Protocols in Primary Care Geriatrics John P. Sloan, 2012-02-02 The striking increase in average life expectancy during the twentieth century rates as one of the major events of our time We are in the midst of a social revolution one rooted not in a new ideology but in our changing population patterns For the first time in human history infants in fortunate nations like ours can expect to live well into their seventies and beyond This demographic revolution increases pressure on resources as it also creates further social change and new opportunities for older persons Such rapid changes have left most people living in the past with their generally negative attitudes about aging and elderly people The same outmoded beliefs are embedded in many of our health care programs In our youth oriented culture most of us still view old people as physically decrepit or in rapid inevitable decline Mentally they are viewed as forgetful or childish with little ability to learn and adapt Socially and economically they are often considered a burden With such stereotypes

where is the expectation and encouragement for their continuing capacity to enrich their own lives and to enrich society. These deep-seated cultural stereotypes do not describe accurately the new wave of elderly persons or their potential contributions to society. Today's aging individuals are mostly far from decrepit; fewer than 25 percent experience any disability and fewer than 5 percent are in nursing homes. Intellectually given new opportunities to learn and grow, they thrive.

Nursing Home Administration James Elmore Allen, 2007. Contains the knowledge essential to prepare for licensure and employment as a nursing home administrator. Using as its basis the guidelines of the National Association of Boards of Examiners of Nursing Home Administrators, this work includes sections on Distinguishing delirium from dementia, Psychosis from agitation, GERD and Glycemic control. *Interim Report of the Activities of the House Committee on Government Reform and Oversight* United States. Congress. House. Committee on Government Reform and Oversight, 1995.

Managing Death James M. Hoefler, 2019-08-15. Many Americans before they die will go through a stage where they are unable to make competent decisions about their own life-sustaining medical treatment. More and more family members and care givers are facing these difficult decisions in their stead, becoming engulfed in questions about personal wishes, medical ethics, state and federal law, and quality of life. Drawing on provocative case studies, personal interviews, and detailed research, James Hoefler examines the medical, legal, ethical, and clinical aspects of such right-to-die issues. Beginning with the legal struggle of a woman whose son existed in a persistent vegetative state (PVS) for seventeen years, the author moves into a broader look at consensus among professional organizations from the AMA to the President's Commission to the National Center for State Courts, beliefs of mainstream religious groups, public opinion, issues surrounding end-stage Alzheimer's and other organic brain disorders that can slowly lead to PVS, and the role of artificial nutrition and hydration in these cases. Hoefler concludes with recommendations on how to improve the quality of right-to-die decision making. An absorbing read with a minimum of technical jargon, this book is a valuable guide to care givers, public policy students, medical ethicists, family members, and anyone facing questions about an individual's right to die. **Interim Report of the Activities of the House Committee on Government Reform and Oversight, One Hundred Fourth Congress, First Session, 1995** United States. Congress. House. Committee on Government Reform and Oversight, 1996.
