surfing In 1956 Dorian Doc Paskowitz stepped away from a successful medical practice and began a lifelong surfing odyssey that grew to include his wife Juliette and their nine children Together the Paskowitz clan lived a vagabonding bohemian existence eschewing material possessions in favor of intangible riches like health and good cheer all the while careening along the world s coastlines in search of the perfect wave In *Scratching the Horizon* Izzy Paskowitz looks back at his unusual upbringing and his lifelong passion for the sport that carries his family s stamp As the fourth oldest child in a family of inveterate surfers rock stars and beach bums he is uniquely qualified to shine a light on a childhood that has come to symbolize the surfing credo a reckless young adulthood that nearly cost him his sanity and a maturing sense of self and purpose that allows him to lift others on the back of his experience As the father of a son with autism and the founder of Surfers Healing a foundation devoted to expanding the horizons of children with autism through surfing Paskowitz has found a way to connect the surreal aspects of his childhood to the harsh realities of adulthood and he shares these discoveries in this wickedly entertaining and transforming memoir

move and proof that his book is working NOTE on the images Some readers have expressed dissatisfaction that the images in  
the book are black and white not full color Using color images in the print edition would have required a price of 40 or 50 per  
book just to break even Clearly this was not an option The images in the Kindle edition are all the original full color There  
have also been some comments about the quality of the images One problem is that printing on glossy or semi gloss paper  
which would have preserved the image quality would also raise the cost to a prohibitive level Again the images in the Kindle  
edition look better than those in the print edition because there is no issue of paper quality The other problem is that the best  
image in terms of quality is not always the best image to illustrate the point at hand Taking good surf pictures is really pretty  
easy shoot at 7 to 12fps and you re guaranteed to capture some great moments but getting a good clear image to illustrate a  
particular point with the surfer s foot or arm or body in exactly the position you want to discuss is amazingly hard For the  
purposes of this book sometimes demonstrating the point had to take precedence over maximum quality
