Omar Al-Bashir and Africa's Longest War Paul L. Moorcraft, 2015-04-30 President Omar al Bashir is Africa's and arguably Arabia's most controversial leader In power since 1989 he is the first sitting head of state to be issued with an arrest warrant for war crimes by International Criminal Court He has been a central personality in Islamic and African politics as well as a love to hate figure for the US in the war on terror For military history readers Al Bashir is a field marshal who has fought possibly the world's longest conflict Modern Sudan has been embroiled in war since 1955 No proper biography has been written on him before Nor has there been a comprehensive military history of Sudan The book briefly covers the military background until independence Then it dissects the long north south civil war until Bashir's Islamist military coup in 1989 Thereafter it narrates the wars in the east south west in Darfur International political and military intervention is also factored in The author draws on in depth one on one interviews with Bashir himself and his family and close political military and intelligence colleagues

National Resilience during War Eyal Lewin, 2012-08-20 In political science war is generally considered the most traumatic event a nation faces often posing threats to a nation's very existence The challenge of surviving the war may therefore prove central to the life of a nation However national resilience during war has not yet been fully investigated *National Resilience during War Refining the Decision Making Model* by Eyal Lewin searches for the mechanisms of national resilience through a deep inquiry into nine different case studies taken from

the scenery of World War II Following a multi disciplinary attitude a business management model is adopted the PEST and SWOT model and political economic social and military technological factors are analyzed for each of the case studies The result is a comprehensive political decision making model on a national level that can serve as a means for leaders to navigate successfully in geopolitical turbulence as well as for social scientists to better understand the defeats that different countries suffer and the victories that others demonstrate This research however goes further by refining the model and pointing to the exact combination of factors that are crucial for a nation s ability to win its wars Using a qualitative comparative analysis technique the exact combination is traced The results emphasize that the winning scheme blends political and social factors together leadership positive psychology and an inspiring national ethos prove to be a necessary though not a sufficient conditional combination for success National Resilience during War fills a significant gap in the literature on the politics of war

British Generals in Blair's Wars Jonathan Bailey, Richard Iron, 2016-04-15 *British Generals in Blair's Wars* is based on a series of high profile seminars held in Oxford in which senior British officers predominantly from the army reflect on their experience of campaigning The chapters embrace all the UK s major operations since the end of the Cold War but they focus particularly on Iraq and Afghanistan As personal testimonies they capture the immediacy of the authors thoughts at the time and show how the ideas of a generation of senior British officers developed in a period of rapid change against a background of intense political controversy and some popular unease The armed forces were struggling to revise their Cold War concepts and doctrines and to find the best ways to meet the demands placed upon them by their political leaders in what was seen to be a New World Order It was a time when relations between the Government of the day and the armed services came under close scrutiny and when the affection of the British public for its forces seemed to grow with the difficulty of their operational tasks This is a truly unique and invaluable book For the first time we are offered first hand testimony about Britain s involvement in recent campaigns by senior participants In addition to touching on themes like civilian military relations the operational direction of war and relationships with allies these eyewitness accounts give a real sense of how the character of a war changes even as it is being fought It will be essential reading for those in military academies and staff colleges not only in Britain but throughout NATO and especially in the USA It also has profound policy implications as both the UK and NATO more generally reassess their strategies and the value of intervention operations It will also become a primary source for historians and students of the wars in Iraq and Afghanistan in particular

namely Roman law and a specifically Ciceronian brand of Stoicism were particularly influential for Grotius in the construction of his theory of natural law The book asserts that Grotius a humanist steeped in Roman law had many reasons to employ Roman tradition and explains how Cicero's ethics and Roman law secular and offering a doctrine of the freedom of the high seas were ideally suited to provide the rules for Grotius state of nature This fascinating new study offers historians classicists and political theorists a fresh account of the historical background of the development of natural rights natural law and of international legal norms as they emerged in seventeenth century early modern Europe

The Military's Role in Counterterrorism Geraint Hughes, 2011 The author examines historical and contemporary examples of military involvement in counterterrorism outlining the specific roles which the armed forces of liberal democracies have performed in combating terrorism both in a domestic and international context He describes the political strategic conceptual diplomatic and ethical problems that can arise when a state s armed forces become engaged in counterterrorism and argues that military power can only be employed as part of a coordinated counterterrorist strategy aimed at the containment and frustration rather than the physical

elimination of the terrorist group s concerned *The Cost of Counterterrorism* Laura K. Donohue, 2008-04-14 In the aftermath of a terrorist attack political stakes are high legislators fear being seen as lenient or indifferent and often grant the executive broader authorities without thorough debate The judiciary s role too is restricted constitutional structure and cultural norms narrow the courts ability to check the executive at all but the margins The dominant Security or Freedom framework for evaluating counterterrorist law thus fails to capture an important characteristic increased executive power that shifts the balance between branches of government This book re calculates the cost of counterterrorist law to the United Kingdom and the United States arguing that the damage caused is significantly greater than first appears Donohue warns that the proliferation of biological and nuclear materials together with willingness on the part of extremists to sacrifice themselves may drive each country to take increasingly drastic measures with a resultant shift in the basic structure of both states
