*Embodying Morality* Helle Rydstrom, 2003-07-31 One of the first anthropological studies based on extensive fieldwork in Vietnam in decades Embodying Morality examines child rearing in a rural Red River delta commune It is a sophisticated and intriguing exploration of the ways in which a family system based on principles of male descent influences the moral upbringing and learning of girls and boys In Vietnamese culture boys alone perpetuate the patrilineal family line they incorporate the past present and future morality honor and reputation of their father s lineage Within this patrilineal universe girls are viewed as blank sheets of paper and must compensate for this deficiency by embodying *tin* cam sensitivity sense Such attitudes play a significant role in the upbringing of girls and boys and in how they learn to use and understand their bodies Helle Rydstrom offers fresh data from audiotapes videotapes textbooks observations in the home and at school for identifying the transformation of local and educational constructions of females males and morality into body styles of girls boys women and men She highlights the extent to which body performances in daily life produce reproduce and challenge widespread northern Vietnamese ideals of

femininity and masculinity The author's highly original application of post structuralist theory to Vietnam blends epistemology practice body and socialization theories with feminist analysis and relates these to children's learning By proposing the body as an analytic category that can move feminist theory beyond the impasse of the well established opposition between sex and gender *Embodying Morality* demonstrates vividly how specific cultural elaborations of corporeality are learned lived and experienced in contemporary rural Vietnam *Sex Differences* Yves Christen,2011-12-31 Few people realize how much science can tell us about the differences between men and women Yves Christen provided the first comprehensive overview of research in this area when this classic book was first published in the 1990s He goes beyond simplistic biology is destiny arguments and constructs a convincing case for linking social and biological approaches in order to understand complex differences in behavior Biologists agree that the sexes differ in brain and body structure Christen links these differences in cerebral anatomy to differences in behavior and intellect Taking his readers on a journey through psychology endocrinology demography and many other fields Christen shows that the biological and the social are not antagonistic To the contrary social factors tend to exaggerate the biological rather than neutralize it This controversial work *Sex Differences* takes on traditional feminism for its refusal to confront the evidence on biologically determined sex differences Christen argues for a feminism that sees traits common to women in a positive light in the tradition of such early feminists as Clemence Royer and Margaret Sanger as well as more contemporary feminist sociobiologists like Sarah Hrdy We deny sex differences only at the price of scientific truth and our own self respect *Biopolitics and Gender* Meredith W Watts Jr,2012-12-06 Here is an important book for social scientists interested in the influence of gender on certain types of behavior Several perspectives are presented on the general topic of biopolitics and gender including the points of view of brain science endocrinology ethology psychophysiology and such conventional interests as political attitudes socialization participation social structure and political hierarchy The varied and provocative ideas explored in this volume will broaden discussions of gender beyond an exclusive focus on sex links to oppression and discrimination *Male and Female in Developing South-East Asia* Karim Wazir Wazir,2021-03-10 This provocative book seeks to redress inaccuracies in Western perceptions of gender relations in Southeast Asia by bringing to the fore the area's ethnic and cultural variance and showing how women and men explain the informal and psychological dimensions of relationships as vital in holding family neighbourhood and kinship ties together Although there are differences between male and female perceptions of sex roles in society women perceive their situation as disadvantaged rather than less significant Male female interpretations of power and status tend to converge usually towards the understanding that the contributions of men and women are equally important in the formation of family and society *An Introduction to Childhood* Heather Montgomery,2011-09-09 In *An Introduction to Childhood* Heather Montgomery examines the role children have played within anthropology how they have been studied by anthropologists and how they have been portrayed and analyzed in ethnographic monographs over the last

one hundred and fifty years Offers a comprehensive overview of childhood from an anthropological perspective Draws upon a wide range of examples and evidence from different geographical areas and belief systems Synthesizes existing literature on the anthropology of childhood while providing a fresh perspective Engages students with illustrative ethnographies to illuminate key topics and themes

**The Social Science Encyclopedia** Adam Kuper, 2003-12-16 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on the key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society

**A Case of Neglect? (1996)** Ian Butler, Ian F Shaw, 2018-01-12 Published in 1996 this book advocates and persuasively exemplifies a qualitative sociology of childhood spoken repeatedly through children s voices After a long period of dormancy interest in the sociology of childhood became a focus of attention and scholarly interest Developments in practice by professionals working and learning in the fields of welfare education and youth and community studies have been paralleled by the emergence of specialist courses within sociology degrees Yet the challenges raised by the sociology of childhood remain marginalised within the social sciences more generally A Case of Neglect provides an accessible reader and review of the field Heard wherever possible through children s and young people s voices it provides a penetrating insight into their understandings and experiences of their own and adults worlds It also provides a readable and absorbing review of qualitative applications in the sociology of childhood and a counter to the common reliance on evidence derived from quantitative approaches The fieldwork applications range across the often hidden worlds of children s and young people s involvement in prostitution their experience of abuse black children s experiences of social services children s school cultures naturist children and childlessness Always arresting and sometimes poignant A Case of Neglect works towards a sociology which is both of and for childhood This book was originally published as part of the Cardiff Papers in Qualitative Research series edited by Paul Atkinson Sara Delamont and Amanda Coffey The series publishes original sociological research that reflects the tradition of qualitative and ethnographic inquiry developed at Cardiff The series includes monographs reporting on empirical research edited collections focussing on particular themes and texts discussing methodological developments and issues

**Initiation** Jean Sybil La Fontaine, 1986      **Generations in Africa** Erdmute Alber, Sjaak van der Geest, Susan

Reynolds Whyte, 2008 Though long neglected in anthropological research the connections and conflicts between generations are at the heart of social processes In this book sixteen studies examine relations between generations of kin and between historical and political generations The topics range from grandmother s cooking migrant remittances youth unemployment teenage pregnancy Valentine s Day and hip hop music to respect religious virtue gerontocracy memory wisdom complaint and the meaning of tradition Together they reinvigorate and expand the old anthropological interest in generation showing how necessary it is to understanding contemporary African societies

*Gendered Paradoxes* Amy Lind, 2015-11-09 Since the early 1980s Ecuador has experienced a series of events unparalleled in its history Its free market strategies exacerbated the debt crisis and in response new forms of social movement organizing arose among the country s poor including women s groups *Gendered Paradoxes* focuses on women s participation in the political and economic restructuring process of the past twenty five years showing how in their daily struggle for survival Ecuadorian women have both reinforced and embraced the neoliberal model yet also challenged its exclusionary nature Drawing on her extensive ethnographic fieldwork and employing an approach combining political economy and cultural politics Amy Lind charts the growth of several strands of women s activism and identifies how they have helped redefine often in contradictory ways the real and imagined boundaries of neoliberal development discourse and practice In her analysis of this ambivalent and unfinished cultural project of modernity in the Andes she examines state policies and their effects on women of various social sectors women s community development initiatives and responses to the debt crisis and the roles played by feminist issue networks in reshaping national and international policy agendas in Ecuador and in developing a transnationally influenced locally based feminist movement

*Rethinking Childhood* Phil Jones, 2009-05-07 A key textbook exploring all of the different aspects of childhood from education to health from national policies to home life
