Long Roll On The Rhine:

The Elements of Parapsychology K. Ramakrishna Rao, 2017-11-29 Psychic phenomena recorded throughout human history remained a mystery or a matter of faith rather than a subject of serious study until scientists began to investigate them roughly a century and a half ago Systematic experimentation began with the work of J B Rhine at Duke University resulting in the publication of Extra Sensory Perception 1934 followed by Extra Sensory Perception After Sixty Years 1940 Rhine and researchers who came after him struggled to present sufficient evidence to gain scientific credibility for the existence of extrasensory abilities Yet despite tight experimental controls and numerous significant results the subject remains controversial Parapsychologists argue that the impasse is not due to a lack of evidence but to the challenge their claims pose to the worldview of science in general This comprehensive overview of the discipline of parapsychology written by one of its most notable investigators offers the reader a full understanding of both its concepts theories and methods and its controversies problems and prospects

Western science teaches that our beings are governed by the laws of physics and our minds play no part There are however
flaws in this thinking most prominently unexplained paranormal phenomena that defy explanation by modern theories of
physics Collected by parapsychologists these data include extrasensory perception ESP poltergeist occurrences and
psychokinesis Much of the current data in parapsychology and their implications for understanding the true nature of the self
are examined here Beginning with a consideration of several instances of spontaneous psi the book examines the theoretical
explanations of paranormal phenomena It covers the hypothesis and evidence that minds contain the so called hidden
variables that determine the outcomes of the quantum process thus interweaving parapsychology with modern physics The

reader is also forced to consider in detail the relationship between the conscious mind and the physical brain and the evidence that minds survive the death of bodies *The Male Chorus* Ira David Sankey, George Coles Stebbins, 1888
