aumer,2016-06-23 Social psychology has made great advancements in understanding how our romantic relationships function and to some extent dissolve However the social and behavioral sciences in much of western scholarship often focus exclusively on the more positive aspects of intimate relationships and less so on more controversial or unconventional aspects The goal of this volume is to explore and illuminate some of these underrepresented aspects aspects such as non monogamy female orgasm sadism and hate that often function alongside love in intimate relationships Ultimately by looking at intimate relationships in this way the volume contributes to and advocates for a more holistic and comprehensive view of intimate relationships Throughout the volume contributors from social clinical and evolutionary psychology cover love and hate from a variety of sometimes opposing perspectives The first section covers love and the changing landscape of intimate relationships Its chapters review the current literature and research of understudied topics like non monogamy female orgasm sexual fantasies and the viewpoint of love as something other than positive The second section explores hate and how hate can operate in intimate relationships for example the appearance of sadistic behavior and debates the nature of hate as either a motivation or emotion The volume concludes by looking at ways in which the appearance of hate in relationships can be dealt with and overcome successfully Taken together these two sections reflect the full variety of experiences within intimate relationships With the aim of exploring how love and hate can and frequently do work together The Psychology of Love and Hate in Intimate Relationships is a fascinating psychological exploration of intimate relationships in modern times It is an invaluable resource to academics and students specializing in psychology gender and sociology including clinicians and therapists and all those interested in increasing our knowledge of intimate relationships The Psychology of Criminal Investigation Andy Griffiths,Rebecca Milne,2018-05-20 The contribution of psychological research to the prevention of miscarriages of justice and the development of effective investigative techniques is now established to a point where law enforcement agencies in numerous countries either employ psychologists as part of their staff or work in cooperation with academic institutions The application of psychology to investigation is particularly effective when academics and practitioners work together This book brings together leading experts to discuss the application of psychology to criminal investigation This book offers an overview of models of investigation from a psychological and practical view point covering topics such as investigative decision making the presentation of evidence witness testimony the detection of deception interviewing suspects and evidence based police training It is essential reading for students researchers and practitioners engaged with police practice investigation and forensic psychology **Criminal Psychology** Jacqueline B. new and emerging theory and research in the study of the criminal mind and criminal behavior Unfortunately criminal behavior surrounds us in our society from petty theft and vandalism to multimillion dollar white collar crime to shocking terrorism attempts and school killings Invariably one of the first questions is Why did they do it Criminal psychology seeks to solve this complex puzzle In this four volume reference work a unparalleled team of leading experts offer an exhaustive look at the history developments emerging and classic research issues controversies and victories in the expanding field of criminal psychology The first volume examines the general theories in the study of criminal psychology The second volume focuses more specifically on research of criminal behavior and crime types while the last two volumes delve into criminal justice and forensic applications The comprehensive content allows readers to better understand criminal behavior and appreciate the specific criminal justice and forensic settings in which this theory and research is applied such as criminal profiling forensic assessment of danger and correctional rehabilitation and offender reentry

Prologue to Violence Abby Stein, 2013-09-05 Despite mounting references to the transgenerational transmission of violence we still lack a compelling understanding of the linkage between the interpersonal violence of early life and the criminal violence of adulthood In Prologue to Violence Abby Stein draws on the gripping narratives of 65 incarcerated subjects and extensive material from law enforcement files to remedy this lacuna in both the forensic and psychodynamic literature In the process she calls into question prevailing beliefs about criminal character and motivation For Stein the early trauma to which adult criminals are subjected remains unformulated and as such unavailable for reflection Contrary to common belief these criminals especially sex murderers do not commit their crimes in a rational or fully conscious way They are not driven by deviant fantasy their psychopathy is not inborn and they rarely commit acts of violence without conscience Stein's interdisciplinary analysis of her data infuses contemporary relational psychoanalysis with the insights of neuroscience traumatology criminology and cognitive and narrative psychology A powerful challenge to offender treatment programs to address the shaping impact of childhood trauma rather than merely to correct the cognitions of violent offenders Prologue to Violence will be equally compelling to researchers and academics investigating child abuse and adult violence Its mental health readership will be broad and deep ranging beyond clinicians who work with offender populations to all therapists who wrestle with experiences of dissociation and aggressive enactment in everyday life
